#### PROCEEDINGS

CHAIRPERSON COFFMAN: Ladies and Gentlemen, good morning. The February 17, 2016 meeting of the Charter Authorizing Panel is called to order. I'd like to welcome everyone to the Arkansas Department of Education. I would ask that you please silence all electronic devices.

The Charter Authorizing Panel oversees the authorization, renewal, revision and revocation of charters. The Arkansas Quality Charter Schools Act of 2013 requires the Commissioner to appoint an ADE staff to panel, to this panel. Recently,

Commissioner Key has made a few revisions to this

Charter Authorizing Panel, and we'd like to welcome

Ms. Stacy Smith, interim assistant commissioner, and welcome Dr. Mark Gotcher, our new vice chair.

Congratulations to both of you.

Let me introduce the entire panel. We have Ms.

Jennifer Liwo, our PLSB attorney; Mr. Bobby Lester,

coordinator of Federal Programs; Mr. Greg Rogers,

assistant commissioner; Dr. Eric Saunders, assistant

commissioner; Ms. Annette Barnes, assistant

commissioner; Ms. Ivy Pfeffer, assistant

commissioner; Ms. Stacy Smith, interim assistant

commissioner; and Dr. Mark Gotcher, our deputy

commissioner and vice chair. And I'm Deborah Coffman, chief of staff and chair.

As chair, my goal is to facilitate a fair and reasonable hearing. I will request that each person speaking please state your name and title for the record each time. I will ask that you continue to speak clearly into the microphone for the benefit of the panel, the audience and the viewing audience.

The entire meeting today is being live-streamed and recorded and will be posted on the Arkansas

Department of Education website. Ms. Sharon Hill, our court reporter, will be providing a transcript of this meeting and it will also be posted on the ADE website.

And as we begin this morning I believe in our audience is Senator Blake Johnson. Senator Johnson, if you'd like to address the panel? And I believe, Senator, you are also on our special ed. taskforce. We appreciate your service.

SENATOR JOHNSON: Yes, ma'am. I appreciate the opportunity to speak. I hadn't got anything to say. My school that I would be representing is Imboden. And I appreciate your service to the state of Arkansas, and thank you.

CHAIRPERSON COFFMAN: Thank you for coming

	5
1	today.
2	I have no report today. Does any member of the
3	committee have a report? All right.
4	CONSENT AGENDA
5	CHAIRPERSON COFFMAN: Then, we'll move to the
6	consent agenda. Panel Members, you've had an
7	opportunity to review the January 20th minutes. Are
8	there any corrections or questions?
9	Then I'll accept a motion to approve the consent
10	agenda.
11	MS. BARNES: So moved.
12	CHAIRPERSON COFFMAN: Ms. Barnes has moved.
13	DR. GOTCHER: Second.
14	CHAIRPERSON COFFMAN: Second by Dr. Gotcher. Any
15	questions, discussion?
16	All in favor of the motion?
17	(UNANIMOUS CHORUS OF AYES)
18	CHAIRPERSON COFFMAN: Any opposed? The motion
19	has passed.
20	A-1: REQUEST FOR DISTRICT CONVERSION PUBLIC CHARTER SCHOOL
21	RENEWAL: CROSS COUNTY HIGH SCHOOL, A NEW TECH SCHOOL
22	CHAIRPERSON COFFMAN: All right. Let's move on
23	into the action agenda, action item 1. Ms. Boyd, you
24	are recognized.
25	MS. BOYD: Thank you, Madam Chair. Action item

1 is a request for a district conversion public charter school renewal, Cross County High School, A New Tech School. The State Board of Education approved the application for Cross County High School, A New Tech School on January 14, 2011. The charter is approved to serve students in grades 7 through 12 with a maximum enrollment of 500. Representatives of the Cross County High School are appearing before the Charter Authorizing Panel to request a 10-year renewal for the charter.

Before we start we're going to have Jennifer Davis, our attorney, come forth and tell you guys about the procedures that we'll follow for this hearing.

MS. DAVIS: Good morning. Jennifer Davis, staff attorney for the Department. I passed out a chart; I didn't know if you guys still had it, the schools that we're going to be hearing from over the next couple of days. And the hearing procedures are going to be slightly different, so they are included in your packet. But we're going to go over the ones that you'll be hearing for the first two schools today, and then when we change procedures I'll go over them at that time instead of giving them to you all at once. But for the next two schools your

hearing procedures are going to be that everybody, with the exception of the attorneys, do need to get sworn in. The charter school is going to have 20 minutes to make their presentation to you. opposition is going to have 20 minutes to state their opposition -- that's 20 minutes collectively -- with 5 minutes time for rebuttal from the school. At that point you can ask any questions that you may need, you can have any kind of discussion, and when you're done you can take a vote. If you choose to not take a vote today and take it under advisement, you can take a vote next time and allow the school time to have technical assistance from the charter office. Also, just as a reminder, as in all your other hearings, a charter is a contract, so anything that differs from -- that's said today that differs from your written materials or anything that's verbally amended today, the charter will be held to that. So any vote that you make, that will become a part of their charter or their amendment documents. have any questions? Okay.

MS. BOYD: Okay. To start their presentation we have Superintendent Carolyn Wilson.

CHAIRPERSON COFFMAN: If all representatives from the Cross County High School, A New Tech School

will stand, raise your right hand. Do you swear or affirm that the testimony you're about to give shall be the truth, the whole truth and nothing but the truth?

(ALL SPEAKERS ANSWERED AFFIRMATIVELY)

CHAIRPERSON COFFMAN: Ms. Wilson, you're recognized.

SUPT. WILSON: Good morning. I'm Carolyn Wilson, superintendent of Cross County High School --Cross County School District; I'm sorry. It's hard for me to believe that it's been five years since we received this original charter, but it's been a very eventful five years and it's passed very quickly. We immediately became members of the New Tech Network and joined the Teacher Advancement Program, called TAP, and we've been caught up in a whirlwind of activities ever since. We have received tons of PD from both programs, and that's been from top to bottom; no one was exempt. As a New Tech model school for the state, we received and hosted hundreds of visitors in this five years and they have been school teams and dignitaries and people we have been excited to show what we are doing. You can come to Cross County every day, any day and we like to show what we are doing. Governor Beebe has been to the

school, Governor Hutchinson has been to the school,
Senator Boozman and Representative Rick Crawford,
several Arkansas legislators, numerous school teams
and individuals, ranging from administrators,
teachers, board members, students, parents, and
community members. They've spent days with us,
they've spent hours with us, and they call back lots
of times.

In this five years we've formed several partnerships that have been very important to us. First of all, ARcare and Mid-South Health System, which were both instrumental in helping us implement our education of the Whole Child and a part of our school-based health center. We have -- with Higher Ed., we have a partnership with the University of Arkansas and East Arkansas Community College. The faculty has written and received several grants to help fund the additional initiatives that we have going on. We've got the Cross County Economic Development grant, Entergy grant, and ARcare, and those are the funds that make it possible for us to do some extra things.

Several initiatives that we've implemented in this last five years that really impacted our students -- the mobile apps classes have been very

successful; we have a writing center and a math lab, which offers peer tutoring for our students; and our newest effort is a college and career program that we're very proud about and want to tell you about. The great things that are happening at Cross County are made possible because of this grant. This charter allows us to put the right resources in the right places to drive us toward our mission and vision of educating the Whole Child. It has enabled us to give students the skills they need to be successful in the 21st century and our rapidly changing world.

My peers and I could talk to you all day about the things that's going on at Cross County. But more importantly, I wanted to bring some students with you to tell you -- I mean, with us to tell you what it's like firsthand to be a student at Cross County High School, A New Tech School and how it impacts them. Before I introduce any of those, I'm going to turn it over to Matt Swensen. He's going to tell you a little bit about New Tech and the career center.

MR. SWENSEN: Good morning. My name is Matt

Swenson -- bad hair day though -- but my name is Matt

Swenson and I am the director of the College and

Career Access Program and I'm also a New Tech teacher

and trainer at Cross County High School. In the next few minutes, I'm going to talk to you about the New Tech Network, some of our teacher supports, and then our College and Career Access Program.

Cross County High School joined the New Tech Network in 2011. And the New Tech Network is a network of schools that want to redesign what high school looks like with three main principles: technology that enables, curriculum that engages, and culture that empowers. Every school implements these principles differently; for us though, technology that enables means a one-to-one rollout of MacBook Airs and they're used in every classroom; curriculum that engages means co-taught classes, facilitators instead of lecturers, and project-based/inquiry-based learning for all; and culture that empowers means more student choice and empowerment throughout the school. And we believe that these are game-changers for our students and it changes the way that they learn every day.

Some of these pictures are ways that our students learn, from Socratic seminars to computer repair, and something we're very proud of, our mobile apps course.

But with change we understand that we must bring

a lot of teacher support and Cross County does this as well. The first way the teachers are supported is through weekly PLC's, which we call cluster. This is a time for teachers to analyze, both qualitatively and quantitatively, data; discuss best teaching practices; and grow as professionals. You can see on the left, the picture on the left, our data wall and this is what we use to take student work, look for trends, and build strategies to intervene. Teachers are also provided one-to-one support through our New Tech and TAP structures. I myself am a New Tech trainer, so I may work with teachers on project design, backward planning, or behavior management in the classroom. We realize that we need to have everyone in our building be empowered, and that includes our teachers and our faculty, so when we consider growth of the school all voices are considered. And we use something called the Cycle of Inquiry where we look at data and research; we analyze that data and then we devise the plan together and execute, and this is how we came up with our College and Career Access Program.

We realized from looking at the data that our students were enrolling in a post-secondary experience -- and what I mean is two-year college,

four-year college, technical school, and the military
-- at a rate far below the national and state
averages. Thus, we started a program that was
designed to mitigate these factors and help our
students have access, preparedness, and eligibility.
And later in this presentation you're going to hear
from students who are part of this program and have
lived and breathed it. But before they come up, I do
want to point out some of the successes we've had
with the College and Career Access Program.

As you can see from the data, from the class of

2013 to the class of 2015, we've had a steady increase in the percentage of students who are enrolling in post-secondary experiences.

Additionally, we're excited about 100% of our seniors last year applying to at least two colleges; 100% of our seniors last year being accepted to a college; and 85% of our seniors indicating on an exit survey that they are ready for a four-year institution.

However, it's important to note that we're not satisfied and we're going to continue to expand and grow. At Cross County we want every student to have meaningful choices throughout their lives and we're not going to rest until that's a reality.

At this point it's my pleasure to introduce

three of our students: Truman Jones, Elizabeth Woolbright, and Austin Phelan. Thank you.

MR. PHELAN: Thank you, Mr. Swenson, and thank you, Charter Authorizing Panel for allowing us to be here today. I'm Austin Phelan, and behind me are Truman Jones and Elizabeth Woolbright, and we're going to tell you about what it's like to be a Cross County High School student.

MR. JONES: Now the first thing you really need to know about Cross County is our school-wide These outcomes are how we are learning outcomes. assessed. We have content, which is worth 30%; we have knowledge and thinking, which is how students critically and creatively problem-solve, and it's worth 10%; there is agency, which is the growth mindset of a student, and it's worth 10%; there is written and oral communication, both are worth 10%; and then collaboration, which is worth 10%. All of these we are given a rubric for at the beginning of the year so we know how -- what grade we'll get. And then, finally, we have comprehensive exams, which is worth 20%. All of these outcomes help us prepare for the 21st century environment we live in today.

MS. WOOLBRIGHT: Cross County is a New Tech school, meaning we use technology and projects to

learn year-round. And here's a basic overview of a project. As you can see, we go through multiple benchmarks and then that leads us to our final presentation and our reflection of the project.

MR. PHELAN: To kick-start these projects, we have entry documents or an entry event that introduces us to what we're going to be learning or what we're going to be doing in the project. It gets us excited about the project and it helps to engage our brains in what we will be doing. This particular entry document is the Zombie Apocalypse entry document and it is written in the form of a poem because in the future we would have to write our own poems about Zombie Apocalypse later on.

MR. JONES: After the entry event, we have something called a project calendar. Now the project calendar is where you will find all the due dates and when everything is due. This is really important because it helps us learn how to be organized.

Another thing that helps us be organized is the daily agenda; there you can find what we're doing day to day each day.

Next we have the project briefcase, which has assignments and resources in it. But the most important part of the project briefcase is the

driving question, which you can see highlighted above. The driving question is what we're trying to answer throughout the entirety of the project; it's the big picture question.

MS. WOOLBRIGHT: After we explore the project briefcase and the entry doc, we then make a list of knows and need-to-knows. And our need-to-knows aren't only answered by our teachers, but other teachers, our classmates, even our parents and community members.

MR. PHELAN: Benchmarks help lead us to our culminating event. And as a student athlete, I can say that benchmarks are to a project as a quarter is to a basketball game. You can't have a final score without a first quarter, and you can't have a final product without the first benchmark.

MR. JONES: There in the benchmarks we learn in a variety of different ways, from workshops, which are teacher ran, to small groups that are student-based. We also learn in labs, real-time demonstrations, and unlike a lot of schools we learn using co-teaching, which is where two teachers come together to teach two subjects in one classroom.

MS. WOOLBRIGHT: At the end of our project we then present to our class, sometimes community

members and business leaders. And on average, we do 32 projects a year but it often feels like more.

MR. PHELAN: When it comes to assessment every project starts with the state standards for the teacher to build on. The state standards that are on the board were for the Zombie project. They outline our project and what we're going to be learning. We can be assessed through assignments online, through paper and pencil assignments, rubric based grading, and even exams. Most of our products are assessed through rubrics. This is the Zombie rubric. It showed us how to get an A, a B, a C, or a D on the project.

MS. WOOLBRIGHT: We have a really great college and career program. Grades 7 through 11 are able to take college trips and juniors are allowed two job shadowing opportunities. Through our College and Career Access Program we went on a college trip up north, which we called the Rock Star Trip. This is where we saw different colleges and I saw many that stuck out to me, like Washington University, Wisconsin-Madison, and Chicago University. And even though I may not go to these colleges, it was a really great experience and it showed me what I want in a college.

MR. JONES: Cross County really focuses on individual support with helping students apply and learn about colleges. One way they do this is with parent nights, and a parent night is where students and parents come to help fill out difficult things, such as the FAFSA, and other things they might need support with.

MR. PHELAN: At Cross County High School seniors are not the only ones that get college and career opportunities. In fact, every single 11th grader is required to take the college and career readiness course that focuses on college and career knowledge, ACT readiness, and academic vocabulary. As a student of this class, I can say that it has helped me in many of the areas, such as improving my ACT score by three points.

Another unique course we have at Cross County
High School is the capstone course, and the capstone
course has four main pillars to it. The first one is
sustainability, which asks the question how do we
insure our world is sustainable; the next is ethics,
which asks the question what is right; then we have
truth in patterns, which asks the question how do we
know we know what we know; the last one is civic
life, and it asks the question how do we become a

good citizen. At the end of the year we'll build a portfolio and present it to our teachers and community leaders.

Cross County also provides support for all its alumni because they want to not only insure their students get into college, but also graduate. In return, the alumni give support back to us. They do this by having one-to-one discussions with current students and even attending panels. Another way our alumni give back is with the alumni blog. This blog includes their successes and failures with college, and even tips and tricks they may have picked up along the way to really help out the students now.

MS. WOOLBRIGHT: Cross County has shown me that just because I'm from a small school that doesn't mean I can't go out and do things. It showed me what I want in a college experience and I know that when I graduate that I will be prepared for college and there's no surprises.

MR. PHELAN: Cross County has really pushed me to my limits and challenged me greatly. The alumni before me has taught me that it doesn't matter that I'm from a small town. I'm from a small town and my opportunities coming from this small town are endless. I've learned to be a leader and I hope to

set a good example for the following classes.

MR. JONES: Cross County has such a drive for making sure its students learn and have -- retain the most knowledge they can. That has really inspired me to become a teacher when I'm older. I hope to one day teach history and philosophy. It has been my honor to present to you all, and at this time I would like to introduce Mr. Stephen Prince, the principal of Cross County High School.

MR. PRINCE: Good morning, Members of the Panel. It's going to be really hard to follow those great student presentations. They clearly represent our students' mission. I would be comfortable asking any of our students at Cross County High School to come present to you today. When I think back to myself as a student I wouldn't be as comfortable coming and doing something like this today, but our students are willing and excited to do so.

With that said, our students -- with that said, we have made great strides in building and fostering 21st century skills in our students and preparing them to compete globally. We realize that our test data doesn't always point to that conclusion and our standardized test scores are not always reflective of our students' abilities. And we understand that that

is something we need to continue to grow on. As we continue to innovate and research ideas that will help us better prepare our students to be successful on standardized tests, we think our accomplishments prove that we are driving towards our mission and vision. With our school model we use projects and problems to drive student learning and at times this does not perfectly align with standardized testing. Yet, we believe that the value our students gain from diving deep into content to understanding it at a level beyond just repeating it. It's providing them with the opportunities and experiences necessary to live a passion driven life.

Our charter has allowed us the flexibility to provide our students with the best teachers in every classroom. We know it's necessary to insure that all our students leave us as great readers, writers, thinkers, citizens, and leaders. We acknowledge that we still need to improve and grow, but we are confident that we are doing what is best for kids.

After telling you all of this, we feel it's better summed up by our alumni. So here is a short video with their comments.

(COURT REPORTER'S NOTE: A video was shown, which is available for viewing on the ADE website.)

1	MR. PRINCE: We do want to thank you for your
2	time and consideration with our charter renewal. And
3	I guess that's our presentation.
4	CHAIRPERSON COFFMAN: Thank you. Is there
5	anyone that will speak in opposition of this charter?
6	(BRIEF MOMENT OF SILENCE)
7	CHAIRPERSON COFFMAN: Then, we have five
8	additional minutes.
9	MR. PRINCE: Dr. McClure has prepared a short
10	video as part of our closing.
11	(COURT REPORTER'S NOTE: A video was shown,
12	which is available for viewing on the ADE website.
13	Following is the transcription of Dr. McClure's
14	statements.)
15	DR. McCLURE: Good morning. I'm Matt McClure,
16	Chief Learning and Financial Officer and former
17	superintendent of the Cross County School District.
18	I apologize for not being there in person. I'm
19	currently in DC as president of ASED and we are
20	holding a summit for the CEO's of the largest
21	educational organizations and companies, and this has
22	been planned for almost a year.
23	Now when we first applied for a charter for the
24	high school we were the catalyst for starting former
25	Governor Beebe's STEM-Works initiatives. STEM-Works

served as a vehicle for multiple schools across the state to move toward a curriculum that teaches students to think and prepare themselves to be successful, whether they are preparing for college or career. We also piloted for the career and technical education a course of study for mobile app development. That is thriving in our school and has expanded across the state.

Now our charter focuses on five primary goals for our students in addition to the pre-requisite academic skills of math and literacy. These goals are: to teach our students to be able to problemsolve real world problems; to think analytically; to break things down into steps, from beginning to the end; to collaborate with others to solve those problems; to be able to communicate, both written and verbally, what it is that they've learned; and last but not least, to be able to use the most effective and efficient technology to solve the problem at hand.

Now as a member of the New Tech Network the delivery mechanism is project process-based learning. And over the last four year we've had many successes, as well as many learning opportunities. One of the learning opportunities we have had is the

implementation of many programs simultaneously. At the same time we implemented New Tech we also implemented the Teacher Advancement Program, also known as TAP. And it has embedded professional development, staff evaluation, and field teaching strategies -- field testing strategies that are then rolled out school-wide. It was a massive undertaking to implement both of these initiatives at the same time and I believe that it caused one of our implementation dips at the beginning.

Another of the major hurdles we discovered is that for teachers to become facilitators and students to own their own learning there is an implementation gap that must be overcome. We have begun over the last few years gradually reducing the impact of the 7th and 8th grade levels to condition our students to have the maturity to own their learning and work collaboratively with others.

Staff turnover has been another obstacle that we have had to overcome. We've had some teachers elect to retire or relocate, rather than be retrained.

The second obstacle has been the utilization of Teach for America teachers. That is essentially built into the system that there will be staff turnover, even though we've had multiple teachers --

TFA teachers that have stayed three to four years.

Now when we look at multiple measures of student data we are seeing some areas that are showing positive growth, including but not limited to ACT scores, college going rate, and students' ability to talk about, in-depth, what they have learned and how it's applicable to the real world.

Now we've also seen areas where we must improve, including the overall student test scores. And to accomplish this we have begun really focusing on not only going deep in the learning but providing additional resources for those students not possessing the appropriate academic skills for their grade level. This is being accomplished through tutoring, RTI, and workshops in the classroom. We also understand that multiple test changes may have impacted our students and their test scores in some of these areas.

Another area that we're diligently working on improving is our graduation rate. We knew that the increase in rigor in the classroom would affect some of our students' abilities to be successful initially. To address this we've implemented online credit recovery, as well as the things I mentioned previously. This past year there's been some

positive growth in the graduation rate.

So when you look at our successes and areas for improvement under the multiple measures of student success, it's a mixed bag. But when you walk into our classrooms and you have conversations with our students about what they're learning, their ability to articulate what they're learning, there's no question that we are succeeding in what our charter was intended to do. Our school is not an open enrollment charter. We take all students and have had many school choice into our district. For nine of the past ten years we've had an increase in enrollment, while most schools in the Delta have The ability to overcome the obstacles that declined. we must address, and continue to find ways to address these obstacles, is paramount to our success. you ask our students, parents, community leaders, and staff if our students are more prepared for college and career than before we received our original charter, the answer would be absolutely yes.

I would implore you to vote to renew our charter for the successes we've had and the commitment that we have to overcome the obstacles that are keeping us from becoming the school we want to be and our students deserve, as well as continuing to be a

	27
1	model, to be looked at statewide for its innovation
2	and commitment to excellence. Thank you.
3	[END OF VIDEO]
4	CHAIRPERSON COFFMAN: I believe Dr. McClure is
5	online
6	MR. BRADBERRY: Correct.
7	CHAIRPERSON COFFMAN: if we have questions.
8	Okay. Panel Members, are there any questions? Dr.
9	Saunders.
10	DR. SAUNDERS: Good morning. I wanted to get
11	some clarification on some of the things in the
12	application, in particular looking at let me find
13	it here. It's on page it's labeled as page 161,
14	and it's the comparison from the charter school to
15	surrounding school district enrollments. It's got
16	four tables on it. It talks about the demographics
17	of your students at your school and in your district.
18	MR. PRINCE: Is that in the original application
19	I mean, the renewal application? Is that the page
20	you're talking about?
21	DR. SAUNDERS: Yes. Let me see if it has
22	another page number on it. I don't see another page
23	number. I actually have it as the last page, maybe
24	the very last page on there.
25	CHAIRPERSON COFFMAN: Is that packet one or

	20
1	packet two?
2	DR. SAUNDERS: It's A-1, 161.
3	DR. GOTCHER: Well, that's on a pdf document.
4	They may not have that
5	DR. SAUNDERS: Okay.
6	DR. GOTCHER: in the same order.
7	MS. SMITH: It's in this section with districts
8	with similar demographic data.
9	DR. SAUNDERS: Got it?
10	MR. PRINCE: Yes.
11	DR. SAUNDERS: Okay. Thank you. What I was
12	looking at, in particular, was the 14-15 student
13	status on the bottom left, and it has a reported free
14	and reduced population of 43.86%. Is that for the
15	high school?
16	MR. PRINCE: It's showing 71.93 on this chart.
17	That is the incorrect number.
18	SUPT. WILSON: That should have probably been
19	73. I thought typically that we range from 70 to 75
20	every year. Now I don't know whether that was a typo
21	and none of us caught it when we were looking back
22	through this, but we have ranged from 70 to 75 every
23	year for the last six or eight, maybe even ten years.
24	DR. SAUNDERS: I thought that yeah, that
25	really jumped out at me and that's one thing I wanted

to clarify.

SUPT. WILSON: You know, we look at this stuff so much that we see what we want to see or what we intend to see.

DR. SAUNDERS: Okay. Also, on the -- in a similar section, I think one page before then, the comparison to the other schools with similar demographics, and it looks like the schools in particular for comparison you did with percent free and reduced, approximately a dozen schools right there, with yours being right in the middle. And of concern that I noticed in many reports was the math performance in here. It had the math performance as 8.24%, one of the lowest on the chart. Is that correct?

MR. PRINCE: That is accurate. Yes.

DR. SAUNDERS: And I think -- and I'll give you a chance to address that, if I can, just to tie it all in at once. Also, on the grade letter assignment it was a D for last year. So I'll just turn it over to you and let you address that.

MR. PRINCE: Okay. So to address the D rating that we got, we received that D rating mainly because of our graduation rate that particular year, which was significantly lower than any other years we've

2

seen in the past, and it was an anomaly year. believe we ended up having 16 or so students who did not graduate for one reason or another, despite our best efforts to try to get them to do so. really made a big negative impact on that for that particular school year. And in terms of our math scores, we realize that our math scores are not good and we are trying several different things to try and remedy that and change that. And some things that we're working -- looking at doing on the math: you know, obviously, the problem inquiry-based learning and the problem-based learning in math to try to make the lessons and things more engaging to the students and more real world applicable when it comes to math concepts, but also making sure that we are teaching those math concepts because math is a conceptual content area. So making sure that they can take both, learning the concepts and apply them in a real world scenario to see how that concept works for that And I do have a couple of example problems if y'all would like to hear that we've done recently to kind of -- that kind of helps hopefully get us moving in the right direction.

in the right direction.

SUPT. WILSON: Before you address that, one thing that happened to us on the implementation of

New Tech is when we were trained originally it was all project-based learning, and we quickly learned that that wasn't a success in math. And so we started delving back into it. We started talking to the other schools. We started looking at New Tech schools that were having success, and they were using what they call problem-based. So it wasn't a -- like in Biocom that they talked about, the project, that might've lasted three weeks; it was daily problem solving. And so we had a period of the first two years that we didn't know whether we were doing it wrong or what's happening here. But then when we figured it out we've changed that and I think we'll start doing better on that. We have had one teacher that caused a huge gap one year; this teacher is no longer with us.

DR. SAUNDERS: Okay. So how long ago were those changes made so we'd be able to see the results?

SUPT. WILSON: Well, actually, two years. This is our second year to have those changes back in place that should start impacting it. But teacher turnover has forced changes in 7th and 8th grade for three times in this five-year period, and we've calmed that teacher turnover. And I feel like every year -- and I say it -- we've got the best teachers

ever. But still yet, when scores comes out we can tell that things aren't going exactly the way we thought they were going, so --

And if I might add a little bit to MR. PRINCE: what we're doing with math, then I will redirect back to your question about graduation rates also in accordance to the D rating and everything. When we think about the math, when we found out that we were moving toward the ACT Aspire, that really excited us about being -- as a staff being really ready to better prepare our students, because that is a test that the students see as meaningful. So we also think that that's going to also help because the testing itself is going to seem more meaningful to the students, because it's going to lead to that real test, that real world test that they need to be able to, you know, apply to colleges, apply for scholarships, apply for, you know, just different things, tech schools and all that. We are providing PD to our math teachers in certain ways, such as sending them to shadow other exemplar problem-based math classrooms in the area. We've already reached out to two schools to get that set up. We also really utilize our TAP system and we utilize our embedded professional development, which our cluster

meetings, where we as a leadership team look at data, develop focus areas -- or determine focus areas, and take that and develop research-based strategies. And this year we are focusing on starting with the content vocabulary strategy that reaches everyone, and also -- which will also narrow down soon into a focus strategy for fractions, which that's applicable across the board in math with fractions and decimals and percentages. So we're hoping those things are going to tighten up some of the math deficits that we are seeing. We are using Marilyn Burns' research to help us drive that math strategy and Marzano's vocabulary research to help drive our vocabulary strategy development, which that's already been rolled out -- to name a few things that we're doing.

To go back to the graduation rate, some of the things, of course, with the new added college and career readiness program, with the mentoring that Mr. Swensen does with our students, the meetings and the conferences that I have with students and that the school counselor has with the students, we really are staying on top of those students to make sure they see the need in graduation. And whatever we can do to help -- if that means some credit recovery, which that has already started to be something that we've

had to offer some students to work on. So there's been several things that we're doing to help improve that graduation rate. And I will say that our graduation rate should improve based even on last year's graduates.

DR. SAUNDERS: Can I just follow -- one follow-up?

DR. McCLURE: Mr. Prince --

25

MR. BRADBERRY: Dr. McClure?

DR. McCLURE: Yes. Dr. Saunders, can I answer that question a little bit too on the math piece? Every bit of research that we know indicates that the number one indicator of student success is the teacher in the classroom. And over the course of our charter, to be completely frank, we have removed two of the teachers from the district because of deficiencies, I guess would be the easiest way to say it, but they weren't being successful. We had done embedded professional development, we had done coaching with them, we had tried to retrain them, and it just didn't -- they weren't right; they were not the right fit. And so I think that's one of the constant struggles that we've had in the past there and, you know, hopefully, we will not continue to have. But I think a key is also recognizing when

someone is not effective in the classroom, working with them to improve -- and if they're not able to improve, making sure that you make a change in that situation. And I think that we've demonstrated that over the course of our charter.

DR. SAUNDERS: All right. Thank you. One follow-up question that I had: what type of proactive formative assessments that you have so that students are successful to make adjustments on the front-end?

MR. PRINCE: We utilize The Learning Institute, so we do utilize their interim assessments. also developed interim assessments from the Noble Network, which is for 9th and 10th graders, well, predominantly. It's kind of -- it's an interim assessment; it's the Noble Network of schools that have developed those. So we use those two indicators and we also use our data walls to help track that from our TLI data, those ACT pre and post tests that we've developed, and set those baselines to track that data. And also our field testing, the schoolwide strategy data that we meet on every week and we look at that data, the qualitative pieces and the quantitative pieces, to give teachers direction on how to change instruction in their classroom.

DR. SAUNDERS: Thank you.

1 MR. PRINCE: And can I add one thing about our AC -- or our graduation rates? I'd like to point out 2 3 that, you know, that off-year where we received that D we were at 72.2% graduation rate. Well, at the 4 5 2013-14 school year, when we -- I believe that's the year that we had a new leader in that building --6 7 that graduation rate went up to 89.1%. DR. SAUNDERS: Thank you. 8 9 CHAIRPERSON COFFMAN: Ms. Pfeffer. 10 MR. PRINCE: And that leader is here today, by 11 the way. 12 MS. PFEFFER: Good morning. I just wanted to first commend those students who are here. 13 And I don't think I got your last names correct, so I just 14 want to -- it's Elizabeth, Austin and Truman. 15 16 MR. PRINCE: Yes, ma'am. 17 MS. PFEFFER: Stand up for just a second because 18 I really want to commend you. I get so nervous every time I stand up there to speak to a group, and I just 19 20 want you to know I'm so impressed with your 21 presentation and with your willingness to be here. 22 So, thank you. And you all did a good job helping me 23 understand what your everyday school looks like and I 24 appreciate that, as well. So -- and, Ms. Wilson, 25 that was a very good strategy bringing them here

1 today. SUPT. WILSON: I am in awe of students every 2 time I go into that building. If I do a walk-thru 3 that's supposed to be two minutes, I end up staying 4 5 there for 30 minutes because our students are very articulate and never get nervous. As you saw in the 6 video, they spoke to Governor Hutchinson just like he 7 8 was the neighbor next door. 9 MS. PFEFFER: Well, and thank you again. I have just a couple of questions -- I think it would be for 10 11 Mr. Swensen -- about your College and Career Access 12 Program. 13 MR. SWENSEN: Absolutely. MS. PFEFFER: Okay. When did you all start this 14 15 initiative? So there was pieces of it that 16 MR. SWENSEN: started in the 2013-2014 school year, but we did full 17 18 implementation last year, 2014-2015. 19 Okay. And so the data there, MS. PFEFFER: that's pretty significant data in looking at the 20 21 increase in the percentage of students who are 22 enrolling in -- am I correct? You all had a slide up 23 there about the --24 MR. SWENSEN: Yeah. MS. PFEFFER: -- enrollment numbers. 25

	36
1	MR. SWENSEN: So we went from I'm sorry to
2	interrupt.
3	MS. PFEFFER: No, you go ahead.
4	MR. SWENSEN: Okay.
5	MS. PFEFFER: I can't find it on my page.
6	MR. SWENSEN: So we went from and I have it
7	on a card here. Just give me one sec. We went from
8	having around I think it's mid-40's, 45% of our
9	students doing two- and four-year. And we track it
10	through a program called Naviance in the
11	clearinghouse, and we actually saw 73% of our
12	students go to post-secondary experiences.
13	MS. PFEFFER: Okay.
14	MR. SWENSEN: And what we count and it's the
15	same thing the network counts and that's two-year,
16	four-year, technical school, and then military.
17	MS. PFEFER: Okay.
18	MR. SWENSEN: So we're really happy about that,
19	but we want it to be higher.
20	MS. PFEFFER: But just the implementation of
21	that program and the gains that you've made, I was
22	very impressed with that. So, and I really
23	appreciate Dr. McClure's information on looking at
24	the multiple measures of student success, because as
25	we review these charter applications we do that

because, you know, one piece of data doesn't always tell us everything we need to know. So, you know, just in looking at that -- and I think though that Mr. Prince addressed it a minute ago. When I looked at the graduation rate and it, you know, kind of had been in the 80%, dropped down to 70, back up in the 80s, that is some fluctuation there that I'm optimistic that with your continued College Access that should increase. As you said, you know, you -- if the numbers of those going to school increase, you know, hopefully your graduation rate will increase as well because that would be the signal that all of your students are getting the preparation they need to move on.

The other thing though that I was looking at were the AP scores which would also be to me indicative of preparation for college success. And I was wondering are your students accessing that level of college rigor with AP classes only? Are they getting opportunities for concurrent credit? So I was -- because those things can make a big difference, as well.

MR. SWENSEN: Absolutely. I'm going to have Mr. Prince speak -- Mr. Prince is going to speak to the AP scores and then do -- I do want to say one thing

to your point about graduation rates and how that's connected to the College and Career Access Program. So I wasn't a very good high school student; I was a great college student. And I think what we need are students to have is they need to understand what's possible after high school, because sometimes otherwise it can just seem like it's in a void. And that's what we're trying to avoid. And I do think there will be higher graduation rates because our students will have a purpose to their work, and we're already seeing some of that. So, and yeah. So I just want to point that out and then Mr. Prince is going to talk about AP scores.

MR. PRINCE: So obviously you see the charts with their AP scores and they don't look good. So some things that we are -- we put in place to try to remedy that: currently, we've had several students more interested in concurrent college credit than AP classes. So we started there and wrapped our minds around what can we do to change that mindset. So we -- starting this year we began offering concurrent credit on campus with a dually certified teacher. So our biology teacher is teaching AP biology but she is also teaching -- in the second semester she will be teaching concurrently college level biology. So our

hopes are that adding that rigor with both those courses and adding those learning styles with both of those courses and those instructional methodologies that we're going to see not only are the students continually getting their credits for college and leaving us with more credits to enter college, but also doing better on those AP exams. And I hope I answered that well enough for you.

MS. PFEFFER: You did. Because that was my -my interest was, you know, really thinking about are
they getting that level of college rigor while
they're in high school. So do you have plans to try
to expand your --

MR. PRINCE: Yes. Next year.

MS. PFEFFER: -- concurrent --

MR. PRINCE: We have already met with East
Arkansas Community College. And we've already
identified our environmental science teacher on
campus and she will be doing the same thing with
offering AP environmental and teaching a concurrent
credit class that will meet the same criteria. So
we're hoping with New Tech's rigor, with the rigor of
AP classes, and the rigor with the college class
we're going to start seeing some gains in several
different areas in terms of AP status.

16

17

18

19

20

21

22

23

24

25

I would like to point out that our first semester we had 28 students enrolled in taking a concurrent credit class. This semester we have 18.

Last semester we had two students that did not pass their concurrent credit, but one of those students is retaking the same class and is doing very well in the class.

MS. PFEFFER: Okav. And if I could ask one more question. And so this relates to the teachers because your teacher retention almost kind of mirrored what we were seeing with the graduation rate. And I don't know if the years exactly match, but you had that one year where you were saying that you had quite a bit of turnover. You've mentioned using the TAP model as part of a tool to insure high quality teachers and to retain them. Do you have or are you putting in place any other formalized ways to retain some really good teachers? Because I know with -- you know -- with those who are qualified to teach concurrent credit, those aren't easy to come by.

MR. PRINCE: Absolutely.

MS. PFEFFER: And the AP training and those that are really able to provide that instruction to get those students to those high levels of performance

2

17

18

19

20

21

22

23

24

25

are not easy to come by. So can you talk a little bit about maybe some formalized things you're going to be doing?

Absolutely. So I'll start with the MR. PRINCE: The TAP model, one of the tenants in TAP is the multiple career paths, which what that means is we -- part of that is a leadership team, and that leadership team is made up of the principal, master mentor teachers, and our New Tech trainer. have a variety of people on that team. And those people have been able to move up from just a career classroom teacher into those leadership roles. really looking at distributive leadership in our building; providing those leadership opportunities is one way we're trying to retain teachers so they can grow within the system. And we're also working with TFA this year to work on what we call irreplaceables. So we've gone through a process with them and gotten a strategy from them to sit down and work with some of those teachers we've identified as those irreplaceables and those ones that we really need to stay to get them to stay. And sometimes in my experience already this year with speaking with some of them it's just been the simplest things that we can fix within the system that's going to change

2

3

4

24

25

their mind about even considering leaving. So that's been a real positive for us this year in terms of those highly effective teachers. Some of the research that we learned through working with TFA and retaining highly qualified or high quality teachers is that it on average takes 11 hires to replace that highly effective teacher that you lose. And so those are just a couple of the big things that we're doing to try and -- to keep those teachers there. And also with the New Tech model, you know, fostering that idea of a positive culture in the building and just having a positive culture; not necessarily with the New Tech model, but fostering that positive culture in the building where teachers feel safe speaking with the leaders in the building and feel like they have a voice and a choice in different things. we do that through our Wednesday morning meetings and through our distributive leadership paths.

CHAIRPERSON COFFMAN: Thank you. Dr. Gotcher.

DR. GOTCHER: Yes. Well, folks, it was a privilege a few months ago to be a guest at the New Tech high school; it was an honor to be there. And one of the things that struck me, Mr. Prince, was student leaders and I think that that is a powerful component. And when you look at, as Ms. Pfeffer

said, the multiple measures when you're evaluating a school, seeing the student leaders was a powerful piece for me and I want to commend you folks for that. I actually had some notes regarding the TAP model, and I think you've addressed most of them. But knowing that it's required to have a school leadership team and a cluster, tell me your -- in your observation how you've seen those leadership teams change. When you address math scores or any other issue, what does an agenda look like, and how have you seen those changed, and are you encouraged by what you're seeing?

MR. PRINCE: Yeah. So the leadership team over the last few years, with the teacher turnover -- because there have been some leadership team member turnover with some of those teachers that left -- but, currently, the leadership team we have in place now looks to be in it for the long-haul with us. And we meet weekly on Wednesdays after school. I devise an agenda that includes what we call DICE, which includes data points; IGP, we review teacher IGPs; cluster, we talk about what's going on with cluster, with field testing, how our strategy is coming along, what's that data looking like, are we looking good, do we need to go back to the drawing board on some

teachers. Our teachers are evaluated and observed four times a year using our TAP rubric, which was developed by Charlotte Danielson, and it includes everything from instruction in the classroom to managing classroom to the culture in the classroom and even managing behaviors in the classroom. So it covers the whole gamut when we go in and do an observation. And those observations are not only done by me, but also members of the leadership team. So the master mentor teachers, those peers that they work closer with actually evaluate them and provide them with feedback as well. And we provide them with the one reinforcement; we always start with what was good and then one refinement. We don't bombard them with tons of things they didn't do well; we pick one and one and we dig in and we provide them research to improve that and research that attests to what they've done that was well. And we try to promote them to continue that reinforcement area and continue to do those things that we saw in the classroom and give them ways to improve, give them solid ways and quidance during the post-conference, to sit down with them and say, "Okay, you tried this; I think these things will change." So we actually give them actual

	47
1	strategies to take back from that post-conference.
2	And then we build their next IGP goal based on that
3	and they work on that throughout until their next
4	observation.
5	DR. GOTCHER: You've got a very impressive
6	model. Thank you.
7	CHAIRPERSON COFFMAN: Ms. Smith.
8	DR. McCLURE: Dr. Gotcher?
9	DR. GOTCHER: Yes, sir.
10	DR. McCLURE: Dr. Gotcher, can I Dr. Gotcher,
11	can I address one other thing? Also in those cluster
12	meetings they're bringing in student work at both
13	high, medium and low levels. And so we're developing
14	terminology so all teachers know, okay, what does
15	high student work look like, what does medium student
16	work look like, so then they're actually talking
17	about what the strategies are to move low to medium
18	and medium to high. And I think it's very important
19	to big cognizant of if your teachers don't understand
20	what high work looks like, what that [sound cut out
21	here] student work, it's going to be hard to achieve
22	that.
23	MR. PRINCE: And can
24	DR. GOTCHER: Very good. Thank you, Dr.
25	McClure.

It's not

1 MR. PRINCE: May I add how we support our teachers through the TAP model, because I think 2 that's important, because it's not just evaluations 3 in the way we support them. Throughout the TAP model 4 5 that provides opportunities for our master mentor teachers to identify those areas during cluster, to 6 7 work with them during cluster, to set appointments with those teachers, myself included to set 8 appointments with those teachers and identify when 9 10 we're -- what it is that they still need a little work on, even if that means the way to implement the 11 strategy. So we will go in the classroom; we will 12 co-teach with them; we will model for them what 13 effective instruction should look like; we will do 14 15 some extra observations for them; we will pinpoint an 16 area and we'll say, okay, so I'll come in and I'll just look at this chunk of your lesson and give you 17 18 some solid extensive feedback on that. And then New Tech does the exact same thing in terms of getting in 19 there, making appointments, helping teachers plan 20 21 lessons, helping teachers assess students -- just 22 going through all those pieces. So it's really a 23 high level of support with our TAP and our New Tech 24 And I just wanted to make sure you systems. 25 understood how we do support our teachers.

1 just about the evaluations. It's everything. to include everything under that umbrella of support. 2 CHAIRPERSON COFFMAN: Thank you. Ms. Smith. 3 MS. SMITH: I kind of have the same comments 4 5 with your AP scores and your math scores and just really having a strategic plan for professional 6 7 development with your teachers. You know, even with your AP courses your enrollment numbers in those 8 9 areas have also dropped, not just the scores. 10 you're supporting your teachers, is there a strategic 11 plan and benchmarks that you're looking for improvement in those areas? Because I haven't -- I 12 13 guess earlier, when you were talking about your math I didn't hear any specifics as far as strategic PD 14 15 for math. 16 MR. PRINCE: Yeah. So some things that we've already done, we've had Think Forward come in to 17 18 provide some structured problem-based learning. was a three-day training over this past summer. 19 Like I said, we're going to do some shadowing to get some 20 21 firsthand knowledge of what that looks like in 22 I've got this listed. Hang on. action. 23 MS. SMITH: You bet. 24 MR. PRINCE: Because I don't want to forget anything. 25 So we also do a new teacher induction

and we really walk them through different avenues, what our data looks like, what data do we use, what's our instruction methodology. This year, Mr. Swensen and our other New Tech trainer has already had a couple of sessions with new teachers and any other teachers we deemed that they need the training, that they go in and they are learning -- they are teaching them how to build a project, how to do those benchmarks, what math instruction should look like under this umbrella, what this type of instruction should look like under this umbrella. So we are planning and we already have put together a solid plan and what certain things and for certain teachers need to happen.

MS. SMITH: Okay.

MR. PRINCE: And we also strive to make sure that all of our AP teachers get through that AP certification.

MS. SMITH: Okay. You know, data literacy is probably the hardest thing to overcome and get people to that point. And it sounds like you have all the right things in place; it's just getting that laser-like focus to move the needle.

One other comment I wanted to make was -- and

you guys actually cited it in your paper -- but it had to do with your discipline regarding tardies. The in-school suspension for tardies, an excessive amount of tardies is really a traditional way of thinking. And so when you're thinking about being an innovative school I would challenge you also to look at innovative ways instead of removing a student from a classroom for that.

MR. PRINCE: Absolutely. And we actually -when that was brought to our attention when we got
our renewal data, we thought, oh, my goodness --

MS. SMITH: Right.

MR. PRINCE: -- I can't believe that. You know, it doesn't seem like there was that much. So we met as a staff in one of our Wednesday morning meetings -- another one of those things we want to give our staff some voice and choice in -- to come up with plans and ideas on how we can keep our kids in the classroom. And we've come up with one way is a lunch detention and that's been very effective this year. We do not have teachers do lunch detention. The leadership team members, we go and we deal with those kids during lunch detention. We don't have many repeat offenders, so we're hoping that's going to curb some of that. And so that's just one way. And

we just wanted the staff to have a little bit of voice in that because they have a lot of good ideas and we really needed their help on that. But it was an eye-opener when we looked at that data because that's something that we don't look at as closely, when you think about it, is that discipline data, unless it's on a certain student, you know, that you're pinpointed on for some reason. So -- and we also are encouraging and we've actually required some teachers to go to some classroom management training. We do some of that stuff during our new teacher induction, for some of those fresh new teachers. But Harry Wong, we've sent some folks to Harry Wong. Wе do use Fred Jones and Harry Wong's work when we're training new teachers. I sit down and Mr. Swensen has sat down this year with some individual teachers to work with on some classroom management planning, to help some of those things also in terms of discipline and keeping them in the classroom.

MS. SMITH: Thank you.

CHAIRPERSON COFFMAN: Ms. Barnes.

MS. BARNES: Good morning. Thank you all for being here and especially to the students. We appreciate their presentation. It's always good to see what the students feel about their learning

environment. Most of my concerns have already been addressed and there is -- conversations have touched on some of the things that I did want to ask about. So I'd like to go back, I suppose, initially to the letter grade. You spoke at length about the graduation rate but not necessarily about the achievement gap. You lost three points because of the large gap. And so looking at that and looking at the math performance -- and you've spoken about some of the things that you are going to be doing and have already put in place. I'm just, I guess, more interested in what you're doing to specifically target your TAGG and how you are -- I mean, you have talked about and I read about you have Ruby Payne; you've also talked about Harry Wong for discipline, because that was one of my major concerns.

MR. PRINCE: Yes, ma'am.

MS. BARNES: I know that I'm saying several things, so I'll just -- let me go ahead and talk about it a little bit and then you can address any -- or anyone can address the concerns that I'm talking about.

So, you know, as far as your minority population, I am going to ask about how many minorities you actually have. Because in the

discipline data I was very concerned when I noted that it's basically two-to-one with respect to discipline infractions or sanctions for African American students compared to the Caucasian population. And so I was wondering if there's diversity training, cultural sensitivity with respect to teacher preparation training. I know that you also talked about your new teachers coming in, but I was wondering how often do the returning teachers have exposure to, you know, a refresher training? And so I guess more than anything my concerns have to do with -- you've spoken of the quality of teachers and having done some sincere review of whether or not teachers needed additional assistance or if they just needed to find somewhere else to find a vocation because of the impact on the learning environment. looked at your 2014 ESEA status report and I looked at your 2015, and I do see where you are making some progress there. But, again, I'm looking also at the struggle. And so, I mean, you know, you can talk to me a little bit about --

MR. PRINCE: Sure.

MS. BARNES: -- what you're doing with respect to trying to close the achievement gap, how you're addressing meeting individual needs of students, and

making sure that teachers are comfortable working with minority children, as well as those who may have a lot of other concerns more than academic, the Whole Child. And I did read a lot about what you're doing. So, again, I'm not -- I hope I don't sound dismal because I appreciate all of the work and I'm very familiar with the district and the work that you're doing. But I am concerned --

MR. PRINCE: Right.

MS. BARNES: -- when I see a pattern.

MR. PRINCE: Absolutely.

MS. BARNES: So can you help me with a little bit of that?

MR. PRINCE: Yes, ma'am. Yes. I'll start with the diversity, the diversity concern that you have. Absolutely, you're right. I will say this, our staff, our current staff does mirror our school levels. We are about 10 to 11 percent African American and then 85 -- 80-something percent white and then -- so our staff does mirror that, so that does help with some of that. But when we got the data and we got the rebuttal questions back, we started -- yeah, it really does, it really does. And so that really made us be more thoughtful in terms of when we started analyzing that data and some things

what do we need to do.

One thing we're going to consider looking at is a diversity audit just to kind of help us dig better and analyze more of our data and what is it that we can do in terms of strategies to help reach all of our students better and making sure that we're paying attention to all of our students too. Obviously, our school based health center has been a big help to help us with some of those other issues that you're referring to, especially with our mental health. We have a very good partnership with our mental health provider and she does an excellent job helping our students with strategies and different things in terms of therapy. So that has been a really good help. We do offer, of course, some different things in terms of response to intervention that we have onsite to help any kind of way to help with our achievement gaps. And we offer a math lab, which is math tutoring during the day. We offer a writing center, which is writing and English tutoring during the day; afterschool tutoring. We also use APEX, which is our credit recovery tool. We have alternative learning environment for those students who need that extra support, and we do have a few students that are getting that extra support through

	57
1	their action plans and through alternative ed.
2	education. We do use behavior plans when needed for
3	students and to help support them and to help give
4	them strategies to better to be and feel more
5	successful. We do use Reading Plus as an
6	intervention strategy for to help with that
7	achievement gap also.
8	But to go back to the diversity, we just really
9	wanted to be more thoughtful after we saw the data,
10	to find ways that we are addressing that problem,
11	that perceived problem, to make sure that we are
12	educating every child and educating the Whole Child.
13	MS. BARNES: Right. And thank you.
14	MR. PRINCE: And there is some upcoming summer
15	PD at our local co-op that should also address some
16	of those concerns that we've already looked into.
17	MS. BARNES: I appreciate that. And, again,
18	when I speak of minorities I'm not just speaking of
19	African American.
20	MR. PRINCE: Absolutely.
21	MS. BARNES: And I know that you have small
22	numbers of other ethnicities.
23	MR. PRINCE: Right.
24	MS. BARNES: But I'm also you know
25	primarily I am concerned about your TAGG which would

	58
1	be
2	MR. PRINCE: Yes.
3	MS. BARNES: your economically disadvantaged
4	
5	MR. PRINCE: Absolutely.
6	MS. BARNES: and your students with
7	disabilities.
8	MR. PRINCE: Yes. I would
9	MS. BARNES: And English Learners.
10	MR. PRINCE: Right. Can I say something about
11	the students with disabilities and
12	MS. BARNES: Yes.
13	MR. PRINCE: We ran and I may have to ask for
14	a little help here. But we did run an open-response
15	strategy and we got the data back on that from those
16	test scores. We saw a nice improvement among our
17	special ed. population on open responses, and that
18	data is in your packet.
19	MS. BARNES: Okay.
20	MR. PRINCE: And I also want to talk a little
21	bit about how we measured growth for our students,
22	because obviously ESEA measures did they pass or not.
23	MS. BARNES: Yeah.
24	MR. PRINCE: So with our TAP system we use
25	value-add, and value-add is a mechanism that doesn't

look at can they pass the test; it looks at what kind of growth are these students -- what kind of growth is happening with these students for that course of a year. And that is on a scale of 1 to 5, with 3 being those students are demonstrating one years of growth in one school year. And so I would like to proudly say that over the last five years of using TAP the school-wide value-add scores for our students has been a 3, with the exception of one year it's been a 2. So our students are demonstrating one years of growth in one year of time, but it just may not always translate to them passing the test.

MS. BARNES: Right. Yeah.

MR. PRINCE: But we are seeing growth through that value-added model and obviously through the use of our strategies. We just may not always see it translate to the test scores.

MS. BARNES: Exactly.

MR. PRINCE: Yes.

MS. BARNES: And I do understand that. That's why I was glad to hear that you are looking at multiple measures.

MR. PRINCE: Yes, ma'am.

MS. BARNES: I also am, you know, excited, I guess, about our board, our State Board understanding

1	that we are all concerned about growth, as well as
2	performance. And so I think even based on what you
3	just said hopefully the upcoming results will mirror
4	the
5	MR. PRINCE: Yes. We would love to be a 4 or 5.
6	We might have a big party if we got a 5.
7	MS. BARNES: Well, if you get a 5 I've got to
8	tell you I would hope that other people would
9	communicate with you and find out what you're doing
10	
11	MR. PRINCE: Yes, ma'am.
12	MS. BARNES: to have those successes. So I
13	appreciate that.
14	MR. PRINCE: Thank you.
15	MS. BARNES: I did have a question about
16	waivers, but I can wait on that.
17	CHAIRPERSON COFFMAN: Go ahead.
18	MS. BARNES: Huh?
19	CHAIRPERSON COFFMAN: Go ahead.
20	MS. BARNES: Okay. Dr. Saunders, this is
21	usually your role. But I did notice you asked for a
22	waiver for teaching one unit of PE. And I think what
23	I read was that it will that you will teach a
24	maximum of .5 or allow for a maximum of .5 credit
25	with athletics. And since I guess my question is

about this particular waiver, since athletics can already count through approval toward meeting the .5 graduation requirement but the district is required to teach one unit of PE, with the waiver does that mean that you're asking not to have to teach one unit of PE? And what happens for those students who are not in athletics --

MR. PRINCE: Right.

MS. BARNES: -- with respect to physical education? And why would it be necessary?

MR. PRINCE: Right. So maybe -- I think our description may be a little bit foggy there, so let me help clarify. We would like the waiver -- and you can get the waiver. Obviously, we can do that with I think a course approval.

MS. BARNES: Course approval.

MR. PRINCE: Yes.

MS. BARNES: Yes, sir. Yes, sir.

MR. PRINCE: But we wanted to go ahead and just ask for the waiver for the same thing. But our goal is for those students who are in athletics, for that to count as half of their credit of PE. And, of course, any students who are not in athletics they're still going to be offered and they'll still have their PE and they'll still run through all that. But

1	we wanted to make sure those athletes who have that
2	athletic period have a little flexibility in their
3	schedules in terms of taking some more electives.
4	Because if they are an athlete throughout high school
5	they have that athletic period and so that kind of
6	cuts out an elective for them. So having that PE,
7	which is a requirement for those students, helps, but
8	it also hopefully is going to open up some ability
9	for them to take some other
10	MS. BARNES: Right.
11	MR. PRINCE: other electives.
12	MS. BARNES: And I get that for athletes. And
13	like I said
14	MR. PRINCE: And we do have other PE courses.
15	MS. BARNES: I see that also.
16	MR. PRINCE: Yeah.
17	MS. BARNES: So when you say a waiver because
18	you asked for a waiver of the rule for the one-and-a-
19	half units of health and PE, except I'm assuming you
20	didn't want to waive the health.
20 21	didn't want to waive the health.  MR. PRINCE: No.
21	MR. PRINCE: No.
21 22	MR. PRINCE: No.  MS. BARNES: But you're asking to waive the full

teach one unit. Students can get up to one unit to graduate, but they only need a half unit and that's why I was trying to determine why you needed a waiver for the whole one unit of PE to be taught if you were just talking about the athletes, to count their physical education.

MR. PRINCE: Yeah. I think it was just maybe a miss-wording. But really our goal was there to be able to use it for athletics, for those students.

MS. BARNES: Okay.

MR. PRINCE: But obviously we'll still have our typical PE offerings and all that.

MS. BARNES: So is there a reason to waive that?

I mean, I don't hear it.

MR. PRINCE: Right. Right. Well --

MS. BARNES: I'm concerned. I guess my concern would be if you waive the full unit of physical education that's required to be taught, even though you may be teaching some PE, at some point it may be that you don't teach a full unit and there may be a student who would like a full unit towards their graduation. The athletes would already get through approval the .5 that's required for graduation. But what would the others get if over time it just fell off because you don't have to teach it?

	64
1	MR. PRINCE: No. They still have to teach it.
2	MS. BARNES: But that's why I'm asking about
3	that waiver.
4	MR. PRINCE: Okay. I think I'm confused.
5	MS. BARNES: I know. I believe Mr. Walter would
6	like to
7	MR. WALTER: May I address the Panel?
8	CHAIRPERSON COFFMAN: Yes.
9	MR. WALTER: Thank you, Madam Chair. Tripp
10	Walter, staff attorney, Arkansas Public School
11	Resource Center. I just and Mr. Prince can help
12	me out here my understanding is this, that
13	apparently that the district has asked for this
14	waiver really out of an abundance of caution to make
15	sure that what they were planning to do was
16	acceptable and any approval they needed from the ADE
17	to do so they would get through this process. I
18	understand there's a separate process for course
19	approval in the standards, but I think that was kind
20	of the genesis of the idea. My understanding is this
21	is in no way an attempt to back off of either the one
22	unit requirements for PE in total or the half unit of
23	health and safety.
24	MS. BARNES: Okay. And I did note that it
25	specifically said physical education. I'm just

uncomfortable with a waiver of the one unit when there's already a mechanism to do what is specifically asked for in here.

MR. WALTER: Well, again, I'd reiterate it's definitely not an attempt to retreat from the one unit.

MS. BARNES: Yes, I understand that. I just -sometimes over time things get -- you may not be
there or you may not remember, the superintendent may
not be there, and that happens.

MR. PRINCE: Right.

MS. BARNES: Get a new principal sometimes and, "Well, we don't have to do this," so it gets pulled out of the schedule. So, I mean, that's my concern.

MR. PRINCE: Yeah.

CHAIRPERSON COFFMAN: Ms. Pfeffer.

MS. PFEFFER: So, and I had a question when I read that as well. So I think what I was thinking maybe the intent is that if athletes who maybe would be enrolled in basically an athletic period every year for their entire high school career, the athletic -- the person in athletics, the coach that's in the athletics may not be a certified PE teacher. And, therefore, if they're enrolled in the athletics for that full-time and they're only getting the

1	athletic credit that's a non-PE counting for is
2	that was that at all part of that? Because that's
3	what I was wondering, whether or not you wanted to
4	basically substitute that for a PE credit. That's
5	what I wondered when I read the waivers.
6	MR. PRINCE: Yeah. We
7	MS. PFEFFER: So is that the intent or not?
8	MR. PRINCE: We are looking to substitute the
9	athletics for the PE. Yes.
10	SUPT. WILSON: Just for the athletes.
11	MR. PRINCE: Yes.
12	MS. PFEFFER: So is that different from what
13	Annette was thinking?
14	MS. BARNES: No. I mean, what you said is
15	different from what is here. I guess what I'm saying
16	is I know that you're asking to substitute
17	MR. PRINCE: Yes, ma'am.
18	MS. BARNES: athletics. I thought that's
19	what I was reading. And that can be done. It
20	happens all the time. Coaches, if they are teaching
21	or coaching football, basketball, any of the major
22	ones, they would already have basically the required
23	licensure
24	MR. PRINCE: Right. Yes.
25	MS. BARNES: to teach a PE class. So the

	67
1	certifications didn't enter into it for me; licensure
2	didn't enter into it. What entered into it for me
3	was it removes the requirement to teach the unit of
4	physical education.
5	MR. PRINCE: Yeah.
6	MS. BARNES: And
7	MR. PRINCE: That's not our intention.
8	MS. BARNES: I know that's not your
9	SUPT. WILSON: Yeah, that was not our
10	MS. BARNES: I didn't think that was your
11	intent.
12	MR. PRINCE: Yes, ma'am.
13	MS. BARNES: That's why I was asking
14	MR. PRINCE: Absolutely.
15	MS. BARNES: is the waiver absolutely
16	necessary.
17	SUPT. WILSON: We were strictly looking at the
18	fact that those athletes have five
19	MS. BARNES: Yes, ma'am.
20	SUPT. WILSON: periods I mean, five units
21	of athletics
22	MS. BARNES: Right.
23	SUPT. WILSON: over or six units,
24	whatever, but over I guess over 9 through 12 is
25	four. But those are the same students that would

	68
1	take it three times a day
2	MS. BARNES: Oh, I understand.
3	SUPT. WILSON: if we would allow it.
4	MS. BARNES: I understand.
5	SUPT. WILSON: So I guess we were kind of
6	looking at it as, "No, you've already got your PE
7	class." And we were strictly looking at it for the
8	athletes, not for
9	MS. BARNES: Right.
10	SUPT. WILSON: the rest of the student body.
11	MS. BARNES: And I don't know that I don't
12	someone would have to help me. I don't know that it
13	could just be waived for athletes. That's my thing.
14	It would be waived period. That's what was
15	concerning.
16	SUPT. WILSON: Right. Well, the course approval
17	is that what you were saying, the course approval
18	will actually give us that same ability?
19	MS. BARNES: It would give you the same ability
20	
21	SUPT. WILSON: Without
22	MS. BARNES: to give them a half unit of PE
23	toward graduation.
24	SUPT. WILSON: Without and so I think, really
25	and truly, we were thinking if we do this

	69
1	MS. BARNES: Yes, ma'am.
2	SUPT. WILSON: do they need to know that.
3	MS. BARNES: I understand that. I think that's
4	part of why they have me up here
5	SUPT. WILSON: Okay.
6	MS. BARNES: to talk about those things that
7	give me pause.
8	SUPT. WILSON: Yeah.
9	DR. SAUNDERS: It's already waived.
10	CHAIRPERSON COFFMAN: Explain that, Dr.
11	Saunders.
12	DR. SAUNDERS: Well, your question was
13	concerning certification. Correct?
14	CHAIRPERSON COFFMAN: That was Ms. Pfeffer's
15	question.
16	DR. SAUNDERS: Okay. I thought that's what I
17	heard you say.
18	MS. PFEFFER: I was just clarifying the way I
19	or what I thought that they were asking for, is what
20	I was doing. I wasn't trying to put words in their
21	mouth. So I just wanted to make sure because I got
22	confused after Annette asked her question.
23	DR. SAUNDERS: And just to clarify on that, you
24	do have a waiver from teacher certification and
25	qualified teachers in the classroom existing already,

	70
1	so that is totally separate
2	MR. PRINCE: That would cover that.
3	DR. SAUNDERS: and already in place.
4	MR. PRINCE: Absolutely.
5	CHAIRPERSON COFFMAN: Ms. Smith.
6	MS. SMITH: So I would encourage you to submit a
7	course approval to my unit for PE with the PE
8	certification and we'll be happy to assist you.
9	MR. PRINCE: Yeah, we'll do that.
10	MS. BARNES: I appreciate that. It just makes
11	me feel a little bit better.
12	MR. PRINCE: We will definitely do that. Yes,
13	ma'am.
14	MS. BARNES: So I appreciate your indulgence and
15	patience with me.
16	MR. PRINCE: No problem.
17	CHAIRPERSON COFFMAN: Dr. Saunders.
18	DR. SAUNDERS: Yes. I want to first start off
19	by telling you that I really I honor what y'all
20	have done because I think y'all started early on
21	innovation and tried some things that no one had
22	tried before. And I think that's courageous and I
23	think you've really disrupted the classroom in a
24	positive and respectful way when I say that. I think
25	as we look at doing things different we have to be

careful and look at what are the results. And I know that y'all have made a lot of changes that really changed a lot of things within the environment. And I think when you have major changes like you have done I think the implementation dip, the time of the implementation dip can be longer than it can be for other things. And so I respect that and I honor that and I think that many people have learned from what other people do first, and I hope we continue to do so.

So as we're at this point in the process I'm really concerned about in particular the math scores. And is this a result of the implementation dip? How long will it continue? Or are the waivers that are given, are those the result that -- without those waivers would the math scores be higher? These are things I'm weighing in my mind and, you know, trying to balance because ultimately how the students perform academically is our goal, what we're trying to do and how we're trying to prepare them for life. So that's really weighing on me heavily and I just want to turn it over to you.

MR. PRINCE: I don't think the waivers are having a negative impact on that. I think that -- you know -- we talked previously about some different

2

things, the teacher turnover, the implementation of all the different things at once. I would like to go back to some of the training that we talked about. think that's going to help with the math. We don't teach math in a combined class. Math is a standalone course, so that's another thing that we're going to make sure stays that way. We're not going to combine it or do an integrated course with the math and something else. It will stay a math standalone. Ι think we're going to see an increase in scores, especially with the changeover to ACT Aspire, and hopefully we'll keep ACT Aspire. That way, we can have longevity in data and longevity in planning things from that data to help improve that. that answered your question.

DR. SAUNDERS: It does. And just, you know, one thing on a side note, as I look at the waivers and look at some of the plans that you're doing, you have the freedom to do lots of things that you want to do and I know that you have integrated fine arts into courses. Yet, looking at some of the athletics or the PE things -- and I want to I guess encourage you to be careful. It's been proven time and again how many times those subjects, while they are not the individual assessment subjects, those improve those

areas as well, and so that those are not looked over and those are enhanced and help --

MR. PRINCE: Yeah.

DR. SAUNDERS: -- on the math and literacy side as well.

MR. PRINCE: Well, with the fine arts we obviously still have all our art class offerings and everything. I think that waiver may have been a part of the integrated classes because we do have English and one fine arts class taught together to help merge some of those because it's a natural fit.

better word, we did play around with combining classes. We had an "algebrysics," and algebra/physics class; figured out that was a disaster. But, you know, we went through some things that hurt our kids, we really did, and now we're repairing those things that we did. But we found out real quickly, you know, we're not going to put our math classes with anything else. They've got to get those skills and it can only be in that class. And we figured out that big projects, like I said before -- we figured out a lot of mistakes. I mean, we know where we've made our mistakes. Now we've got to get on track with what we're trying to get done right.

DR. SAUNDERS: Well, I honor you for being willing to make those mistakes because I think that's how we grow and learn.

SUPT. WILSON: Yeah, they really hurt though.
CHAIRPERSON COFFMAN: Any other questions?

I would just take a moment to say I certainly appreciated my recent visit to your school, had a great time conversing with the students, and was just certainly impressed.

One of the points that I would like to make public today, Mr. Prince, is our conversation about your really deep-dive into your data and recognizing the areas that you need to improve on. And we walked through your cluster room and I saw those charts where your teachers were really analyzing to see what they needed to work on to help students grow. conversation too was about sharing those lessons learned with K-6, because many times the foundational skills are built in the primary grades that may not show up on your assessments at that time but they'll show up in middle school, high school. So it takes some really good digging to find out where the foundations need to be repaired. And so would you talk just briefly about how you're collaborating with the K-6 and how this work is being handled districtwide?

MR. PRINCE: Yeah. TAP is our main avenue to do I was the K-6 principal for six years and we that. saw some great gains with our strategies in different And one of our master teachers has now moved up into the principal position. And we actually spoke just recently about the word study research and about how that 6-8 is a very pivotal year in actually getting some real foundations in that word study that goes far beyond, you know, the phonetic connections and those different things, and she was very onboard with starting that process. We have a lot of good things at the elementary school in terms of building those reading and literacy foundations and even math foundational skills. So we work really close together on that and I think we're going to see great things with that, with that partnership with us, with me and her.

CHAIRPERSON COFFMAN: I think that's very admiral. I would really encourage you to -- as you're digging through your math data, you have to go beyond the data sometimes. And I'll give you just a personal experience really quickly. I worked in a school and we kept seeing a problem show up on our math scores in 5th and 6th grade. And we dug through

it and dug through it and realized that's not where
the problem was occurring. Even though the 3rd grade
test scores were awesome, there were some instruction
that was going on in 3rd grade that was undermining
what started to happen in 5th and 6th grade when the
math got more challenging. And so once we were able
to repair that we saw the change in math scores at
5th and 6th grade. So it can be very subtle just to
have one little weak link in the instruction that is
causing problems further down the road when math gets
more challenging.
MR. PRINCE: We've actually seen that, so I
definitely see that for sure what you're saying.
CHAIRPERSON COFFMAN: That's great.
MR. PRINCE: Yeah.
CHAIRPERSON COFFMAN: Keep up the great work.
MR. PRINCE: Thank you.
CHAIRPERSON COFFMAN: Any other Ms. Pfeffer,
you have another comment?
MS. PFEFFER: Or just a question and it's Ms.
Boyd or one of the attorneys may be better able to
answer this. The renewal application is asking for a
10-year renewal. What do we just I guess a
historical perspective in terms of renewal, is 10
years typical or is 5, 10, more? How many do we have

	77
1	
2	MS. DAVIS: Actually, for a district conversion
3	you can only grant it for up to five years. So you
4	can do it for one or anywhere up to five.
5	MS. PFEFFER: Okay.
6	MS. DAVIS: So
7	MS. PFEFFER: That answers my question.
8	CHAIRPERSON COFFMAN: Any other questions or
9	comments?
10	Ms. Davis, are there any remaining issues
11	regarding the request?
12	MS. DAVIS: The only remaining one is can we
13	just get the applicant to confirm that you are going
14	to withdraw your waiver request
15	MR. PRINCE: Yes.
16	MS. DAVIS: in lieu of the course approval
17	process?
18	MR. PRINCE: We will do the course approval.
19	Absolutely.
20	MS. DAVIS: Okay. No, that was it.
21	CHAIRPERSON COFFMAN: Then I'll accept a motion.
22	DR. SAUNDERS: I'd like to make a motion to
23	approve the renewal for three years.
24	CHAIRPERSON COFFMAN: Is there a second?
25	(BRIEF MOMENT OF SILENCE)

	78
1	CHAIRPERSON COFFMAN: Motion dies for lack of a
2	second.
3	Is there an alternative motion?
4	MS. PFEFFER: Can we have discussion for a
5	moment?
6	CHAIRPERSON COFFMAN: Sure.
7	MS. PFEFFER: Okay. I guess my and I
8	probably should
9	CHAIRPERSON COFFMAN: We're here for you.
10	MS. PFEFFER: I should have asked before the
11	motion died. The three years, can you elaborate a
12	little bit on why you would do the three years
13	instead of five? And I'm assuming five then is
14	anywhere from one to five. Okay.
15	DR. SAUNDERS: Yes. My thoughts on it, as
16	opposed to the five, was looking at the math scores
17	in particular and the literacy scores and trying to
18	evaluate those before it's too late. And with the
19	changes, making sure that the changes are positive
20	and that we see a positive effect of that, I don't
21	want to wait five years before we have a chance to
22	evaluate that again. And so that was my thought
23	process.
24	CHAIRPERSON COFFMAN: I'll accept a motion.
25	MS. PFEFFER: I guess just okay. Continuing

my thought process here, I guess part of mine was 1 looking at -- initially, I thought the request was 2 for 10 years because that was what was in their 3 So my thought had been -- I thought 10 4 application. 5 years was too much time because of the current outcome data that we have. The things that I see in 6 7 the application that are very strong is the improvement in the percent of students who are 8 9 enrolling in two- and four-year institutions. 10 think it will be interesting to follow-up how many 11 are successfully completing a two- or four-year degree and how many continue to enroll is based on 12 13 their College and Career Access. I also think that the leadership here today, I feel like they do have 14 15 some solid plans in place. And so I do agree that --16 I did have concerns in how everything matched up when we look at these multiple measures. While there 17 18 seems to be some really positive trends, and based on their honest assessment of where they are and where 19 they need to improve, I would feel comfortable with 20 21 the five years, knowing though that we've got a lot 22 of transitions in moving forward. And we're going to 23 have to be looking at a lot of data over the next 24 five years. But that's just some discussion out 25 there.

	80
1	CHAIRPERSON COFFMAN: Dr. Gotcher.
2	DR. GOTCHER: Yes. If I could add a comment,
3	Dr. Saunders, I certainly was concerned as well and I
4	saw the 10-year and I was actually going to
5	discuss the 10-year as well. But based upon the
6	leadership model that I'm seeing and based upon some
7	of the things that Mr. Prince has said regarding the
8	school leadership team and the cluster teams, I'm
9	confident that a 5-year renewal would be appropriate
10	for this institution.
11	And so, if I may, I'd like to make a motion that
12	we consider the renewal for a 5-year term period. Is
13	that possible?
14	CHAIRPERSON COFFMAN: We have a motion from Dr.
15	Gotcher for a 5-year.
16	MS. SMITH: I second it.
17	CHAIRPERSON COFFMAN: Second from Stacy Smith.
18	Any discussion?
19	All those oh, I have to do a roll-call. I'll
20	make a roll-call. Ms. Liwo.
21	MS. LIWO: I'm for it. Yes.
22	MS. BARNES: Do we write in here
23	CHAIRPERSON COFFMAN: Pardon me?
24	MS. BARNES: Don't we write
25	CHAIRPERSON COFFMAN: No.

response. And just for the public to know, all panel

25

members include a written response that goes to our 1 State Board for consideration. Ms. Barnes. 2 MS. BARNES: I voted for the renewal because I 3 believe the school is implementing sound 4 instructional practices. And if the current measures 5 in place to address the deficits are put forth with 6 7 integrity, positive results will occur. CHAIRPERSON COFFMAN: Dr. Gotcher. 8 9 DR. GOTCHER: I voted for. I believe the school 10 leadership teams are solid and further, along with the capacity for sustainable student leadership, I 11 12 found that most impressive. I feel strongly that a 13 legacy model of education is being formed with continued support and accountability. 14 15 CHAIRPERSON COFFMAN: Mr. Lester. 16 MR. LESTER: I voted for. Going forward, I

MR. LESTER: I voted for. Going forward, I believe the charter has a plan in place to improve on the concerns that the Panel has presented today.

CHAIRPERSON COFFMAN: Ms. Liwo.

17

18

19

20

21

22

23

24

25

MS. LIWO: I voted for. CCHS has recognized that they have problems but they've done their research, they've brought forth plans that they think will make their situation turn around, and I think five years is sufficient time for us to determine whether they are -- whether they'll be successful or

1 not. CHAIRPERSON COFFMAN: Ms. Pfeffer. 2 MS. PFEFFER: I voted in favor of the motion. 3 The district is demonstrating plans for moving 4 5 forward and does have evidence of progress towards meeting goals to prepare students in terms of college 6 7 readiness. The district will need to continue to 8 monitor outcome data on student performance for 9 multiple measures to make sure that they are in line, 10 particularly focusing on the graduation rate and math 11 and literacy scores. 12 CHAIRPERSON COFFMAN: Mr. Rogers. 13 MR. ROGERS: I voted for. Along the same lines as everybody else on the Panel, I think that the 5-14 15 year renewal will allow the leadership to have time to show evidence of success or not. 16 CHAIRPERSON COFFMAN: Dr. Saunders. 17 18 DR. SAUNDERS: I voted for. I think this will give time for the new changes to show improvement. 19 20 And I do have concerns over the math and literacy 21 scores. 22 CHAIRPERSON COFFMAN: Ms. Smith. 23 MS. SMITH: I know -- I voted in favor. 24 questions regarding concerns with math and AP were

I also felt like the students could

answered.

25

	84
1	articulate the actions of the school within their
2	presentation.
3	CHAIRPERSON COFFMAN: Congratulations to the
4	Cross County School District, New Tech High. You
5	have a 5-year renewal.
6	SUPT. WILSON: Thank you.
7	MR. PRINCE: Thank you.
8	CHAIRPERSON COFFMAN: You're welcome. Great
9	job.
10	DR. SAUNDERS: I think the students did it for
11	them, so they need to thank the students.
12	SUPT. WILSON: I guess you know that in the car
13	coming down one of the students says, "If we get
14	this, could we have dessert when we have lunch?"
15	MR. PRINCE: The answer is yes.
16	CHAIRPERSON COFFMAN: They deserve dessert.
17	SUPT. WILSON: Absolutely.
18	CHAIRPERSON COFFMAN: Absolutely.
19	SUPT. WILSON: And yes, I will let them have
20	dessert today.
21	CHAIRPERSON COFFMAN: Absolutely. Great job.
22	DR. GOTCHER: Yeah. I would charge it to Dr.
23	McClure's credit card, if you could.
24	SUPT. WILSON: Absolutely. Absolutely.
25	CHAIRPERSON COFFMAN: Thank you, Ms. Wilson.

	85
1	I see that Representative Gossage has entered
2	the room. Would you like to speak to the Panel?
3	REPRESENTATIVE GOSSAGE: No. Just want to say
4	hi.
5	CHAIRPERSON COFFMAN: We're always happy to see
6	you.
7	REPRESENTATIVE GOSSAGE: Thank you.
8	CHAIRPERSON COFFMAN: We'll take a 10-minute
9	break and come back for action item 2.
10	(BREAK: 10:15-10:30 A.M.)
11	A-2: REQUEST FOR OPEN-ENROLLMENT PUBLIC CHARTER SCHOOL
12	RENEWAL: IMBODEN AREA CHARTER SCHOOL
13	CHAIRPERSON COFFMAN: I think we're if we're
14	ready to resume, action item 2, Ms. Boyd, you're
15	recognized.
16	MS. BOYD: Thank you, Madam Chair. Request for
17	Open-Enrollment Public Charter School Renewal,
18	Imboden Area Charter School. The State Board of
19	Education approved the application for Imboden Area
20	Charter School on March 11, 2002. The charter is
21	approved to serve students in grades K-8 with a
22	maximum enrollment of 150. Representatives of the
23	Imboden Area Charter School are appearing before the
24	Charter Authorizing Panel to request a 10-year
25	renewal of the charter. From the charter we have

Judy Warren, the director, will be the first person to speak to you.

CHAIRPERSON COFFMAN: If all representatives from the Imboden Area Charter School and anyone speaking in opposition would please stand, raise your right hand. Do you swear or affirm that the testimony you're about to give shall be the truth, the whole truth and nothing but the truth?

(ALL SPEAKERS ANSWERED AFFIRMATIVELY)

CHAIRPERSON COFFMAN: Thank you. Ms. Warren, you're recognized.

MS. WARREN: Good morning, Members of the Panel.

I'm Judy Warren; I'm the director of the Imboden Area

Charter School. I -- do we have our presentation?

Oh, okay. Sorry. I'm sorry.

CHAIRPERSON COFFMAN: Ms. Warren, if you'll get very close to the microphone.

MS. WARREN: Okay. All right. IACS has the distinction of being one of the oldest charter schools in Arkansas, of 14 years. We are the smallest school in Arkansas, with a population that ranges from 50 to 75 students each year, and our demographics are significantly different from any other school in Arkansas. Imboden Area Charter School is denoted by the heart on the map and it lies

25

along Highway 63 at the center of Imboden, which is a rural community in northeast Arkansas, about 45 miles northwest of Jonesboro. The blue pentagon-shaped outline on the map represents the large surrounding area from which IACS has historically drawn its students, the farthest points on the map being Warm Springs to the north, Swifton and Bono to the south, Paragould to the east, and Hardy and Cave City to the The black line on the map represents our bus west. route that runs through 10 different communities. With the majority of our students being disadvantaged, transportation is a necessity for them. We run about a 50-mile loop and transport approximately 90% of our students each year. We own two buses to quarantee that our bus service will not be disrupted and also we use them for extended-day field trips.

IACS's focus is to provide a high-quality education that is tailored to the individual needs of the students. One-hundred percent of our teaching staff is fully certified and highly qualified with experience. We serve USDA reimbursable state-approved breakfast and lunch, with fresh fruit and vegetables daily. We had our child nutrition review last year and had no violations. This year we have

begun an afterschool extended learning program for students who are below level in reading and math, and teachers have seen a significant improvement in student achievement. And our small and inviting atmosphere encourages our parents to be active in the learning of their children. Our facility is leased through a private individual from the Imboden community, and it's approximately 3200 square feet and houses our four large multi-age classrooms and our school offices. We also have a large playground area with an open playing field and equipment where students can play and participate in our daily cardio workout for grades kindergarten through 8th grade.

Parents play an important role in the life of our school and 100% of our parents have attended both parent/teacher conferences yearly. In the parent surveys, 100% of the parents believe that the staff and the teachers are always willing to communicate with them and they tell us they have never felt so welcome at a school. The parents take ownership in the school and 90% of them and their extended families volunteer and help in areas in which they feel competent. At the end of each school day, parents routinely call us or gather in the school offices just -- sometimes just to visit with us, and

this has created a vital relationship with them.

They now trust us, they trust our knowledge and our advice, and they feel comfortable discussing the ways in which they can help their children succeed.

Our demographics are unique to any school in Arkansas, which makes test score comparisons almost impossible. There are schools in Arkansas who do have a high percentage of disadvantaged students, but IACS has a far higher percentage than any area school in the state average. Now on the slide that -- if you can go back to that last one -- on the slide you'll see that there are two numbers under the enrollment section. The beginning number notes the beginning enrollment; the end -- the last number notes the ending enrollment for the school year. in 13-14, we started the year with 46; we ended the year with 66. And there were some coming and going that would account for even more total students than that. Because our population is so disadvantaged, they are very highly mobile and so that demonstrates Right now we have 49, as of today, and I just keep getting calls daily and this is traditional for us.

No school in the state though has the percentage of special education students that IACS has. This

1 graph shows the comparison data for the past three years between the state average, Sloan-Hendrix, and 2 The blue bars indicate the percentage of 3 IACS. disadvantaged students and the orange bar is special 4 education students. At this time we are at an all-5 time high of 40%. Almost all of these students come 6 7 to us already identified. We refer very few students to special education. And many of these students 8 9 have been in self-contained classrooms and we place 10 them, which they're -- with their peers, which is the least restrictive environment, with some pullout 11 12 One student came to us in 2nd grade from a 13 self-contained classroom with a normal IQ and a medical diagnosis of ADHD. He did not know any 14 15 letters or any numbers. Now he is a 5th grader; he's 16 reading at the 4th grade level; he interacts normally 17 with his peers. However, he's not at a level yet to 18 do very well at standardized tests. Most special education students we receive are categorized as 19 specific learning disabled, which means there's a 20 21 discrepancy between their IQ and their achievement. And most of these students have a normal IQ but 22 23 because of their situations or their environments 24 they become lost academically, and some were referred 25 for special education. Many times, when we think

2

18

19

20

21

22

23

24

25

about special education we may think about students who are intellectually disabled. We currently have only one student who is intellectually disabled; most of the rest of them are specific learning disabled. In October of this year, we had our monitoring visit by the state special education unit and our special education program was fully approved and we had no violations.

The next graph shows statistics less likely to be considered and that is the number of homeless and foster children who attend IACS. The state has an average of 2% homeless and Sloan-Hendrix slightly above 0%, compared with IACS who has 13% homeless. Foster student average for the state is slightly above 0, Sloan-Hendrix has about 1.5%, but IACS has about 10%. With this unique population we provide a need satisfying environment, trying to erase some of their concerns about survival needs. Over the years staff members have bought numerous coats, shoes and clothing items for students without. A teacher came to me for help one day with two little girls who were sisters who tended to stay in the bathroom much longer than was necessary. I told them to call me the next time she sent them to the restroom and when I watched at the door I saw them each at a sink; the

1 water was running, all the way open, soap applied to their hands, their arms, their faces, and they were 2 both washing and laughing. And I told them their 3 teacher was waiting for them and they needed to go --4 5 wash more quickly and get back to the classroom. Later that day, I found out they did not have running 6 7 water in their home. They were then allowed to wash and play in the water. And learning comes in many 8 9 forms. We also have a highly mobile population. 10 Many of our students are used to moving from place to 11 place and school to school. Maybe they are not able 12 to pay their rent; some are escaping law enforcement 13 agencies, moving between the three counties in our area; and some have violent or unstable relationships 14 15 at home. And while we have them at least we provide acceptance and a stable environment. 16 Many students do not have the social skills or the name-brand 17 18 clothing to be accepted by their peers. And because of their environment -- or because of our 19 environment, students at IACS are never made to feel 20 21 inferior by others. And because of their 22 socioeconomic status their lack of general world 23 knowledge hinders their ability to connect to others 24 and to new information. One student came to us in 25 1st grade with a letter from his teacher.

said that there was definitely something wrong with him; he was either autistic, mentally challenged or He hid under his desk and refused to insane. participate. He spoke to no one. He was the only student who didn't know where the word wall was. was the only student who colored his trees blue. when his mother drove by the school during recess he was walking along the fence alone. That day, she picked him up and she brought him to IACS. graduated in 8th grade. He was highly intelligent, reading and math at high school levels, and he was well liked by his peers and teachers. He's a senior He's working part-time at Wal-Mart and he now. already has scholarship to attend Harding University in the fall. And this is just one story. to address their needs, the learning environment must be flexible and differentiated, yet highly structured while addressing the required standards.

And I'm going to turn the presentation over to Mr. Wells, the assistant director, to explain how the curriculum and the student management systems combine to create a need satisfying environment.

MR. WELLS: Good morning. My name is Matthew
Wells; I'm the assistant director of the Imboden Area
Charter School. In the summer, teachers spend hours

desegregating data on individual students, evaluating curricular programs based on that data, aligning materials with Common Core State Standards, and developing checklists for documentation that each student has met those standards. Language arts curriculum is divided into three sections: whole group, small group, and individualized instruction. Language, vocabulary and writing are addressed through direct teaching in a whole group setting. Informational text, impaired reading aligns precisely with Common Core State Standards and allows the teaching of strategies for reading in the content Because these selections are content area areas. based, they tie into the science and social studies objectives. During read-alouds, teachers model quality reading and teach the elements of literature, along with developing increased vocabulary and comprehension. Our read-alouds are selected mainly of classics that present complex text and require high-level thinking skills for comprehension. example, my 6th, 7th and 8th grade class is currently reading The Odyssey by Homer.

When we look for curricular pieces we look for published programs that come with formal or informal assessments. We then group students within our

classrooms using the results of these assessments. These small groups may be addressing objectives that are below grade level, on grade level, or well above grade level. Students are assessed six times per year using a standardized test and may change groups based on those assessment results. In these small groups we address phonics and word study, spelling, and reading strategies. We use the Accelerated Reading Program for individualized reading practice at the student's current level of reading. During this time the teacher conducts small group reading instruction or simply monitors individual reading progress.

Our math curriculum is also divided into three sections: individual skills, whole group instruction that addresses math concepts, and a review section where grade level objectives are practiced. We use several different published programs throughout our math instruction. Students are tested for basic skills; then the needed skills are organized into an individual student folder where students can work to master those skills. Whole group instruction consists of concepts related to current grade levels and is aligned with Common Core State Standards, such as numbers and operations, geometry, or data

analysis. And then, of course, we review and practice grade level objectives daily.

Science at IACS is a guided discovery hands-on program designed to allow students to learn scientific concepts through inquiry based lessons.

Social studies is aligned to the Arkansas social studies frameworks and utilizes the whole group instructional method to present project-based learning. These projects emphasize a deep understanding of content and its application to the real world.

Even though our curriculum is aligned and tailored to meet individual needs, it would not be successful without our philosophy of student management. It may be difficult, perhaps impossible, to imagine a public school without discipline issues. But because of the way in which we manage students, discipline involving more than a few conversations simply does not occur. The first thing we do is establish a quality relationship with our students. Because we are so small this is relatively simple. This encourages students to respect us and follow school rules.

Our individualized learning program motivates students to learn. This feeling of success breeds an

environment where students are motivated to continually succeed, thus creating intrinsic motivation. A classroom of intrinsically motivated students becomes a collaborative learning environment where students become each other's cheerleaders, rooting each other on to continually succeed. Students are excited to learn and to help others learn, leading to an environment where students are at the center of learning and the teacher plays a mentor role, as described in the Danielson Framework of Test.

Our students enter typically two to four levels behind what they should be, given their current grade level. In one year's time, IACS students make about one-and-a-half years of progress. At the end of their first year, most have not reached grade level and assessment shows this. After one year, only about 50% are proficient. However, within three years at IACS that number has risen to about 70% and then after four or more years proficiency rises to about 80%.

I'd like to draw your attention to the handout we provided this morning. This is a listing of all students and their benchmark proficiencies in literacy and math for the past three years, along

with notations indicating which students were disadvantaged, in special education, or homeless or foster children. We provided scores dating back to 2009 for some students since their ending scores fell within the last three-year period. I would encourage you to look at these scores from left to right and notice the growth, rather than looking at percentage of proficiency for a given year. For example, on the first page, student number 21, the students was disadvantaged, in special education, and a foster child. He or she entered IACS well below grade level but after three years was advanced on the benchmark and in the fourth year was one point shy of matching the state average on the PARCC exam.

CHAIRPERSON COFFMAN: Ms. Warren, your time is up. Do you have a -- is there anyone that would speak in opposition?

(BRIEF MOMENT OF SILENCE)

CHAIRPERSON COFFMAN: Go ahead.

MS. WARREN: Okay. I'm going to quickly address the financial accountability. I wanted to address some concerns about the segregation of duties at IACS as it relates to our financial matters. We have formal organizational structures written into policy and procedural manuals and checklists assist staff in

meeting all of those expectations. Even though we are aware of possible risks in a small setting such as ours, we have segregated duties at several key stages. We've set up controls and restrictions and increased the number of people responsible for supervision. My assistant director has several supervisory responsibilities in key areas, and Mr. McCloud has monitored some areas as well. The board of directors is responsible for making major decisions and they review check registers and fund balances at each meeting. Segregation of duties is the only audit finding we have ever had and each auditor has told us that most small schools in Arkansas receive the same finding.

As a matter of public record, I wanted to address an error in the IACS summary prepared by the State. It is stated that our current fund balance is \$47,000, but it is actually \$100,000 and we have been financially stable for 10 years.

The last concern was the Title 1 application and all required paperwork has been submitted.

I'm going to turn it over to Mr. McCloud who has a few words.

MR. McCLOUD: Good morning. My name is James Michael McCloud; I'm the counselor and also the

certified classroom tutor at the charter school. 1 This is my seventh year as a charter school educator. 2 If I had an opportunity to have a do-over with my 3 career of 46 years, I would adopt the philosophy of 4 the Imboden Area Charter School, Glasser's Choice 5 Theory: self-understanding of students competing with 6 7 one's self and direct parental contact and assist on the individualized learning that encourages learning 8 9 at the student's current level. These are all the things that make for a successful school environment. 10 11 I strongly believe and support the concepts of the IACS because the school serves as a successful model 12 13 of innovative and good educational practices, that if other public schools would implement they could 14 improve the educational environment and performance 15 on a statewide basis. I was not a fan of the charter 16 school concept when I was in the regular public 17 18 school setting. The Imboden Area Charter School should be supported by the state as a school where 19 20 learning is promoted for each student at the highest 21 level possible. After all, is that not the goal of 22 elementary and secondary education in Arkansas? IACS embodies the intended 23 SUPT. WARREN: 24 meaning of the charter school concept in Arkansas. 25 We do not ask for the best and the brightest.

not recruit students. We take those students who come to our door. In an area where people are intensely loyal to their loyal community school, parents do not consider sending their children elsewhere, unless there is a problem and that problem is continued for several years. We use research based curriculum, employ philosophically sound principles, and have a highly experienced staff who works diligently to improve each child's academic potential. Because 95% of all students come to us two to four grade levels below normal, test scores cannot show what differences we have made. all students who come to us are at risk individuals, impoverished, homeless, foster, in special education. In fact, at the present time only three students do not fit into one of those categories. It is clearly evident why they struggle to learn. We instill confidence. We inspire a higher level of learning than others thought possible and see success in all individuals. And when these students leave us they have successful high school careers and many of them attend college and many of them are successful in the workforce.

We are asking for a 10-year renewal this time.
We have developed a highly innovative program and

serve a population that no one else is serving. We face no opposition from the area schools. In fact, students are referred to us at times by their local school district who can see that we're doing a good job. And we realize the difficult task that you face during these renewal decisions. We just ask that you take our unique population into consideration and know that we will continue to strive to meet whatever standards are set by the state. Thank you.

CHAIRPERSON COFFMAN: Thank you, Ms. Warren.

Senator Johnson, did you have additional words?

SENATOR JOHNSON: If I could.

CHAIRPERSON COFFMAN: Yes, please.

SENATOR JOHNSON: I came to speak on behalf of the Imboden Area Charter School, as it is one of our older charters. And they went through this process four times in the 14 years, and I ask that they be given this time. It's all in, you know, just like whenever their accounting came in they do more than one job, and it's all in. And whenever you have to go through this process, like they have every three years, it's constant. And they need a time to concentrate on those students and help -- this -- the charter in this area -- because I was over there at Sloan-Hendrix day before yesterday. It's not an

antagonistic; it's -- they're part of the regional learning team and they can better care for some of this population than the traditional public schools. And I'm a product of the traditional public schools; my mother taught in it for 37 years, and the multiple grade teaching -- I was talking to her last night at my birthday party and she was telling me about whenever she taught at Success, which is near Corning -- she taught 1st through 3rd grade -- and how those -- if she was teaching to those 1st graders, those 3rd graders were helping the 2nd graders, and they all heard it more than once in that classroom. the building of learning that can happen in a small setting like this is what I want to emphasize and would appreciate your renewing them for a 10-year period and a good vote on that. I thank you for your time and God bless your service. Thank you.

CHAIRPERSON COFFMAN: Thank you, Senator

Johnson. I think you'll be pleased to know that

there's a couple of northeast girls on this team.

And, in fact, I recently visited the school and was

very impressed.

SENATOR JOHNSON: Well, I got up at 4:30 this morning to make sure I could be here for them. I got -- well, this is my first time to sit through one of

these. I got a little concerned with the thing in
the middle; I thought that might be for legislative
flogging. But maybe I shouldn't have said that; it
might be a possibility now. But I appreciate your
time and giving me the ability to speak. Thank you.
CHAIRPERSON COFFMAN: We appreciate your
support.
All right. Questions. Who would like to start?
Any questions? Ms. Barnes.
MS. BARNES: I don't know that I have a
question. I, you know, I looked at the responses
and, first of all, thank you all for being here.
It's a pleasure to see you again, Ms. Warren.
SUPT. WARREN: Thank you.
MS. BARNES: I don't know if you remember but I
SUPT. WARREN: I do. I do.
MS. BARNES: I was probably one of the first

MS. BARNES: -- I was probably one of the first ADE people to set foot on the grounds when the charter first started. So I certainly want to state that I understand the trials and I also am pleased to see that the charter is still in operation. Because I recognize it does serve a very special population of students. I do get concerned sometimes because it almost looks like, you know, only a certain group of

students get to come to the school. It's an openenrollment charter and I do understand that. it's commendable that the relationship with the neighboring districts is a good one. So I know you're looking at me, waiting, what's the question. And, actually, I don't have a question. I simply wanted to point out that I do have some concerns just because I don't always know how well the recruitment, the opportunities for others to attend the school comes along. But I'm very familiar with the location of the school; I'm very familiar with the area of the state. And so I'm simply saying that this -- I do appreciate the handout. Oftentimes, as stated, we do look simply at whether or not a student is achieving or advanced or not, and we don't always stop to take time to look at areas of growth and where students So, again, I don't have a question at this are. The questions I had I believe have been time. I was going to ask about the Title 1 answered. application; I do know that it has been submitted. And so I just want to let you know that I appreciate the struggle, but I also appreciate the small successes and the large ones. I would encourage you to make sure that you don't get comfortable because there are many children who may also be able to

benefit from the services at the school.

SUPT. WARREN: Thank you.

CHAIRPERSON COFFMAN: Dr. Gotcher.

DR. GOTCHER: Good morning, Ms. Warren.

SUPT. WARREN: Good morning.

I truly appreciate the fact that DR. GOTCHER: you shared a great student success story. That's something that's always impressive to me and I look forward to hearing great stories, and certainly that was a compelling story and it really touched it. I appreciate that. I have a couple of points, if I can make, and I appreciate you also. I had on my prep notes to ask about the segregation of duties, and I certainly understand that that is a common reflection from legislative audits and other entities about the segregation of duties. So I bring in your advisory board on our -- the statement says that they oversee the school's finances. So how would they oversee them? How -- what form of communication do you have with the board in overseeing the finances? How do you report to them? How often? And then I have a second point to make.

SUPT. WARREN: Board members as individuals, we have two members that actually sign checks, and so they are in the office. All of the board members

have children who attend the school, and so they're there every day either in, you know, their official capacity as a board member or their other role as a parent, of course. And the board as a whole sees financial statements during our monthly board meetings.

DR. GOTCHER: Board?

SUPT. WARREN: Uh-huh.

DR. GOTCHER: Very good. I just wanted to --

SUPT. WARREN: Okay.

DR. GOTCHER: -- ask a little more clarifying on that. That's wonderful. And the second piece that really struck my interest the other evening as I was reviewing this is your parents as teachers program.

I wonder if someone could talk more about that. I found that to be an interesting piece.

SUPT. WARREN: Well, we know that we make good progress with student learning. We can see it happening day by day, and sometimes not just reading or math but in personal gains. And -- but those scores, they're low; you know, they're low when they come in and sometimes they stay that way for awhile. And so we talked at great length -- you know -- we have an active parent involvement program. Our parents, they love the school, they love us. Every

day I get two or three "thank you so much, I'm so qlad you're here; " you know, "my kid did this today, " and they're just so pleased about that. And I was sitting at home one night and I thought, you know, those people are intelligent. If we just showed them what to do and explained to them how do you read with your child -- because if you send a book home with a child and you say, "Here, you know, read this with your child, " well, there are multiple ways that that can occur. And I've listened to parents throughout the years saying, "Well, I read a page and they read a page." "Oh, what did you do when they come to a word that they didn't know?" "I told them what it was." Well, that's probably not the best way to instruct them. And so if we sit down with the parents and explain exactly how to do that, we model it for them, we teach them, we provide materials that they can take home and work with their own child on their child's level. So we have these things in place for every child in the school, even our gifted students.

DR. GOTCHER: Is that an ongoing time that you meet with them or is it something that you do at the beginning of the year, maybe before a parent/teacher conference, et cetera? What would -- when does that

occur?

SUPT. WARREN: The new parents, we invite them in at -- usually, we have a meeting near the beginning of the school year and so we invite them in at that time. But when the parents are working with the teachers usually -- I mean, it can be a small group of them, one or two of them; it could be a larger group. But they're instructing them on what their particular child needs. And they go home and they practice it. As soon as they're done with it, they come back, "We finished this, we've got these all checked off," and they're very excited about doing that because they want their children to achieve.

DR. GOTCHER: Very good. Thank you.

SUPT. WARREN: Uh-huh.

CHAIRPERSON COFFMAN: Dr. Saunders.

DR. SAUNDERS: Yeah. I had a question for Legal, I think. Is this entity -- they are eligible for the 10-year as applied for. Is that correct?

MS. DAVIS: Yes.

DR. SAUNDERS: Okay. And at any -- in any case like that, for 10 years, if throughout the course of those 10 years if performance or the situation was to change is there a mechanism in place to come back

1	before the committee?
2	MS. DAVIS: Sure. If you have concerns, you can
3	call them back in front of the committee to address
4	whether it's, you know, academic concerns, fiscal
5	concerns, or whatever your concerns may be.
6	DR. SAUNDERS: Okay. I do want to commend you
7	all on I think you have a challenging population
8	and I'm really encouraged to hear what I continued
9	to hear was the personalization and the relationship
10	building and how important that is.
11	SUPT. WARREN: Yes.
12	DR. SAUNDERS: And I know you have a high
13	concentration of students with difficulty and I just
14	want to encourage you to keep working with them. I
15	encourage you on that. So I'd just
16	SUPT. WARREN: Thank you.
17	DR. SAUNDERS: like to make a motion at the
18	proper time.
19	CHAIRPERSON COFFMAN: Mr. Rogers.
20	MR. ROGERS: I have a couple of questions.
21	First of all, on your funding you said you had
22	\$100,000 right now.
23	SUPT. WARREN: Yes.
24	MR. ROGERS: But is that all funds?
25	SUPT. WARREN: No. That was the operating

	111
1	that was the legal balance. I'm sorry.
2	MR. ROGERS: You're sure?
3	SUPT. WARREN: Yes.
4	MR. ROGERS: Okay.
5	SUPT. WARREN: Yes, I'm sure.
6	MR. ROGERS: Okay.
7	SUPT. WARREN: In fact, I pulled it up. I
8	actually may even have a copy of it.
9	MR. ROGERS: Because
10	SUPT. WARREN: I pulled it up from the ADE
11	website and it's
12	MR. ROGERS: Because what I'm looking at right
13	now shows that for the past three years you had a
14	declining fund balance. In 2013, you were at
15	\$108,000; then it's \$71,000, to \$68,000, and so that
16	your budget is going to finish at \$35,000. And then
17	that was when you had an ADM of 60 and now you're
18	saying that you only have 44, so I'm kind of
19	concerned about the declining fund balance.
20	Then the other concern that I have was what Dr.
21	Gotcher had talked about on the segregation of
22	duties. In the application there it said that you
23	have one person that did the writing of checks,
24	receiving checks, and so but then when you spoke
25	earlier you said that there was some separation. So

I kind of wanted to touch on that a little bit. You know, you can do all of them at once or just --

SUPT. WARREN: Probably not, if I can just answer one at a time.

MR. ROGERS: Sure.

1

20

21

22

23

24

25

SUPT. WARREN: The first one about the fund balance, first of all, it says, you know, we're expected to have \$35,000 at the end of the year. While that's not a bad sum, it's a low sum. started with zero though at year-one and, you know, at the end we continually built up funds. something that I always am concerned about, of If you don't have the enrollment, you're not course. going to have the funds coming in. I know that. in my 14 years at Imboden it has shown each year we may have a year of low enrollment, the next year we'll be very high, the next year we'll be very low, and it just continues like that. And it seems that either one year we get growth funding and then the next year we get declining enrollment funding, and so that is how it has proceeded. And as far as finishing the year with that amount, that's what I've budgeted -- you know, based on what I budgeted. But we always budget more than we're planning to spend, so --

1	MR. ROGERS: Right. But my concern is that the
2	actual legal fund balance, not including your
3	building or categoricals, has been dropping over the
4	past three years.
5	SUPT. WARREN: That's correct.
6	MR. ROGERS: And if you are a public school, I'd
7	probably be talking to you about early intervention
8	and so that's why I'm concerned about it.
9	SUPT. WARREN: Well, I mean, I can assure you it
10	has nothing to do with mismanaging the funds or
11	MR. ROGERS: I'm not trying to say it's just
12	
13	SUPT. WARREN: spending them. But it's
14	you know it has to do with the enrollment. I
15	mean, it's directly related to that.
16	MR. ROGERS: Right.
17	SUPT. WARREN: And so, you know, I understand.
18	If we don't have the students, we don't continue.
19	So, I mean, I'm fully aware of that and I do
20	understand your concern and I am concerned about that
21	as well.
22	MR. ROGERS: The other concerns I have, after I
23	started with that then I did pull up a bank
24	reconciliation and there's one check that y'all had
25	outstanding for over two years, and then two more

that are almost two years.

SUPT. WARREN: Uh-huh.

MR. ROGERS: And so they're not a whole lot but any time I see that, have that kind of -- I just wonder is there -- are you trying to find out why or are you -- I mean, I understand that the amounts, you probably don't want to stop payment on them. But those are still going to be something that's always going to be hanging out there.

And then the other concern that I have was on EDD payments. I get a notification of all the school districts and charter schools when we have -- when they have turned it in late, and that's another \$100 penalty every time you turn it in late. And from what I understand, this past month it was late and I was just wondering how many -- do you know how many times it has been late? And is this just a one-time occurrence?

SUPT. WARREN: It has been late twice this year, but in no other year has it ever been late. And the reason for it being late was that -- it's the reason that I no longer have the administrative assistant that I had. So that problem hopefully will have been taken care of.

CHAIRPERSON COFFMAN: Any other questions?

MS. BARNES: I'm sorry, I was going to say -- I have a question but it's probably one for later and it was based on something Mr. Rogers just said. I was just wondering what role we take with the fact that -- they are an open-enrollment, so they are a public school. And do we need to be looking at providing some kind of assistance with early intervention? That was my question. I didn't know if that was something that we needed to be talking about right here, right now though.

CHAIRPERSON COFFMAN: So, Ms. Warren, do you want to address the declining enrollment? Is there
-- are you taking steps to get the enrollment back up so that you do have the financial means to sustain?

SUPT. WARREN: Yes. We have tried many different ways to recruit students in the past.

We've tried ads in the newspapers, posters at different locations, things like that. We've tried television, which is very good but not very costeffective; it's very expensive. We used radio this year, which we have not used, and I've received more calls about that than we have from some of the other things we've used. The other successful thing we've used is a postcard mail-out to all the area communities. And I have had those come back folded

1	and the people say, "We've kept these for two years.
2	My child was too young and now they're old enough."
3	And so those are the things that we have done this
4	year to attempt to improve our enrollment.
5	CHAIRPERSON COFFMAN: Ms. Liwo.
6	MS. LIWO: Let me ask, because enrollment you
7	said that your enrollment impacts your funding.
8	SUPT. WARREN: It does.
9	MS. LIWO: And we've just talked about
10	recruiting students. In your application, I noticed
11	that you gave reasons that parents provided to you
12	for pulling their students out of your school.
13	SUPT. WARREN: Yes.
14	MS. LIWO: I have 10.81% indicating that they
15	were not satisfied. Could you flesh that out for me
16	and tell me what you've done to address their issues
17	there?
18	SUPT. WARREN: Well, unfortunately, there's not
19	a lot I can do about most of those issues. If
20	someone says they you know they don't like the
21	teacher, I try to get specific about, you know, what
22	it is and what can we do better, what can we do to
23	help the next person. But if there's something like
24	like I recall last year, we don't allow the
25	students to wear hats inside the classroom. Well,

she got mad because we wouldn't let her child wear a hat in the classroom, so she said, "I'm taking him out." Another one said, "Y'all don't have good meals here. We want hot meals for our kids," and they took their kids out. So it's reasons like that I can't change.

MS. LIWO: Thank you.

CHAIRPERSON COFFMAN: Ms. Warren, I'll take the liberty of sharing with everyone that Ms. Boyd and I had an excellent visit at your school. We came unannounced purposefully so that we could just walk in and see what daily life was like, and it was a great story; it's a great story to tell. I think your point that the local school districts are very proud of the work that they do and the patrons are very proud of their public schools is really a testament to a parents' decision to bring their child to your school. But I think they certainly are being I saw really great instruction; I saw kids served. engaged; I heard proficient readers; and when I walked into Mr. Wells' class I saw that he was teaching word study, so I was excited immediately. It's very rare that I see that in middle school but it's certainly something that I know will improve the learning when it's applied properly. So I really saw

1	excellent work going on there, so I just wanted to
2	commend you for that work.
3	SUPT. WARREN: Thank you.
4	CHAIRPERSON COFFMAN: Ms. Pfeffer.
5	MS. PFEFFER: And my question kind of goes back
6	I guess it's more of a discussion with Mr. Rogers
7	on the financial issues. Are there some steps that
8	would make you more comfortable with moving forward
9	with the decision on this charter? Are there some
10	recommendations that you would have that maybe we
11	could include in terms of a recommendation that might
12	be
13	MR. ROGERS: I don't know if there's anything
14	that when I see the drop in the ADM and the drop
15	in the fund balance as much as I've seen, I don't
16	know if there's anything really that is going to make
17	me feel comfortable. Because like she said, it is
18	if the kids aren't there, then I don't know.
19	That's just
20	MS. PFEFFER: So you don't feel it's an issue in
21	need of technical assistance; you just think it's
22	more of a
23	MR. ROGERS: Well, it may be something. I
24	haven't gone into their budget that much to know how
25	much what everything is and how things are going.

I just -- when I look at their ADM, you know, they were at -- I think they were at right around 60, 59, and now we've had a drop to 44. In such a small school district, any time it has that much of a drop it's going to be significant to anybody in that small of a school district. And so then also looking back, since, you know -- this is from 2013 that they've lost \$70,000 just in fund balance, so that's just a concern of mine. I don't have their --

SUPT. WARREN: I mean, if it makes the Panel more comfortable, we could send a yearly report about our fund balance and about our enrollment. But, you know, the issues are, you know, the recruitment, of course, but also the fact that our population is highly mobile and so some of that is very hard to control. But we do have new business going in in Pocahontas and that's supposed to add -- how many hundred, five?

MR. McCLOUD: I want to say about 800.

SUPT. WARREN: 800 new people to the area. And so we have already been proactive with that going to the recruiting offices and handing out brochures about our school for students of parents that come to work at that plant. But it is an economically depressed area. There isn't much of an economic base

1	there and so lots of people do move. You know, it is
2	difficult even for the other regular public schools
3	to maintain the students that they have.
4	CHAIRPERSON COFFMAN: Any additional questions,
5	comments?
6	MR. ROGERS: Is that something that we could do
7	where she's talked about a yearly report and having
8	just that way, we can see how the ADM and the
9	for however long, if we do if there is a motion to
10	renew it, and however long it was, is there could
11	that be part of it that they would come?
12	CHAIRPERSON COFFMAN: Are you comfortable with
13	that, Ms. Warren?
14	MS. WARREN: Yes, ma'am.
15	CHAIRPERSON COFFMAN: Then I will accept a
16	motion.
17	DR. SAUNDERS: Yes. I'd move to approve the
18	renewal for 10 years based upon the condition of the
19	annual financial status report, which to include
20	enrollment, as well as their legal balance, end-of-
21	year legal balance, minus the categorical and federal
22	funds. Is that what you were looking for?
23	MR. ROGERS: Yes.
24	DR. SAUNDER: Okay.
25	MS. PFEFFER: Second.

1 CHAIRPERSON COFFMAN: A motion has been made by Dr. Saunders and seconded by Ms. Pfeffer for a 10-2 year renewal with an annual report of enrollment and 3 legal balance minus categorical and federal funding. 4 5 Discussion? MR. ROGERS: Okay. If we do this 10 years, and 6 7 then they come in not -- just -- I'm trying -- before 8 I say what I want to say -- if it's continuing to --9 their ADM is continuing to drop and the -- because \$36,000 is a scary ending fund balance for any school 10 11 district with any -- especially with one that is losing its ADM. So if we do it for 10 years but next 12 13 year it comes in and they're down to 30 kids and that fund balance is down to less than that, in worse case 14 15 scenario -- and, once again, I'm not wishing that at all -- but if it does, what can we do then if we've 16 renewed it for 10 years? 17 18 CHAIRPERSON COFFMAN: So as Ms. Davis said, we can call them back at any time. We can provide 19 20 support, technical assistance to them through our 21 charter office and then call them back. correct, Ms. Davis? 22 23 MS. DAVIS: Yes. 24 CHAIRPERSON COFFMAN: At any time. Dr. Gotcher. 25 DR. GOTCHER: Yes. And while I'm in full

support of moving forward with this, I'm not comfortable with 10 years. I feel like there's so many moving parts in such a unique school, and so I'm thinking that maybe fewer years, while, again, I'm in full support of moving forward with a renewal.

MS. SMITH: Just a comment about that too. mean, I do have some concerns too. I have concerns with Title 1 application being late; I have concerns with missed payments; I have concerns with declining funds; I have just concerns with an F on the report card, and I realize that's not a reflection of But if -- and I realize we have a everything. transient population and I realize we have a lowincome population, but we still expect those students to succeed too. And I myself have worked in poverty schools and those are still kids that we want to see be proficient. I did hear lots of great things that you were doing and students that you were serving, and so I do want to recognize that. Ms. Coffman's comments about what she saw when she came to your school on a visit and the actual strategies, the word study shows that there was high quality instruction going on. So that gives me some pause to go, okay, well, maybe I'm not seeing the whole picture here. But I would be more comfortable with less than 10,

	123
1	maybe a 5-year.
2	CHAIRPERSON COFFMAN: Okay. I have a motion on
3	the table and a second. So we'll take a vote on
4	that. Our motion is for 10 years with the annual
5	financial report. Ms. Liwo.
6	MS. LIWO: No.
7	CHAIRPERSON COFFMAN: Dr Mr. Lester.
8	MR. LESTER: No.
9	CHAIRPERSON COFFMAN: Mr. Rogers.
10	MR. ROGERS: No.
11	CHAIRPERSON COFFMAN: Dr. Saunders.
12	DR. SAUNDERS: Yes.
13	CHAIRPERSON COFFMAN: Ms. Barnes.
14	MS. BARNES: Yes.
15	CHAIRPERSON COFFMAN: Ms. Pfeffer.
16	MS. PFEFFER: Yes.
17	CHAIRPERSON COFFMAN: Ms. Smith.
18	MS. SMITH: No.
19	CHAIRPERSON COFFMAN: Dr. Gotcher.
20	DR. GOTCHER: No.
21	CHAIRPERSON COFFMAN: All right. That motion
22	fails. Is there a second motion?
23	DR. GOTCHER: Since Ms. Warren made part of
24	record the agreement regarding the enrollment and
25	financial report, I won't enter that in my motion

	124
1	since I believe, Ms. Jennifer, that makes it part of
2	the
3	MS. DAVIS: Yes.
4	DR. GOTCHER: Okay. Therefore, I'll make a
5	motion to renew the Imboden Area Charter School for
6	five years.
7	MS. BARNES: Second.
8	CHAIRPERSON COFFMAN: A motion has been made by
9	Dr. Gotcher and seconded by Ms. Barnes for a 5-year
10	renewal with the same annual
11	MS. DAVIS: Right.
12	CHAIRPERSON COFFMAN: measures.
13	MS. DAVIS: Make sure just the motion
14	CHAIRPERSON COFFMAN: Okay.
15	MS. DAVIS: has with the annual reporting.
16	CHAIRPERSON COFFMAN: Okay. And we'll go
17	through another count. Is there any discussion on
18	the second motion?
19	All right. Then
20	DR. SAUNDERS: Can I
21	CHAIRPERSON COFFMAN: Yes.
22	DR. SAUNDERS: Can I clarify? Did that include
23	the financial?
24	CHAIRPERSON COFFMAN: Yes.
25	DR. SAUNDERS: Okay. I just wondered.

	125
1	CHAIRPERSON COFFMAN: Yes. The same enrollment,
2	legal balance, minus categorical and federal funding.
3	DR. GOTCHER: That's my intention, yes.
4	CHAIRPERSON COFFMAN: All right. Ms. Liwo.
5	MS. LIWO: Yes.
6	CHAIRPERSON COFFMAN: Mr. Lester.
7	MR. LESTER: Yes.
8	CHAIRPERSON COFFMAN: Mr. Rogers.
9	MR. ROGERS: Yes.
10	CHAIRPERSON COFFMAN: Dr. Saunders.
11	DR. SAUNDERS: Yes.
12	CHAIRPERSON COFFMAN: Ms. Barnes.
13	MS. BARNES: Yes.
14	CHAIRPERSON COFFMAN: Ms. Pfeffer.
15	MS. PFEFFER: Yes.
16	CHAIRPERSON COFFMAN: Ms. Smith.
17	MS. SMITH: Yes.
18	CHAIRPERSON COFFMAN: Dr. Gotcher.
19	DR. GOTCHER: Yes.
20	CHAIRPERSON COFFMAN: You are approved for five
21	years.
22	SUPT. WARREN: Thank you.
23	CHAIRPERSON COFFMAN: Ms. Davis, will we need to
24	create two sheets?
25	MS. DAVIS: No, I don't think so. No.

CHAIRPERSON COFFMAN: Okay. So on our form we will -- they will vote as they voted in the second motion and give their reasons. Okay. Ms. Warren, if you'll wait just a moment we'll have an explanation.

[A FEW MINUTES OF SILENCE]

CHAIRPERSON COFFMAN: Ms. Barnes.

MS. BARNES: I voted -- I'm sorry. I voted in favor of the renewal for five years because I believe the charter has longevity. And while achievement is incremental, growth with respect to multiple measures is encouraging. Additionally, the charter is not designated in any persistently low achieving categories. The annual financial reporting review will be helpful in assisting with precautions.

CHAIRPERSON COFFMAN: Dr. Gotcher.

DR. GOTCHER: I voted for the motion to approve; very impressed with the mission and core values that this school represents. I commend them for their student centered approach to student learning. I'm further impressed with the parents as teachers support. I think that's a powerful piece, Ms.

Warren. I commend you for that. I urge them to seek out technical assistance as needed to insure fiscal and other accountability measures.

CHAIRPERSON COFFMAN: Mr. Lester.

MR. LESTER: I voted for. I believe the Imboden Charter School has shown a history of being able to operate with the current population. I do still believe that the enrollment and fund balance will need to be monitored.

CHAIRPERSON COFFMAN: Ms. Liwo.

MS. LIWO: I voted for. I think your school is not only catering to your students academically, given the population that you have to deal with, but also just on an individual level as people. And I really respect that; I admire that. I think you're doing great work and just continue.

SUPT. WARREN: We will.

CHAIRPERSON COFFMAN: Ms. Pfeffer.

MS. PFEFFER: I voted in favor of the motion.

This is a charter with a long history of service.

This charter serves a high population of disadvantaged students and provided evidence of student achievement over time. The charter is not under any academic or fiscal distress designations.

But while there are financial concerns due to the declining enrollment, the motion provides for ongoing updates as to the status of enrollment and fund balances and the ongoing operations can be addressed in a timely manner if the need arises.

1	CHAIRPERSON COFFMAN: Mr. Rogers.
2	MR. ROGERS: I voted for it. Ivy said it better
3	than I did. But just because I have concerns over
4	the declining fund balance and declining ADM, but I
5	do know that this charter school provides service to
6	a very needy population. And as long as we have the
7	yearly review I'm comfortable with them to keep
8	going.
9	CHAIRPERSON COFFMAN: Dr. Saunders.
10	DR. SAUNDERS: I voted in favor. I believe the
11	school has shown a history of serving a diverse and
12	challenging student population.
13	CHAIRPERSON COFFMAN: Ms. Smith.
14	MS. SMITH: I'm comfortable with the 5-year
15	renewal and yearly financial reports with support
16	from ADE regarding balance and students served. The
17	charter aims to serve disadvantaged students and it's
18	commended for their commitment to this work.
19	CHAIRPERSON COFFMAN: Congratulations, Ms.
20	Warren. I would like to say publicly that we
21	appreciate that your charter school opens its doors
22	to all students. Thank you so much for doing that.
23	SUPT. WARREN: Thank you very much.
24	CHAIRPERSON COFFMAN: Transportation is a real
25	bonus for the community. Thank you so much.

	129
1	SUPT. WARREN: Thank you.
2	CHAIRPERSON COFFMAN: If it pleases the Panel,
3	would you like to take lunch now?
4	DR. GOTCHER: It always pleases the Panel to
5	take lunch.
6	CHAIRPERSON COFFMAN: It pleases the Panel to
7	have lunch. We will resume at 10 minutes after 12:00
8	with action item 3. Thank you.
9	(LUNCH BREAK: 11:30 A.M 12:14 P.M.)
10	A-3: REQUEST FOR OPEN-ENROLLMENT PUBLIC CHARTER SCHOOL RENEWAL
11	AND PRIORITY STATUS HEARING: COVENANT KEEPERS COLLEGE
12	PREPARATORY CHARTER SCHOOL
13	CHAIRPERSON COFFMAN: We'll bring the meeting
14	back to order. Action item 3. Ms. Boyd, you're
15	recognized.
16	MS. BOYD: Thank you, Madam Chair. Request for
17	Open-Enrollment Public Charter School Renewal and
18	Priority Status Hearing for Covenant Keepers College
19	Preparatory Charter School.
20	The State Board of Education approved the
21	application for Covenant Keepers College Preparatory
22	Charter School on January 15, 2008. The charter is
23	approved to serve students in grades 6-8 with a
24	maximum enrollment of 380. Representatives of
25	Covenant Keepers are appearing before the Charter

Authorizing Panel to request a 10-year renewal for the charter. Also, the Charter Authorizing Panel has required representatives of Covenant Keepers College Preparatory Charter School to appear for a hearing pursuant to Arkansas code annotated 6-23-105, to discuss academic performance. Representatives of the charter agreed to combine the two hearings and approved combining the hearing procedures to be followed. Possible actions to be taken by the Charter Authorizing Panel include renewal of the charter based on its renewal application, but due to its Priority status possible actions include modification, probation, revocation, and/or nonrenewal of the charter.

With all of that being said, I'm going to ask Jennifer Davis to come talk to you about the procedures that we'll follow for this hearing.

CHAIRPERSON COFFMAN: Thank you.

MS. DAVIS: Okay. The procedures that you're going to be following for the next two hearings are going to be -- they should be in your packet; it's the combined procedures. For the most part it's fairly the same as what you're used to, but at the beginning -- like I say, everybody except for attorneys will still need to continue to be sworn in.

1	But the Department has 20 minutes to present a
2	presentation regarding the school. It's, you know,
3	much more of a very factual what's-been-done, what,
4	you know, assistance the Department has been giving
5	the school. After that, the charter itself will have
6	20 minutes to make its presentation, followed by 20
7	minutes for opposition, and another 5 for rebuttal.
8	So it's for the most part the same. It's just the
9	Department has 20 minutes as well to make a
10	presentation.
11	CHAIRPERSON COFFMAN: And, Ms. Davis, is the ADE
12	staff sworn in as well?
13	MS. DAVIS: Yeah, they do.
14	CHAIRPERSON COFFMAN: Thank you. If all
15	representatives of Covenant Keepers College
16	Preparatory Charter School and anyone speaking in
17	opposition would please stand to receive the oath,
18	including ADE staff. Raise your right hand. Do you
19	swear or affirm that the testimony you're about to
20	give shall be the truth, the whole truth and nothing
21	but the truth?
22	(ALL SPEAKERS ANSWERED AFFIRMATIVELY)
23	CHAIRPERSON COFFMAN: Thank you. Ms. Boyd.
24	MS. BOYD: Thank you, Madam Chair. Dr. Wilde
25	and I will be sharing the 20 minutes for ADE staff.

I'm going to give you a brief background of Covenant Keepers. Covenant Keepers was first authorized by the State Board of Education to operate in January of 2008, to serve grades 6-12. In April 2013, the charter received a 3-year renewal. During the renewal process, the location of the charter was changed and grade levels reduced from 6-12 to 6-8. The school has a history of academic distress, being designated both in 2013 and 2014 as an academic distress school. More recently, the school has been classified as a Priority school. The contract is scheduled to expire on June 30, 2016. In my visit to the campus and conversations with school leadership, I have noticed that the school has recently come under the leadership of a new principal, Mr. Leonard Blocker. Under the direction of Mr. Blocker, the school seems to be building a stronger sense of community between the staff and students. I'll defer the rest of my time to Dr. Wilde.

CHAIRPERSON COFFMAN: Dr. Wilde, you're recognized.

DR. WILDE: Richard Wilde, School Improvement
Unit. For the last three years, we have been
providing technical assistance and support to
Covenant Keepers, as we were asked to submit a report

in relationship to progress that had been made. you can see on the second page that Covenant Keepers has, in terms of their planning, assessed 14 indicators and that they have filed with us 51 tasks that they are in the process of completing, and so they have embraced the process. Now part of their challenge has been turnover in staff, changing student population, so there has been a number of However, we would say initially there was issues. some resistance in collaboration. In the last two years we would say that they are very engaged in the process with us. That concludes any comments I would have. CHAIRPERSON COFFMAN: Thank you, Dr. Wilde. Boyd, would you like to recognized the school district? MS. BOYD: Yes, ma'am. From Covenant Keepers, we'll be starting off the presentation with Dr. Valerie Tatum, the school director. CHAIRPERSON COFFMAN: Good morning, Ms. -- good afternoon, Ms. Tatum. DR. TATUM: Hi. Good afternoon, everyone. So glad to be here. As you know, my voice goes in and out, so I'm going to notice an out-day. Okay?

pardon all the raspy voice and all of that.

will proceed, I'll start it out and then my wonderful team, they will come and talk about the changes that have made a difference.

So with that being said, who we are: eight years operating in southwest Little Rock, designed to serve a high-needs population, 96% free and reduced lunch, 55% African American, 45% Hispanic, and 31% ELL.

As you know, we have turned all of this 72% into opportunities, so -- and they come from four different areas: new to the U.S., 7%; ALE's, 4%; and 61% of our students come from Priority schools and Focus schools. So I'll turn it over to Principal Blocker.

MR. BLOCKER: Thank you, Dr. Tatum. Good afternoon. As mentioned, I'm the principal at Covenant Keepers Charter School and as the principal I lead initiatives and programs that lead to the overall support of climate and culture in the school. These initiatives include, but aren't limited to, leadership development, effectively establishing and nurturing relationships. Also, I work very closely with the dean of students to monitor, analyze and to respond to the discipline data.

A change that has made a difference in our culture and our discipline data is the implementation

of our one-to-one interventions. This is where if we recognize a disconnect between a student and a teacher, I facilitate a meeting that fosters an environment for open communication for both parties to discuss expectations. And the implementation of the one-to-one interventions has led to a 98% success rate, meaning after the intervention follow-up takes place with the teacher, asking the teacher how is the relationship with the student since the intervention, do you feel it was beneficial, do you feel another intervention is necessary. And the teachers respond 98% of the time stating that no further intervention is necessary.

Overwhelming support and training for our faculty has had a positive impact on our culture and school-wide demerit system. When I took on the role as principal, the dean of students and I sat down to review behavior documentations and we noticed that a lot of our students were spending quite a bit of time out of the class. Therefore, we implemented a new demerit system which allows for more student reflection before consequences are dispensed. In the 2015-2016 school year, the current school year, we noticed that the demerit system has impacted our school in such a way that 60% of our returning

25

students have experienced a decrease in referrals. The students that have reoccurring issues that continue to display disruptive behavior are referred to more in-depth wraparound services that Ms. Rosalind Washington will speak to later. The demerit system wouldn't be as effective if it had not been for our interaction with our parents through constant communication and home visits. In fact, as you see, our parents are very satisfied; 90% say that CK (Covenant Keepers) has had a positive effect on their child's behavior and 97% have committed to return for the 2016-2017 school year. Now I'll pass it on to Ms. Laurette Whipps and Ms. Jenna Jones and they'll talk about the changes that have made a difference in the academics. MS. WHIPPS: Good afternoon. My name is

MS. WHIPPS: Good afternoon. My name is

Laurette Whipps and I am the lead teacher at Covenant

Keepers Charter School. I work closely with the

administrative team to insure both our teachers and

students are getting what they need in our

environment.

MS. JONES: And I'm Jenna Jones; I'm the data coordinator at Covenant Keepers and I analyze assessment data to assist teachers in planning and instruction.

When we received our PARCC scores we knew that that data was not a complete picture of our students' If you can look at page one in the handout progress. that you received from us, we received a report from NWEA's research team comparing our Fall 2014 to Spring 2015 growth data with other schools with similar demographics nationally. When we looked at observed versus expected percentages of students within each achievement band typically there are 10% of students on each of these levels at the beginning of the year. However, on page 1 this chart shows that 27% of our students are starting off the year at the very bottom decile of students nationwide. Ιf you turn to page 2, when we look at our students in the spring averaging growth in all subjects together -- and that's reading, math and language -- and compared with schools of similar demographics nationally, we see that we're making more than typical growth with nearly all groups of our students, regardless of their observed percentage at the beginning of the year. This proves that the changes we have made are making an impact on student growth.

Now Ms. Whipps will discuss the changes we have made academically, especially as we are transitioning

to PARCC, from PARCC to the ACT Aspire.

To address the performance report MS. WHIPPS: as it relates to achievement, we have set very high expectations for our students' academics. We spent time developing our teachers to both manage our population as well as pinpoint the needs of each individual student. We've aligned our curriculum to a nationally recognized research based curriculum to meet the rigor of Common Core and to supply our teachers with the tools needed to effectively execute high quality lessons. We have both developed and implemented innovative teaching techniques such as using a research based lesson planning schema by Jane Pollock -- we call this GANAG -- and this uses Marzano's nine high-yield strategies. interactive notebooks for student reflection and student work, pre- and post-assessments, and Show-What-You-Know's are something we use daily as well. These help the teachers identify learning gaps or if and when a student has mastered a particular skill in math or literacy. We are dedicated to student achievement and have scheduled our school days to that end. Both math and literacy have 80-minute periods blocked daily. Since our curriculum lessons are around 45 minutes, this means that teachers are

able to intervene in real time through differentiation, extra support and individualized instruction. Also, we have a plus-time period daily that offers intensive individualized or personalized interventions. We're taking students where they are and we're devoting this time to build on what they actually need.

Professional learning communities have been assigned to give teachers an opportunity to collaborate about student interventions based on our classroom -- excuse me -- classroom assessment data. To insure Covenant Keepers' faculty is getting the support that they need, we are aggressively working to resolve any classroom issues they may incur. We have enforced a support cycle that gives our faculty an advisor that will support them weekly in various areas, such as classroom management, discipline, eSchool, lesson planning, which includes GANAG data, ELL, and technology. Through the support cycle we're able to help provide the necessary professional development for our teachers.

Ms. Jones will discuss how these academic changes make a difference for our students.

MS. JONES: First, I think it's important to address where our students are upon entering Covenant

Keepers. According to the first NWEA test our students take upon entering Covenant Keepers, 90% of our students enter below grade level, with 20% of our students entering three grade levels behind. 78% of our students enter below grade level in reading, with 18% of our students entering four grade levels behind.

We've been able to make significant growth with our students, especially comparing the 2013-14 school year with the 2014-15 school year. In the spring of 2014, our students made -- 41.63% of our students made growth in reading, meeting their growth goals. And in 2015, 67.3% of our students met their growth goal, when typically nationwide having 50% of the students meet their growth goal is typical. In math, in 2014, 38.4% of our students met their growth goal, while last year 58.9% of our students met their growth goal, while last year 58.9% of our students met their growth goal in math. And in language, two years ago 48.33% of our students met their growth goal, but last year 74.7% of our students met their growth goal in language.

I'd now like to introduce Dr. Sarah McKenzie.

She's with the Office of Educational Policy and she has taken a more in-depth look at our NWEA data.

DR. McKENZIE: Thank you. I'm here to talk a

little bit about measuring growth with MAP data. You all know this is different than proficiency and it is not a replacement for proficiency, but it's a step on the way, progress to proficiency on our state assessments. So each student has an individualized growth assessment and we base this on fall to spring assessments. So you can meet your growth target but still be well below grade level. If you're coming in four grade levels behind, you can meet or even exceed your growth target and still not be to grade level.

Catch-up growth is one thing I like to talk about. It's when you've made a 150% of your academic growth for the year, so basically making one-and-a-half years worth of growth in one year. And that's the kind of growth we need to see from students if we want to get them caught up to proficiency when they're starting so far behind.

So the first question I examined was what percentage of students are meeting annual MAP growth. The students, like I said, were assessed in the fall and the spring. And as Jenna mentioned, at a typical school 50% of students meet or exceed their growth target. This is for the past four years. In 2012-13, we didn't get spring testing taken care of appropriately, so I don't have growth data from that

2

3

4

5

6

15

16

17

18

19

20

21

22

23

24

25

year. But you can see the trend over time. It's gone from 25% meeting in reading to 68% of students meeting their goals in reading.

Like all of you, I'm concerned about growth for all students but I'm particularly concerned about growth for our students that are so far behind. for this analysis I looked at what percentage of lowperforming students are meeting their annual MAP growth. To meet the expectation of being a low performing student, they had to be in the bottom third of students nationally, so well, well below That's about 60% to 70% of Covenant grade level. Keepers' students. Sometimes we think these kids are easier to make growth with because they're so far behind; that's actually not the case. It doesn't matter whether you're a low performing student or a high performing student. On NWEA MAP everybody has the same probability of meeting their growth targets because the growth targets are individualized. Again, in a typical school that will be 50% of students that meet or exceed their growth target. And you can see at Covenant Keepers, in 2014-15, over 73% of those low performing kids met their growth targets in reading and 64% met in math. And that's a big change from prior years.

CHAIRPERSON COFFMAN: Sarah, is that 100% of their growth or 150%?

DR. McKENZIE: This is 100%. But thank you very much for that lovely transition to the catch-up growth. I didn't pay her for that.

So again we're looking at these low performing students; we're looking at what percentage are making catch-up growth, because if you're just making regular growth you're just staying as far behind as you were before. So this slide -- again, students must be assessed in fall and spring. When we talk about meeting typical growth we say 50% of kids at a typical school. There is no typical for catch-up growth. In my experience, 30% is exceptional. If you're getting 30% of your kids to make year-and-a-half growth, that's a lot. So you can see in 14-15 Covenant Keepers had 66% of those lowest performing kids making at least one-and-a-half times annual growth in reading and 54% in math.

Oh, I went the wrong way.

Okay. So when we're talking about one year growth for the lowest students what does this look like? That red box shows the kids -- oh, I've got to go back one more. Oh, I missed a slide. Okay. The wrong slide is in there. That's okay. This was

2

21

22

23

24

25

showing those students that were in that lowest percentage for reading and for math. All those little blue dots were in that square in the fall and then by the spring lots of them had moved out. In particular, you could look at a student, like Student A, that had started very, very low performing and then that blue line as it moves up till spring 2015, they're well out of the danger range and catching up to their peers.

So, in summary, MAP is a great tool for measuring student growth, particularly at schools like this where we have a lot of students coming in well, well below grade level. We've seen a lot of increases in the percentage of students who are making growth at Covenant Keepers and a high focus on You know, they call me a lot to ask is this what we should be pulling from this data, is this what this means, what would you recommend that we do, how do we set goals with students. A high percentage of students are making more than one-anda-half years' growth in one year. Are they caught up to proficient yet? No, not all of them are. they're well on their way. More students are below grade level in math than in reading. continuing to struggle in math. And as in all

schools, there are some students who are still not making the kind of progress we would like for them to make. But in my discussions I feel like they have identified who those students are and are working on different approaches to try to get growth for those students too.

If you'll turn into your packet, just as sort of a summary picture, on page 3, this is a part of NWEA MAP's virtual comparison group which doesn't compare Covenant Keepers to the rest of the nation but to similar performing schools. There's a four quadrant grid. You can see they're labeled high growth/high achievement, low growth/high achievement, and then the little square where Covenant Keepers has a red dot right there, high growth and low achievement. It's the same thing we've been talking about, a lot of growth for kids. The red circle is reading and the gray circle is math. So for math they're still in that low achievement, fairly low growth category, but for reading they've moved into the low achievement, that high growth category. Thank you.

MS. JONES: All right. I will address our English learner population and any questioning.

Right now, I would like to introduce Ms. Rosalind

Washington and Dr. William Tollett and they're going to talk about a change that makes a difference with our wraparound services.

MS. WASHINGTON: Hello. My name is Rosalind
Washington; I am the resource coordinator for
Covenant Keepers. As it's been stated, our students
come with extreme disparities. We understand that
there are complexities that they face outside of the
classroom that makes it difficult for them to learn
inside of the classroom. We have worked to develop a
plan that will look at individualizing a component
for our students that will help not only our
students, but our families achieve those academic
successes, successfulness that they need to be inside
the classroom.

In 2015, October, we started to look at our returning student was at 80% and our free and reduced lunch was at 96%. We realized that our students would have a situation as it deals with hunger, to possibly needed shelter, moving from place to place with their families. As we began to sit down with different components, we began to look at the wraparound process. What you see is the four phases that include engaging the families. We believe that when you begin to engage the family it helps to have

success in the classroom and the academic that we've seen and the planning and the implementation as we begin to transition students out. As we go on and look at the wraparound model, there are four -- not only the four phases, but 10 components that make the model up. These 10 principles that we use is to look at the family and individualize the family need based upon the family's voice and looking at the student of how we can help them as a team specific to build out a plan that will accomplish their goals inside of the classroom.

From that, we began to develop stakeholders within our community, one of which we have here today, Dr. Tollett. He will be coming and speaking to you about his community involvement with Covenant Keeper as we continue on to make success in the wraparound model. He also at this particular time, due to another engagement, will accept any questions you may have as it relates to his partnership. Dr. Tollett.

DR. TOLLETT: Thank you so much. It's good to be with y'all today. I'm Dr. William Tollett; I'm the director of Community Relations and Development for the Salvation Army here in central Arkansas. We serve four counties: Pulaski, Saline, White and

Lonoke counties.

The Salvation Army under a letter of intent to Covenant Keepers and through a management agreement seeks to provide voluntarily social services to students and their families through our food pantry, clothing assistance, tutorial assistance, and housing and utility assistance. We seek to do this through a set of goals that we provide without discrimination to those who come to us. We seek to provide and to promote economic, health and social well-being for individuals, families and communities; to promote healthy development and readiness for children, especially those in low income families; to promote safety and well-being for children, youth and families; to support the underserved and the underrepresented populations; and to upgrade the capacity of the Salvation Army to make a difference in the lives of families and in our community. And I do I have a 1:30 appointment that I was just apologize. not planning well enough for, so please accept my apology. If you have questions, I would be more than happy to try to answer those questions at this time. CHAIRPERSON COFFMAN: Panel Members, are there

any questions for Dr. Tollett?

(BRIEF MOMENT OF SILENCE)

1 DR. TOLLETT: Thank y'all so much. CHAIRPERSON COFFMAN: Thank you. Ms. Tatum, we 2 are to the end of our 20 minutes. Let me ask if 3 there is anyone in the audience to speak in 4 5 opposition? (BRIEF MOMENT OF SILENCE) 6 7 CHAIRPERSON COFFMAN: So you have 5 remaining minutes. 8 9 DR. TATUM: Five remaining minutes? We'll have Dr. Guerrero from -- the president of LULAC. 10 11 DR. GUERRERO: Good afternoon, Madam Chairman and Members of the Committee. LULAC is a advocacy 12 13 organization for Latinos. We have 1,000 councils in 37 states. Currently, I'm serving as president of 14 15 our central Arkansas council and also as deputy state 16 director. And we're here in support of the petition from the Covenant Keepers Charter School to ask you 17 18 to allow them to continue their outreach in serving Latino students. I've paid visits to the school over 19 20 the years and I just recently, two weeks ago, spent 21 the better part of an afternoon meeting with them and 22 their staff, and I looked up data on our Arkansas 23 data center on the internet as well. 24 A couple of things -- it's amazing to me that 25 23% of their enrollment is English Language Learners

and they're doing as well as they are with their students. I'm thinking specifically of the previously referenced data from the NWEA assessments where they're making a year-and-a-half academic progress in one year. There's been a growth, general growth in the Latino population in the general population and in our school population. And one of the things that encourages us to support this application or renewal with you is that the Department and the state keeps talking about choice for families, and this is one of the very few places we have found where a choice for Latino students in charter schools -- where there has been such a commitment, especially with academically stressed Latinos and English Language Learners. They're doing a very good job.

If I would do a quick quote inspection of whether they're ESL program would meet the requirements of adequate components, and I took a look at it through those -- through that lens, I found in visiting and looking at their program that they have an ESL endorsed coordinator who participates on their leadership team. Their curriculum strategies, including shelter instruction, is an acknowledged way to address these issues with

ELL students. They have a language placement committee, a requirement by law. They do supplemental assessment with their EL's, which is They have professional development, peer important. tutoring. Their community outreach is actually, I think, given the requirements on Dr. Tatum to administer the school, quite exceptional. They participate in the southwest Little Rock Mayor's group, which reaches our Latino community. They participate in the business leaders' luncheon, the Lifeline Church, and the Arkansas United Community Coalition, which targets recent immigrant students. And, of course, they do receive technical assistance from the Arkansas Public School Resource Center, and I had a nice conversation with Barbara Hunter Cox on that.

I want to just finish up quickly by mentioning that this wraparound program that they're doing to my knowledge is not available to Latino families through schools any place else in the central Arkansas area. I could be wrong, but that's what I've been able to discover. So I think that is a very important service that they're offering. Also, in my experience here at the Department it takes schools and school districts years to develop the

infrastructure to adequately service English Language Learners and Latino students in general, years, schools with much larger resources, larger enrollments, larger budgets. And Covenant Keepers is making a very good effort and has made an effort to improve where they started from to where they're at today, and we certainly hope you will favorable consider them. Thank you.

MR. HERNANDEZ: Hello everyone. My name is Aviamiel Hernandez. I'm an 8th grade student at Covenant Keepers Charter School. I'm here to tell you guys that Covenant Keepers actually helped me to grow so much throughout these three years of my experience at Covenant Keepers. After -- before coming here, I was a student that had nothing compared to what I am now. I used to get in trouble a lot, expelled once, and I had to find a tradition -- a way to actually get my life back on track. I was at a point where I was going to end all of it, especially my life, because throughout my life I've been through so much pain, trouble, and I really had to find something to like support me, to help me out in my life. And one day my mother actually told me, "Hey, I found this school; it's called Covenant Keepers." And then I thought to myself probably the

school is just a normal school, so I'm just going to be in trouble again. Maybe the school is just going to be a normal school that I might get in trouble. But then when I came everything changed for me. community was different, the people in it was different, the teachers were different; everything was different. And what really surprised me was that a quy, who was Mr. Blocker, actually supported me throughout these three years of my life. And I'm really thankful for Covenant Keepers because they actually taught me so many things that I never knew Life taught me things too, but not as much as Covenant Keepers taught me. After these three years, I changed my life around. I've been getting better grades now. My behavior is extremely better now and I'm actually -- I'm actually really thankful for Covenant Keepers because my life was about to be at a point where it was going to end if I never had And to be honest with you, if I never had Covenant Keepers I'd probably be in prison or That's how important Covenant Keepers probably dead. is to me and I'm really thankful for it. And thank you guys for your time, to explain to you guys that Covenant Keepers has saved my life. Thank you. MR. PHILLIPS: Good afternoon. My name is

Anthony Phillips; I'm a father of a daughter, and my daughter goes to Covenant Keepers. It's her second year, actually. And my daughter -- I'll make it real quick -- my daughter was flunking at least four of her classes prior to coming to Covenant Keepers. She was enrolled in Texas, and once I got her here they automatically assigned her to another school and I wasn't really happy with that choice. So I went outside of the box, and outside of the box has had my daughter on honor roll ever since she enrolled in the school, A and B honor roll. Her -- I mean, her change has been right before my eyes as a young lady. She went in the school as a little girl and she's just growing every day. The staff is so open-hearted and open-minded and they scholastically challenge my daughter -- and I mean challenge her on every level, actually. And I was just -- it's a beautiful school and the staff. It's a true blessing to the community and I'm just really happy that I made that choice to take her -- or to send her to Covenant Keepers. not regret it. And I'll tell any student or any parent to do so, as well. Thank you so much. CHAIRPERSON COFFMAN: Ms. Tatum, our time is up. Do you have any final words?

I wanted to quote what we have, but

DR. TATUM:

1 we are ready to address any questions that you may 2 have. 3 CHAIRPERSON COFFMAN: All right. DR. TATUM: Thank you. 4 CHAIRPERSON COFFMAN: Ms. Pfeffer, we'll start 5 6 with you. 7 Okay. How are you, Dr. Tatum? MS. PFEFFER: DR. TATUM: I'm very well. How are you? 8 9 MS. PFEFFER: I'm doing well. Can you introduce me to your student again? 10 11 DR. TATUM: His name is Aviamiel Hernandez. 12 MS. PFEFFER: Okay. I just wanted to tell you 13 that I am very impressed with your coming here. I mentioned earlier how nervous I get and you were so 14 15 articulate, and thank you for coming and sharing 16

17

18

19

22

23

24

25

that I am very impressed with your coming here. I mentioned earlier how nervous I get and you were so articulate, and thank you for coming and sharing that. Because I know it's difficult to speak in front of an audience like this, and especially to share things. If you don't mind, you talked about one -- you know -- one aspect that really helped you with going to school at Covenant Keepers was a connection with an individual that really helped. Can you tell us just, you know, some other things that were so different at Covenant Keepers that you don't feel like you were getting before? And then I'd be interested in hearing about your plans for

your future.

MR. HERNANDEZ: Well, Covenant Keepers had a lot of changes I never had before. For example, they actually helped me realize what I've done back then. My math grades are better now. A lot of schools never had that before. Other schools just left me in the dirt, "Just sit here and read this." That's all they ever done to me back then. The big thing that I really noticed these three years of school: the support and help, because I never had that ever. never had any of that ever in my life and I'm really thankful for that. My future now, it gives me a chance to actually find out for myself because I really don't know what's my future. My future is really crazy, to be honest, because I never actually thought of it and Covenant Keepers just actually helped me realize what my future is. And I really want to see what kind of future I have, if I ever have one.

MS. PFEFFER: Well, I just want to tell you I think you will have a very, very bright future and wish you the best of luck.

MR. HERNANDEZ: Another thing, my teachers -well, they actually help me in a lot of ways I can't
even explain. One way is that they actually connect

with me. They actually understand me. Other teachers never done that. They actually ask me daily if I need help with anything and I always say yes because they know that I need help with everything I do. They know I need help with basically my life. But they actually support me all the way and I'm really thankful for those teachers.

The students -- my real buddies, they actually help me too. They actually give me advice. Every time I feel down I just say, "Hey, what's up," and tell them about my day, and they actually do give me advice. Like last week I was feeling down about something that happened on the weekend and they actually helped me through it and actually gave me advice. And at the end of the day like it felt like nothing happened.

As you may have heard, the shooting that happened a couple of weeks ago, that was my aunt and that really hurt me. It really did. After it happened, when I went back to school they knew I was -- something happened to me and they actually asked me, like, "Hey, Avi, what's up with you." Like, "What happened to you," and this other thing. And I responded back, I told them there was a shooting, they killed my aunt, and the little girl saw

everything, and I really felt really down that day.

My teachers were actually concerned about me. And to
be honest, this school actually connects with me,
they actually understand me. And I never even had a
person to just talk to, never had that person before.

I'm really thankful.

MS. PFEFFER: Thank you. Thank you. Can I ask a couple more?

CHAIRPERSON COFFMAN: Yes.

MS. PFEFFER: Okay. And so kind of going off of some of those comments, it sounds like teachers are -- and while we all know that the teachers are the most influential aspect in school in terms of student growth and achievement, I wonder if you could talk to us a little bit about your teacher retention.

Because I know that's a challenge across the state but it seems to be a particular challenge in Covenant Keepers and with the percentage of new teachers and even experienced teachers. So can you talk to us a little bit about that and the impact that has?

DR. TATUM: Yes, ma'am, I can. Over the years we've recognized that we've had a high turnover of teachers. And in moving forward, over the last three years it wasn't all because of our student population. We've had teachers that have decided to

go on and take on other careers in business and may
have been family situations, as well. So it wasn't
always a turnover of our student population. But
what we've done is we have now we have a teacher
support cycle and that teacher support cycle really
helps us. Every two weeks there's a rotation of
teachers that we meet with to really get a personal
insight of what's going on maybe in the classroom,
their frustrations, even down to grades and how to
utilize eSchool. And it has been really great for
our leadership team to work with every teacher there
to insure that they are making the growth as well,
and making effective decisions that will help our
children. So Clancy may have a couple of answers, as
well.
MS. CLANCY: Hi. Lori Clancy. I'm assistant
director at Covenant Keepers. And I just wanted to
throw in that thank you
CHAIRPERSON COFFMAN: Would you speak into the
microphone please
MS. CLANCY: Yes.
CHAIRPERSON COFFMAN: for our viewing
audience?
MS. CLANCY: Yes. The teacher turnover at
Covenant Keepers, although we aren't we're not

1	surprised by it, it is it's a tough job. You
2	heard a little bit from Avi about you've really
3	got to have a heart for these kids and that's hard to
4	find. When we find those teachers we hang on to them
5	and we support them like crazy. I always say that
6	they learn more their first year with us than they
7	did in their teacher programs, and I wish more
8	schools were like that. But when a teacher doesn't
9	work out we simply don't have time to the need is
10	too urgent; our kids need their teachers on point.
11	And if we have to let somebody go, you know, we have
12	that waiver in place which is very beneficial for us.
13	MS. PFEFFER: And I want to just ask a little
14	bit the data that I'm showing is that you had
15	looks like seven beginning teachers this year.
16	DR. TATUM: Turnover teachers?
17	MS. PFEFFER: First year teachers. I'm sorry.
18	MS. CLANCY: Oh, first year teachers.
19	MS. PFEFFER: Yeah. Of your total number of
20	teachers
21	MS. CLANCY: No.
22	DR. TATUM: Not that many.
23	MS. PFEFFER: Okay.
24	MS. CLANCY: We had I want to say we had
25	three.

	161
1	MS. PFEFFER: Okay.
2	DR. TATUM: I thought it was two, but three.
3	MS. PFEFFER: That may be that may be
4	MS. CLANCY: First year with us or first year
5	teaching?
6	MS. PFEFFER: From what I'm showing it would be
7	the data in the Cycle 2 report, would've been
8	first year teachers, but I can check on that. It
9	just looked like a very high number of first year
10	teachers and I was just wondering about, you know,
11	the support provided to them, but
12	DR. TATUM: Yes, ma'am. That report cycle is
13	not accurate. I'm looking at our cycle individually
14	and it's been two teachers.
15	MS. PFEFFER: Okay.
16	DR. TATUM: Yes.
17	MS. PFEFFER: All right.
18	DR. TATUM: Not three.
19	MS. PFEFFER: Okay. So, and then my next
20	question probably is for Dr. McKenzie Davis. And so
21	I think my question there is in looking at school
22	data our concerns are that the designations of
23	Priority school, academic distress. So, you know,
24	knowing that on the state assessment student
25	performance is low and but also recognizing that

2

22

23

24

25

we are in a transition/transition period, getting ready to transition again. So you were showing us the NWEA data and, according to that, there is growth; the school is showing growth for a great number of their students, or a pretty large percentage of the students, and even a year's worth of growth for a good percentage. So how does that NWEA data correlate with the ACT Aspire -- or does it correlate? Is there any way that, you know, as we look at the growth there can we expect that there's going to be some growth in the future? And I know they're two different tests and, you know -- but just trying to think through and put some of this data together because it just seems the data is telling different stories.

DR. McKENZIE: Yes. I can speak to that question, definitely. NWEA, just about two weeks ago, released a linking study between NWEA MAP results and ACT Aspire. The two assessments are highly correlated. You know, any test that tests reading is going to be really correlated with a test that tests reading, even if they have different formats and different relationships. The challenge -- same thing with math. The challenge comes in where that bar is set. So under the old Arkansas

6

7

8

9

10

11

12

13

14

15

16

17

18

19

20

21

22

23

24

25

benchmark exam you had to be at about the 33rd percentile on NWEA MAP nationally to score proficient in Arkansas. With ACT Aspire and with PARCC that's bumped up to about the 63rd, 65th percentile So the expectation for proficiency, we nationally. can still do a translation, like euros to pesos or pesos to dollars; it's just what that exchange rate So using their fall MAP data and now their winter MAP data we're really going to be able to identify which kids are on track to be proficient, whether it's the ACT Aspire this year or the PARCC last year. Well, we didn't have the linking for the PARCC. But whatever assessment it is we can find those relationships between them. And in the meantime, not just focus on the kids that are close to being proficient and getting them over the line, those bubble kids, but making sure kids at all levels are making that growth. Did that answer your question?

MS. PFEFFER: I think so. And so I guess now, Dr. Tatum, what steps are you all using then, in using your MAP data moving forward, realizing that just in a few months we'll be looking at that new assessment?

MS. JONES: What we're doing using our MAP data

2

3

4

5

6

7

8

9

10

11

12

20

21

22

23

24

25

is we're looking at the areas in which students are showing deficiencies. So when we looked at our fall data of this year we noticed that several of our students in math -- and historically, you know, that has been an area of concern -- were landing, you know, below the grade level. And so we worked with our curriculum coach and developed a plan during our plus-time, that Ms. Whipps spoke about. And our plus-time groups are small and individualized and they are arranged by NWEA MAP scores, and in that case they were the math MAP scores. We trained our teachers in how to address the needs for those students in math. And a lot of it was simple basic math skills, a lot of multiplication facts, a lot of work with fractions, and we worked with those teachers so that they could carry that out in the I'm also going to let Ms. Whipps share classroom. what we're doing, as well.

MS. WHIPPS: Of course, as I stated earlier, we are -- we do have 80-minute periods a day, which gives us an opportunity to do interventions realtime. So something that we're doing, of course, with our curriculum is using our interactive notebooks and students are able to reflect on what we've talked about today, interact with what we're talking about

today. Our language scores are so high because we've
been focusing a lot on language and using a lot of
defrayer models to help them, because that's one of
the lowest areas on NWEA. Also, we are doing what we
call Show What You Know's. We don't tell the
students if these are assessments, but they are
assessments that students take every day when they
come in the classroom. It is based on a focus
standard in literacy and students are assessed on
these when they walk in. They take about 10 minutes
to take it. Then we give feedback directly to them
on it and then students give us their feedback. We
fill in any gaps that are missing, and then the next
day they're assessed again so that we can track their
growth with the standard and say yes, they've
mastered it and now let's move on to our next
standard. Also, during the pre- and post-assessments
data is tracked as well. We have PLC meetings with
our teachers where we discuss this data and we make
interventions for class for math and literacy
classes, as well as for science and social studies,
because they teach RI standards for literacy as well.
CHAIRPERSON COFFMAN: Dr. Gotcher.
DR. GOTCHER: Dr. Tatum
DR. TATUM: Yes, sir.

1 DR. GOTCHER: -- I remember my visit to your I had more hugs and I was involved in more 2 school. photographs than the Gotcher Family Christmas last 3 December. So, thank you. 4 5 DR. TATUM: I'm a selfie queen. Thank you for all the tweets and 6 DR. GOTCHER: 7 Facebook posts. 8 DR. TATUM: Yes, sir. 9 DR. GOTCHER: That was very kind, as well. So I want to share just a couple of things that I've 10 11 observed in the data that we've all had a chance to And I'm always intrigued by mission 12 13 statements; I'm kind of a geek on those things. And I was just curious, when was the last time your 14 15 mission statement was reviewed? And I have a follow-16 up, if that's all right. DR. TATUM: Yes, sir. We reviewed it actually 17 18 this past summer and we have made some additional changes that it fits Covenant Keepers and our mission 19 20 and vision of where we want to go. 21 DR. GOTCHER: The phrase that caught my eye, 22 because from my observation, from my personal 23 perspective, and based upon the incredible reports 24 I've heard today, you're much more than a college prep program. And in fact I think as much as I would 25

love to see all kids participate in college and career opportunities, that's just something that caught my eye and I think that's something to be reviewed. Just as an outsider looking in, you're much more than a college prep program for students; you're meeting the needs of a Whole Child, not just those that are pursuing college. And so that's just a freebie from me, so --

DR. TATUM: Thank you.

DR. GOTCHER: And the other piece, you're also meeting the needs of a Latino population that's pretty unique in this city. And so I'm curious, do you feel that the staffing, whether it's a support staff member -- one of the concerns that was listed in the report was how to be able to communicate with Latino families. I know you can't always use students to translate because of the confidentiality pieces. So are there plans to look at a fulltime Latino employee that can serve the families as they come in and their needs being met?

DR. TATUM: Yes. And I will let Ms. Jones speak to that. But if I could talk about the college prep?

DR. GOTCHER: Yes, ma'am.

DR. TATUM: 2008, that was our vision, mission, where we wanted to go. Every year it's twisting,

it's moving, it's changing. So I've already called the Department. I've asked about changing the college prep piece because we are much more than a college prep school. So I'm well ahead of the game

DR. GOTCHER: Okay.

DR. TATUM: -- to really be on track to get that not necessarily removed but do other greater things with kids outside of just sending them to college.

So with that being said --

DR. GOTCHER: Thank you.

MS. JONES: All right. Covenant Keepers currently has two bilingual staff members on hand. If one is not -- if one is absent, the other one is present. And they are there to communicate with teachers and with parents and with students that may need assistance. As far as teachers go, if there's an academic issue or behavioral issue, our bilingual staff member will call the parent and let them know and will also interpret during parent meetings. Our bilingual staff members will also translate any letters or memos that we send home so that parents are always in communication.

DR. GOTCHER: So as far as communication regarding parent/teacher conferences, you're --

1	that's part of the structure of making sure that a
2	bilingual communication is taken care of for all the
3	families? I'm sure that was in there but I was just
4	
5	MS. JONES: Yes, sir.
6	DR. GOTCHER: I wanted to hear it. Okay. And
7	one last thing, if I may, Madam Chair as I was
8	leaving the parking lot, that wonderful Latino
9	volunteer ran out to the car and took yet another
10	picture.
11	DR. TATUM: So you're not coming back because of
12	our pictures. Thank you.
13	CHAIRPERSON COFFMAN: Dr. Saunders.
14	DR. SAUNDERS: Yeah. I just wanted to get some
15	clarification. Looking at the I believe the graph
16	on the low performing, meeting MAP growth, is there a
17	way we can pull that slide back up? And I just want
18	to understand what I'm looking at a little more
19	there.
20	DR. McKENZIE: Is this
21	DR. SAUNDERS: That'll work.
22	DR. McKENZIE: This one?
23	DR. SAUNDERS: I think that'll work. Yes. So
24	if I look at this, if I'm interpreting this, it would
25	be, for example, in reading 72% low performing

	170
1	students are meeting annual MAP growth. And I saw
2	that for the low performing. Do you have any numbers
3	for all students?
4	DR. McKENZIE: Yes. The prior slide oops,
5	let's see if I can make it go the right way. This is
6	all students.
7	DR. SAUNDERS: Okay. It's all students.
8	DR. McKENZIE: 68%.
9	DR. SAUNDERS: And is this all three grade
10	levels combined?
11	DR. McKENZIE: Yes, it is.
12	DR. SAUNDERS: Okay. How many students are
13	included in this?
14	DR. McKENZIE: I think that we were talking
15	about 311. I can look to find out exactly.
16	DR. SAUNDERS: I think there's only 170
17	enrolled.
18	DR. McKENZIE: Oh, the 300 was the virtual
19	comparison group. So I think about 100.
20	DR. SAUNDERS: 100. What about the other 71?
21	DR. McKENZIE: Oh, I'm sorry.
22	DR. SAUNDERS: Okay.
23	MS. JONES: As Covenant Keepers does have a
24	mobile population, for a score to be counted they
25	have to have a fall score and they have to have a

spring score for them to have measured growth. If a student enrolls in January, they will have only taken the winter test and the spring test; they will not have had a fall test unless they have taken NWEA at another school. And most of our schools [sic] are coming from traditional public schools and they do not use NWEA testing.

DR. SAUNDERS: Okay. So approximately about 35 roughly in each grade level. And so you would have 70 out of 170. I'm trying to do the math quick in my head and I can't do it that fast. But is that your mobility rate within a given year for your student population? Is that typical?

MS. JONES: I don't think that that would be necessarily accurate because we're also talking about students leaving but also students coming in. This is all included in the mobility rate.

DR. SAUNDERS: Okay. So you would only have -out of -- I'm trying to understand. Basically, from
the first of the year to the end of the year, you
would have approximately 100 of the same students and
the other students in excess? Help me out just to
understand that. I'm trying to --

MS. JONES: Yes. That particular year, last year. We found that this year though our students --

24

25

we've been maintaining a higher percentage of our students this year.

DR. SAUNDERS: Okay. Is there a way you'd have access to -- I'm just curious how many students were included, just a total number on those?

DR. McKENZIE: Yes, I'll find that for you.

DR. SAUNDERS: Okay. That's all for right now.

CHAIRPERSON COFFMAN: Ms. Barnes.

MS. BARNES: Good afternoon, Dr. Tatum.

DR. TATUM: Good afternoon.

MS. BARNES: First of all, let me also say that I appreciate the presentation today, I appreciate all of the dialogue, and I particularly am appreciative of some of the other comments that have been made with respect to meeting the needs of specified populations. I listened to quite a bit of the information and, of course, my role at the Department in accountability I see a lot of other numbers as people are talking. I am encouraged with respect to growth and us looking more closely at growth. am also concerned that while there may be some improvements being made and we are in year eight, eight years of addressing academics, now we are beginning to understand and appreciate more of the wraparound services meeting the needs of the Whole

1 Child. I am -- I have yet to hear some things to push me over the edge with respect to what type of 2 other strategies are in place to address the 3 academics. Because at the end of the day we still 4 5 have to look at that. I understand that students come at very low levels sometimes with respect to 6 7 their performance, and I believe you even discussed in the presentation that most of them, many of them 8 9 come three years behind. So any growth is always to 10 be applauded but we can't be content. And because there is so little movement, I'm concerned about our 11 12 expectation. I know that the school is dealing with 13 constant fluctuations of student populations. And when you really boil it down to the non-mobile 14 15 population sometimes the numbers aren't great enough 16 to make movements outside of the data that is being shared through the MAP growth. Because when you look 17 18 at some of the other documents that we are using with respect to designations, it's not; it's declining, 19 20 the performance. So I'm not saying that there's not 21 growth, understand that, because I do understand that 22 there is growth. But the performance is already 23 starting so low that a lot of times it takes so much 24 more to get it up to and then over the hump. 25 -- you know -- I'm not negating that. I hope you

don't hear that coming from me, but there is great concern. Because not only with respect to the continued labels -- and, you know, I know; I understand what labels can do. I understand that it's difficult to overcome some things. But there are also, you know, continual concerns with what is the actual population. You know, our office had a lot of conversations during corrections period trying to make sure that we are accurately reflecting what's happening. So I'm not discouraged but I am gravely concerned because I know that I have a responsibility.

DR. TATUM: Yes, ma'am.

MS. BARNES: While I see great things happening for some, and maybe even all of the students -- I don't know -- I cannot be content with the constant bottom performance, the lowest performance, the bottom 5%, Priority schools, academic distress.

First year we had schools in academic distress under the new legislation. You're there. The next year you're there. And so I need some help is what I'm trying to say. I looked at 15, 14, 13 with math and literacy combined and it was declining. I looked at

DR. TATUM: Would you go back and say -- you

looked at math and it was what, now?

MS. BARNES: Literacy and math combined.

DR. TATUM: Okay.

1

2

3

4

5

6

7

8

9

10

11

12

13

14

15

16

17

18

19

20

21

22

23

24

25

MS. BARNES: Because, you know, I'm looking at it and each year it has -- it's going down; it's not going up. But now, again, that's -- because we're looking at the non-mobile population over three consecutive years, the three years combined. And so I'm trying to grasp at what I can hold onto because I get a warm feeling, understand. I feel great knowing that the Red Cross is joining hands. I'm not --

DR. TATUM: Salvation Army.

MS. BARNES: Yes. Excuse me. Salvation Army. I remember seeing red or that might be my rose colored glasses. I don't know. But, yes, I remember Dr. Tollett talking about how they are reaching out. I appreciated Dr. Guerrero explaining how critical it But I'm also thinking -- so because you do have a high Latino population, why haven't -- are we not also looking at during parent conferences having a way to translate while we're talking? Because, you know, there's so many digital ways to do that now. can -- a parent can type in a question in Spanish and it shows up in English. I mean, I'm just saying I didn't hear some of those kinds of ways. I heard we

have two people, one or the other. I'm not saying those are the only things. I'm just trying to find where we're reaching deep and pulling up strategies and where we're showing success outside of "we have some growth." And, you know, even our targets, our AMOs were so miniscule this time, but we didn't -- we made it. I mean, I'm looking at the reports; that's what I'm saying. So talk to me outside of my emotions and give me something to --

DR. TATUM: Yes, ma'am. We can do that.

MS. BARNES: Thank you.

DR. TATUM: Okay.

MS. WHIPPS: Before Dr. Tatum speaks, I just want to share one thing and make sure you guys remember this, that every year we lose one-third of our population and we have to start those interventions over again with the new ones that come in. So they have to get acclimated to what we're doing. And, again, they're coming in really low and we're growing them up. We're doing something that they weren't getting before they were coming in. So even though the test is showing, hey, they're not proficient, you know, when you break it down and look at how many years of growth that they've made, you know, we are making a difference for them. And,

again, I'm not trying to play on the emotional side but academically, if these students had proceeded with where they were, by the time they're leaving 8th grade and going to high school they would be even more behind. So we're building them up as much as we can and we know growth takes time. You know, you're not going to be proficient by the end of a year if you're coming in on a 3rd grade level and you're in 8th grade. So we're doing, you know, everything we can, putting everything in place we can so we can make sure that they are able to succeed and be able to take their educational career on into high school.

MS. BARNES: Thank you.

DR. TATUM: And, Ms. Barnes, just a couple of things to consider. When we left 8300 Geyer Springs we -- that was the first launch of Common Core; we were still under benchmark. That was another animal. Then we got into 5615 Geyer Springs Road, second year of Common Core, final year of benchmark. Okay. That -- so now two years, now going into PARCC one year, ACT Aspire and then we're dealing with the influx of -- well, the testing cycles and things that are changing. Since then, we've had two external providers. I made a choice the second year we were in -- an external provider, or looking for one, we

reached out to APSRC because we truly feel they are the best. They were not available or they couldn't because of the manpower or whatever. They're here to speak on their behalf. Nonetheless, this year still did growth. Last year, as you heard, from June and now moving forward, let me tell you some things that we have done internally to insure we're going in the right direction. Two years ago, we adopted Engage New York and Expeditionary Learning.

MS. BARNES: I'm sorry. The first one was Engage New York?

DR. TATUM: Engage New York and Expeditionary Those are curriculums where teachers don't Learning. necessarily have to be burdened with lesson planning, but they're blueprints that we use across the board. And so in aligning that, that has helped us with the jump in NWEA scores. Because as an instructional leader I'm like you, Ms. Barnes; I want to know that we're doing something out there. I don't want to just sit on 56 -- or sit at 5615 and we're twiddling our thumbs. Great things are going on. Then we had to align the curriculum, then we went into the GANAG lesson plan schema that we're doing across the board. So as we're using that, we've implemented the interactive notebooks. We have daily formative

assessments, Show What You Know, PLC meetings. This is something that has really been a safe haven for us. When Ms. Pfeifer --

MS. BARNES: Pfeffer.

22

23

24

25

DR. TATUM: -- Pfeffer asked us about how are we retaining teachers, as an instructional leader and as an educator -- I'm an educator first and I know how much -- how important it is to have a teacher in the So we implemented -- I implemented a classroom. teacher support cycle. That teacher support cycle allows us time to sit down with every teacher, not only my leadership team, my self, asking them how do they know they're moving toward proficiency. Our teachers can tell that. Over the last two years we have successfully implemented and started using the data scores to get us on track where we're going. Through that teacher support cycle Principal Blocker has come alongside; we have implemented a new demerit It's rolling out, as he said. At first, system. there was grave concerns because our teachers -because our students were out of school or in-school So we've had to make a shift in this suspension. particular population in order to make sure, as the instructional leader, everybody is going in the same direction. I have to insure that through my self and

24

25

Ms. Clancy meeting with teachers every other week to insure that they are not twiddling their thumbs in the classroom. They are rolling out the lesson plan. And Ms. Whipps, she talked about the whole curriculum and how that's rolled out. I can assure you, yes, the growth is quite low. As you know, 90% of them are coming in well below grade level.

And this also is another factor that I definitely need to mention. When we asked the Board three years ago to allow us an opportunity to get a longer stretch-way -- we wanted to get on a longer runway -- we recognized then, three years ago, we needed more time. We're asking now give us the time to get on the longer runway. Three years, yes, we've done well. We have done very well. But when you're working with three years of time, a population which we know that has challenges, and we're putting layers in place in order for us to really teach our children -- if you note our Hispanic population, they don't necessarily have an over abundance of problems. we've begun to use the wraparound services to really help with our African American families. Because those wraparound services, they're needed when they We just had -- there was an announcement come in. that was made with two schools in our areas.

had a flood of calls from those parents and we have a waiting list. We need a stretch of time. We need a runway to show you all that we're doing something very well, very special in southwest Little Rock.

So -- and, Ms. Barnes, to that point I'll let
Ms. Whipps begin to speak. But all of those things
that I mentioned we have put in place. We have
consistent teachers that are there every day. We
haven't had the high turnover this year. So progress
is being made. It may not be where you want it to
be, but progress is being made and the proof is in
the pudding.

MS. BARNES: Okay. Before -- yeah, I don't want to take up all of the time.

DR. TATUM: No, ma'am.

MS. BARNES: But what I do -- you know -- and some of my colleagues may also need to ask a couple of questions. So before you move forward, I did have one other question that you might want to be addressing at the same time.

I was looking at the information with respect to 13-14 school performance growth for literacy and it's a comparison of the other middle schools, some of the Little Rock School District middle schools. And you have Covenant Keepers at 49.09 and that was for 13-

14. So for 14-15 we are well below that, you know, and I'm not -- I don't have the comparison for the other three. But I'm simply saying that those are the kinds of things that stand out for me, is that while I recognize you're having to regroup and you're having to double-up and catch-up I still -- we're still where we are, I guess is what I'm saying. I'm not telling you that I don't see some progress.

That's not what I'm saying because this is a much better presentation. I can see and hear and I see the growth, the changes. But I'm going to be held accountable for making some decisions that affect the lives of children, and so that's why I sound the way I do. I don't -- it's not personal to anyone.

DR. TATUM: No, ma'am. We know that.

MS. BARNES: I know you don't take it that way.

DR. TATUM: No, ma'am.

MS. BARNES: But I recognize that there may be some urgency in my voice because we've been here before. And so I need something. Because right now -- and I certainly will say I understand you need time to get it working. But when you start a presentation with eight years and then you say we need time, then that -- it doesn't balance out for me.

1	DR. TATUM: And, Ms. Barnes, now consider just
2	the three years. If you go back and you look at the
3	first five years, our growth was there. We were
4	making that growth; not at advanced levels, we were
5	not. The last three years, that's when the
6	instability in the growth began to happen. So when
7	we talk about eight years I don't want us to think
8	it's been eight years of challenges. No, it has not
9	been. It's been three years where we have not been
10	able to get into a benchmark set where we can
11	actually show where we're going. So the only thing
12	that we're using is the NWEA to really pace us and
13	get us where we need to go. So, Ms. Barnes, I don't
14	want it to be eight years.
15	MS. BARNES: Okay. I won't go with eight.
16	Let's go with in 2013, which was based on the most
17	recent
18	DR. TATUM: Yes, ma'am.
19	MS. BARNES: three years, which means that
20	that's the year before 2013 and the year before 2012
21	
22	MS. WHIPPS: And I can speak to that.
23	MS. BARNES: all included, and that's when
24	MS. WHIPPS: Yes, ma'am.
25	MS. BARNES: the academic distress

designation was first --

22

23

24

25

DR. TATUM: Correct.

MS. WHIPPS: One of the big things -- oh, I'm sorry; I don't mean to cut you off. One of the big things that we were going through, of course, was the change to Common Core and, you know, it becoming you must teach, you know, the Common Core standards. our big thing then was professionally developing our teachers, making sure we can do the rigor, making sure, you know, we have the right curriculum. wasn't until the end of that year that we actually, myself and one of the math lead teachers, discovered the Expeditionary Learning, which we are using now. So we were actually trying to get things in place ourselves with that change and not to make it as an excuse or anything. But we were doing pretty good until it was time to change those standards, and now we have to learn these all over again. And, you know, with teachers coming out of school that's fine, but teachers who are going through school, like me, and we've only known Arkansas, that was a big challenge for us in getting our students there as well because our minds were set in Arkansas standards. So we dealt with changing to the new curriculum, changing our lesson planning schema,

including some innovative things that other schools were doing would definitely push us toward the right direction. And it's been within the last year when we actually began developing things ourselves based on the knowledge that we now have from Common Core, again during our plus-times, doing individualized things for students according to what we see on NWEA. This is pull-out time for them so they can work on programs, such as Khan Academy for math or Reading Plus for reading, which gets on that student's level and it doesn't take an individual teacher standing in front of them to do that.

Also, again, those 80 minutes built into class time, we've always had that. We've never experienced it the way that we've experienced it within the last two-and-a-half years, and using it toward focusing in the math class on interventions for math and focusing on interventions for literacy. So I know one thing that you're looking for is what are y'all doing; we want to hear what you're doing. And our interventions are what we're doing. We have decided that every moment that we have to intervene we're going to intervene in math and literacy class and science and social studies. Intervening with us, we feel like we are going to push them over to that next

	186
1	level.
2	MS. BARNES: Thank you.
3	CHAIRPERSON COFFMAN: Dr. Gotcher.
4	DR. GOTCHER: Dr. Tatum, you said something that
5	I had chosen not to ask any questions because of your
6	enrollment numbers, but you said you have a waiting
7	list now because of some changes in the Geyer Springs
8	area. Is that correct?
9	DR. TATUM: That is correct, sir.
10	DR. GOTCHER: Okay. Therefore, let's talk about
11	your lottery process. Will a waiting list cause you
12	to have a lottery, I guess, for enrollment for next
13	fall?
14	DR. TATUM: Yes, ma'am. Yes, sir.
15	DR. GOTCHER: Okay. And I think the
16	encouragement, based upon the remaining concerns from
17	the application, it will be very important that you
18	have that you work with Ms. Boyd and have a good
19	transparent documented lottery process. So that's
20	encouraging because that means you have a waiting
21	list, but it also means just an urgency to make sure
22	that that is a well-documented and transparent
23	process. So that's just a bit of encouragement for
24	that.

DR. TATUM: Thank you. And as we move forward,

25

we're in southwest Little Rock area and our growth 1 comparisons show much better, that we're the better 2 option in that area, especially after two schools 3 have made that announcement. There is really no 4 other middle school out there in the area. I've had 5 conversations with the superintendent of Little Rock, 6 7 other individuals out in -- key leaders, key city directors in southwest Little Rock, coalitions, 8 9 associations. I even had a conversation with the 10 mayor. We've made a choice to stay out there. Our 11 needs are great; we know that. We're not standing 12 here making the excuses. The proof is in the 13 pudding. We know we're making an impact. One year, everybody -- it hasn't been a stable place for 14 15 benchmarks. Now we're moving forward. We have to remain out in southwest Little Rock to make an 16 17 impact, to do greater for our children. And I can 18 guarantee you Covenant Keepers is on track. making -- are we there moving toward proficiency? 19 20 We're going in that -- a growth mindset; we're moving 21 in the right direction. And when I say a longer 22 runway I'm not talking about time. Eventually, we 23 want to be a feeder school rounding down. We need 24 time to be able to work with our children. When we 25 were here before, three years ago, we asked. We need

time, real time to come back and to show you what we're doing to make our -- to work towards proficiency, even greater. So those are my remarks. Thank you, Dr. Gotcher.

CHAIRPERSON COFFMAN: Ms. Smith.

MS. SMITH: Dr. Tatum, I just wanted to kind of highlight a couple of things that I heard in today's presentation. One of the things in your application, it referred to this year as the come-back year. And within some of your presentation and within the different speakers, some of the things that were alluded to was the formative assessment, daily formative assessment being used within your staff, the professional learning communities working around that formative assessment. The NWEA growth, working with the Office of Educational Policy to assist with that and looking at that growth to me was impressive. A question around the NWEA growth: did y'all take the winter test for this year, right now, from --

DR. TATUM: Yes, ma'am.

MS. SMITH: -- the fall? And how is that growth looking right now in comparison to last year's data?

MS. JONES: So when we look at the students and how they have scored from fall to winter, 57% of our students made growth on the reading test and 64% of

our students made growth on math.

MS. SMITH: Okay. So right now, you're on track for a higher yield at the end of this year than you were last year?

MS. JONES: Yes. And definitely for math. And we believe that's because of our plus-time implementation and having that individualized time with the students.

MS. SMITH: Okay. Another comment that was made within presentations today, this was by ADE staff, Dr. Wilde specifically mentioned the last two years of being a collaborative -- much more collaborative in the work with Covenant Keepers, which I think is important to note. Within that, the principal -- sir, if you'd come up, the principal -- you started last year, in February, and then full-time this year?

MR. BLOCKER: I started last year, in February, full-time in February as the dean of student affairs.

MS. SMITH: I personally believe the building administrator is one of the key people in a school. Okay? And so if this is truly the come-back year, I think that you probably have a lot to do with that. So, one of the things that I would like to kind of ask you about a little bit more -- first off, congratulations on that.

MR. BLOCKER: Thank you.

MS. SMITH: You had alluded to earlier on about your one-to-one with discipline --

MR. BLOCKER: Correct.

MS. SMITH: -- and your approach in that. And I'd like you to share a little bit more about that because that was probably one of the things that stood out to me. And you guys did site it within your application, but when you look at your total of 231 either in or out of school expulsions with 171 students that's a lot. And so your approach this year and your change, what changes are you really seeing?

MR. BLOCKER: Well, we're just doing more culture sensitivity training and working with the students and working with the teachers to help them understand the population better. And the one-to-one interventions is just when we notice a disconnect there's a miscommunication a lot of times between the student and the teacher. And because of the population that we serve, a very risk adverse population, sometimes they don't know how to manage their emotions very well or how to communicate what they really feel. And so when we notice those disconnects we foster an environment to allow them to

25

communicate very freely, openly and respectfully. Because as adults, as educators, as teachers, as administrators, sometimes we want to demand the respect and we have to earn the respect of the students. And the students, they have a voice and they want to be heard and we notice that when we allow them the opportunity to be heard instead of disrupting the class and going back and forth in the classroom. When we foster that environment we realize that there's just a break in the communication. And working with the teachers to help them understand how to communicate with this particular student, because they all are different -you can't use the same approach with all the students -- and working with the teachers, we've had a high success rate with the interventions.

MS. SMITH: I noticed that you said your team was doing the Ruby Payne. Is that something that you're doing through school-wide or is that just something you're working with your leadership team on?

MR. BLOCKER: Well, that's something where we've adopted the concepts of the Ruby Payne. One particular concept that I brought onboard is SOAR with Susan Kruger and -- but that's what I'm most

1 familiar with. I've researched the Ruby Payne and studied up on it, as far as understanding how the 2 male and female deal with their emotions and how to 3 help them manage their emotions. But the SOAR 4 5 curriculum has really helped, you know, teaching these students how to set goals and be organized and 6 7 feeling comfortable asking questions. Sometimes a student will sit in class and they don't know because 8 9 they won't ask the questions because they're 10 embarrassed or fear that their peers may make fun of And so we empower them to, you know, ask the 11 them. questions and teach them -- you know, acknowledge --12 13 raise your hand and wait to be acknowledged, and if you don't get acknowledged write it down and ask the 14 15 teacher later. You know, working with Aviamiel, you know, this guy, you know, he's an artist and helping 16 -- you know -- the SOAR curriculum helps them --17 18 helps us to identify the students' gifts and They call them "super powers." And so in 19 strengths. really working with Aviamiel -- and he was featured 20 21 on Fox 16 Good Day. He's a poet; he's an artist. 22 And so we're really encouraging him to pursue his 23 future in art some kind of way. So that's what we're 24 doing, just working with the teachers and the 25 students to help them understand the different

dynamics of what it means to be a struggling student.

MS. SMITH: Well, and when you're talking about behavior in the realm that you're talking about behavior, there are definitely teachable moments there, and so having that structured curriculum in that area is a plus. Also, just a note on your structured curriculum that you guys have adopted in the last two to three years with the change -- probably with the high teacher turnover rate, that's needed and so I'd encourage you to continue that.

MR. BLOCKER: Thank you.

MS. SMITH: On your professional development plan, lots of work there as far as like doing your walk-throughs and things like that, but getting that more down to a instructional piece --

MR. BLOCKER: Gotcha.

MS. SMITH: -- I think is a highlight. One last question and I will be done. I noticed that -- I know this is a 6-8 school. Okay. So how do you help transition your kids either coming to your school or leaving your school? And what's the plan there? So how are you going to insure when your kids leave you that they're going to be successful in their next phase? And that may be a question for Dr. Tatum.

MR. BLOCKER: Well, I can speak on it a little

2

bit. One of the things we're focusing on is developing the Whole Child. I mean, we do know it's about academic achievement. However, research has proven that students do better when you -- when they're emotionally and physically healthy. So that's one of the things that we're focusing on. So I'll let Dr. Tatum speak on the rest.

DR. TATUM: What we're doing to transition students out is we look at all of the high schools' open enrollment or their time, such as Parkview. We look at that and we begin to have conversations with the parents about specific schools. Every year on -this year, with 3rd and 4th, I'll be sitting with every teacher -- not every teacher -- every parent and their 8th grade student and they'll tell me pretty much where they want to go, their desire. so those conversations happen every year because I just don't want them to be disconnected after they Many of our parents call back if it's not the leave. right fit; we work on another alternative place for the child to be. So it could be Pinnacle Pointe, it could be Parkview, other charter schools; it could be anywhere. But I sit down intimately with every parent and their child to really hear what their desire is and we move forward on that.

1 success rate has been phenomenal.

23

24

25

MS. SMITH: Okay.

MS. JONES: I'd also like to add something. Speaking of our students, how we know they'll be successful in the future, I'd like to speak on the students that have been with us for three years, our students that are currently 8th graders now, that were with us in 6th grade. And when we look at our NWEA data we show that in math -- you know -- we're still working on building them up and on average students have grown from a 4th grade level to a 6th grade level, which is not on grade level; we understand that. But in ELA those students that have been with us for three years, 55% of them are now in the 50th percentile. And as Dr. McKenzie was saying, that's not necessarily where the ACT Aspire has them, but we know that that is a lot closer than we've ever had our student data show before in reading.

CHAIRPERSON COFFMAN: Dr. Saunders.

DR. SAUNDERS: Did you get those?

DR. McKENZIE: Yes, I do have those for you.

DR. SAUNDERS: Okay.

DR. McKENZIE: I had 133 students tested in the fall, 146 tested in the spring. I show October 1 enrollment on OEPs website as 157. There was 100

kids that were tested in reading both times, 97 that 1 were tested in math both times. 2 3 DR. SAUNDERS: Okay. DR. McKENZIE: So there are some -- about 30 4 that were only there in the fall and about 50 that 5 were only there in the spring. 6 7 DR. SAUNDERS: All right. Thank you. DR. McKENZIE: You're welcome. 8 9 DR. SAUNDERS: And I think this would be for Dr. 10 I have some concerns and that's why I want to look at that data carefully. I know last year we met 11 12 and I remember last year you were asking, said we 13 just needed some more time and presented data on growth specifically with the math and the growth of 14 15 your students and how they were doing well. 16 look at the ESEA reports from this last year and I 17 look at your largest race subgroup, the African 18 American group, and I look at English Language Arts, and of 58 students tested only three were achieving. 19 When I look at mathematics there were 59 that were 20 21 tested and only one ended up achieving. And so I see 22 that as being contradictory to the growth reports, as

Sharon Hill Court Reporting (501) 847-0510

could, just address that for me.

we saw last year when you were before us. So if you

DR. TATUM: Well, I still have to go back to the

23

24

25

data that we know. When we look at the last -- I guess the ESEA report, is that -- those are PARCC?

DR. SAUNDERS: Yes, ma'am.

DR. TATUM: Those are PARCC. Well, I would say that was the one-time test and then the shift is happening to ACT Aspire. I would also say that it still didn't allow us time to really build the -- it didn't give us time to really measure in one year where our population would really be. So, but again, we take the NWEA test and we begin -- we look at that and that has become our trajectory where we're moving towards proficiency or how we're growing our students. And so I would like for -- come on, Ms. Clancy.

MS. CLANCY: One thing to keep in mind is the ESEA reports, the numbers that you're looking at, that's proficiency. What Dr. Tatum -- what we've all been talking about, what we talked about last year was growth. So those don't always look the same. And when you look again at the data that we've showed you where we test students when they first come to us and 90% of those kids come to us below grade level -- in some cases, far below grade level -- no, they're not going to be proficiency the next year; sometimes even three years later. And so that's what Ms. Jones

2

17

18

19

20

21

22

23

24

25

was referring to when she talked about the numbers just a moment ago about when the 8th graders leave us after having been with us for three years.

DR. SAUNDERS: Under that mindset then, do you always anticipate to have students enrolling at the levels that you're currently receiving?

DR. TATUM: It depends on the Priority and the Focus schools. As we noted, 61%, that is not an No, that's not what our expectation is and excuse. that's not what we're enrolling. Mr. Anthony Phillips, Mr. Phillips, he spoke very well. His child was failing four subjects from -- when she entered from Texas, and she came into Covenant Keepers. After being there, we recognized she's a very intelligent young lady. She had the academics but she needed a structured environment where she could grow. She didn't come here four grade levels She's a quite -- she's a really bright child. below. So, no, they're not all four grades below grade level but it's some things we have to put in place internally for children to grow. And we did that for his daughter.

DR. SAUNDERS: And I think what I'm trying to say is if -- at some point growth has to turn into performance --

DR. TATUM: True.

1

2

3

4

5

17

18

19

20

21

22

23

24

25

DR. SAUNDERS: -- if we expect different results in the end. And so if we have high growth, if we're showing high growth, saying everything we're doing is good for these kids and we're going to always get the same level of incoming students, then will we always expect this performance?

DR. TATUM: And, sir, when we talk -- no. that's why we work with our feeder schools out in the area to get the information, work with the children that are coming to us from the elementary schools, begin to have meetings, entrance interviews, and just really talk, commitments, conversations to really find out real early where their kid -- where they And so when we look at just the box that we're in, we're making great runs. We're making great growth. So, Dr. Saunders, growth for us will turn into proficiency. That's just not a mindset, but we want every child to experience a level of celebrations, yeas, different things where they are. So we were so in a rush to proficiency, which is right, we were leaving some of our children behind. So now over the years we've paused and we had to give every child a chance, intimately, to show growth and we've done that. We've done that.

	200
1	DR. SAUNDERS: Okay. On this, on just a quick
2	side note, what's your current cap?
3	DR. TATUM: 380.
4	DR. SAUNDERS: 380. Okay. So you would not
5	need to initiate a lottery unless your number of
6	applicants exceeded 380. Is that correct?
7	DR. TATUM: Our seats it's the number of
8	seats in our building and the capacity we have will
9	not allow us to have 380. That's 380 on our
10	application, but our seats are full at our school
11	now.
12	MS. BARNES: How many is that? How many,
13	again? So I know I mean, how many do you have?
14	Since your seats are full what's your
15	DR. TATUM: We have 172, 71 students.
16	MS. BARNES: Okay.
17	DR. SAUNDERS: So the number of students
18	enrolling, if they exceed that number a lottery
19	process would take place. Am I correct in
20	DR. TATUM: Yes, sir.
21	DR. SAUNDERS: understanding that?
22	DR. TATUM: Yes, sir.
23	DR. SAUNDERS: Okay.
24	CHAIRPERSON COFFMAN: Ms. Pfeffer.
25	MS. PFEFFER: So these questions kind of follow-

up on what Dr. Saunders had been asking. 1 looking at your goals and when I pull up the packet 2 -- it is on page 17 of the packet from the posted 3 information. So I'm looking at the three columns 4 5 where you had the performance goal, the tracking tool and the timeframe. And if I'm understanding right, 6 7 your growth goal comes into play -- it's that last one listed there, 70% of students will meet their 8 9 goal as determined by their designation on the 10 Covenant Keepers wraparound growth goal model, as measured by the NWEA MAP assessment. Is that --11 12 that's correct? 13 DR. TATUM: We're trying to find it on the application. 14 15 MS. JONES: Yes, that's correct. 16 MS. PFEFFER: Okay. So it's your -- and this goes back to the question I asked Dr. Davis [sic] 17 18 about the alignment between NWEA and our future state assessments, that if there is a correlation then as 19 20 your students are meeting exceedingly or -- yeah, if 21 they're meeting their growth goals, at some point 22 that ought to translate into higher levels of 23 performance. 24 MS. JONES: Yes, ma'am. 25 MS. PFEFFER: Okay. But then when I look at

your performance goals in terms of proficiency -- and this may be a point of conversation -- your goal is that the proficiency level will be 3% higher than Cloverdale Middle School and Mabelvale Middle School and LEA -- or ELA in math.

MS. JONES: Yes, ma'am.

1

2

3

4

5

6

15

16

17

18

19

20

21

22

23

24

25

MS. PFEFFER: Both of those are Priority schools, as well. So I quess when I read that and I'm thinking in terms of proficiency and performance, are those the goals that we need to set? Do those goals align with expected growth in terms of performance? And we also need to be looking at growth in terms of performance associated with this future -- well, this year's state assessment and future because that's where you're going to start seeing the match between growth and performance in terms of proficiency. So I just -- that gave me pause when I read that. When I first read it I was thinking 3% and then when I looked at the comparison group that -- I guess I have some questions about I don't know, my colleagues may have some comments to that as well.

MS. JONES: Yes. I'll go ahead and address the 3%. Eventually, we don't want to have to compare ourselves with other area schools. We want to be

able to compare us to ourselves and the progress that we've making. We want to allow for some time for the testing to stabilize. So starting out, we would compare our results with other schools but we want to go ahead in the future and compare ourselves with ourselves and the progress that we're making along the way. So I don't believe the 3% was ever meant to be the end goal.

MS. PFEFFER: But I guess my concern is more with the comparison group being other very low performing schools. That's I think more of my pause, so --

MS. JONES: The reason we have chosen those schools is that's the -- those are the neighborhoods that our students come from. If our students weren't attending Covenant Keepers, the majority of them would be at Cloverdale, would be at Mabelvale, would be at Henderson.

MS. BARNES: Okay. And then I'm done -- CHAIRPERSON COFFMAN: Ms. Barnes.

MS. BARNES: -- believe it or not. I want to say that -- and I was listening to Ms. Pfeffer and Ms. Smith and Dr. Saunders' questions. So here's what I'm trying to say to you. I'm trying to say that I understand everything that we have discussed.

2

3

4

5

6

7

14

15

16

17

18

19

20

21

22

23

24

25

Growth is probably where your charter should be aiming rather than fitting into a traditional mold. However, even with growth you could meet your AMOs last year based on performance or growth; you didn't make it on either. But I do believe that in light of -- because Ms. Smith hit on what I had intended to talk about, and that was -- I was listening to Dr. Wilde and I listened to the fact that he said over the last two years things are beginning to morph and gel and begin to move in the direction that the relationship of the School Improvement Unit has with other -- any school district; it's beginning to take I also listened to the fact that the principal has put some things into place with respect to understanding that we all are different, we handle our emotions differently, and, of course, unless a student feels safe and secure it's difficult to sit down and work on academics.

You know, I'm trying to make sure I hit all the things that I intended to say before we went around the bend. So I get that we are now again looking at a crossroad with Covenant Keepers because you have the very same issues that many others have with respect to transitions of assessments. What you have that is possibly a little more unique is your

2

3

4

5

6

7

8

9

10

11

12

18

19

20

21

22

23

24

25

population and those -- the populations or subpopulations that you're showing greater gains with than with others. The instability of the assessments have an impact, sure; instability of personnel. assume you have -- you're now feeling a little more comfortable and you feel like you're rounding the bend to get on track. Because I always feel that we need at a minimum two years with some stability in order to look at anything; even to show growth we have to have at least a couple of years. I'm willing to accept the fact that you feel that's where you are "We're getting ready to -- the State has Okay. now. said that they're going to be a little more stable with the assessments; if you want to make a decision, make a decision based on when we get stable." saying you may want to look at some adjustments also with respect to how you plan to measure success. think that, in and of itself, would temper a lot of the concerns because then we could actually measure If we're talking about growth, apples with apples. if we're talking about moving the needle, if we're talking about making the change, yes, over the long haul if you start to see growth and it's consistent it will equate to improved performance and achievement.

2

19

20

21

22

23

24

25

And so I don't know really how I plan to do it but I'm willing to make a motion at some point. I'm really done. I just wanted to -- I wanted you to understand I recognize -- I've worked with oppositional student populations over my career and I worked with middle school students. So I get the challenge and I did understand why you had the comparison, because you have to compare it with the schools in the area. And unfortunately that's something that we're challenged with in the state but particularly right now in this area that at a very critical grade span and level we are seeing failing populations and we need to make that look differently. We need to make opportunities for So unless other people have some concerns or questions I'll make a motion.

MR. ROGERS: Let me ask.

CHAIRPERSON COFFMAN: I've got several. Mr. Rogers.

MR. ROGERS: I'm fixing to change it completely up. I have just two things. One is I pulled up the APSCN bank rec. report and the checks outstanding, there are two that are three years old and four -- and three that are two years old. So I just wondered if we could take a look at that and find out what's

going on with that.

The other thing that I have is on the EBD report it shows that Covenant Keepers was late filing and got penalized \$100. And so I was wondering if that's one time or is that something that --

DR. TATUM: I'm cringing myself.

MR. ROGERS: By the look on your face I take it you were surprised too.

MS. MARQUITA HILL: I'll speak on the EBD checks. It was that time because we have to take our mail to a different area. We're in a building with other businesses, so the mail did not get picked up until late. So that's not a consistent --

MR. ROGERS: Okay. So --

MS. HILL: So we're working on actually trying to -- we don't get the mail at our address and we can't get it picked up from our address. So that's something we're trying to work on with the Post Office so we won't keep having that issue of mail getting picked up -- getting to us late or getting sent out late. And he'll speak to the bank rec.

MR. ROGERS: Okay.

MR. HAMILTON: Deron Hamilton. We are a CPA firm; we do some consulting with Covenant Keepers.

As far as the outstanding checks, we have confirmed

	200
1	with the vendors and those checks will be removed off
2	of there. We just wanted to do our due diligence to
3	make sure that they were not checks that would come
4	back
5	MR. ROGERS: Right.
6	MR. HAMILTON: to bite us in the future.
7	MR. ROGERS: Right.
8	MR. HAMILTON: But we're comfortable that those
9	checks are going to be taken off the system and so it
10	wouldn't be an issue going forward.
11	MR. ROGERS: Okay. When are they going to be
12	taken off the system? I'm sorry.
13	MR. HAMILTON: We'll have them taken off
14	probably actually, it was scheduled to be taken
15	off last month. It was just we took them we
16	wanted to make sure before we took them off, because
17	some of those are like real small dollars
18	MR. ROGERS: Right. Right.
19	MR. HAMILTON: and it was going to a vendor
20	where it's hard to get someone on the phone to say,
21	"Is this a good check or not?" But we're going to
22	make sure that they're off here in the next we'll
23	make sure actually, this reconciliation.
24	MR. ROGERS: Okay. All right. Thank you.
25	CHAIRPERSON COFFMAN: Dr. Saunders.

DR. SAUNDERS: Yeah. I just had a question. I know that on this particular item we have two issues, one concerning Priority and one concerning renewal, and wondering will we be handling those separate or as together? I know this is kind of one, I mean, but prior to any motions -- I know on the renewal I have lots of questions concerning the waiver requests and I haven't -- I was looking at it. Currently, it's just been Priority first but I may be looking at it wrong, so --

CHAIRPERSON COFFMAN: Ms. Davis, your advice?

MS. DAVIS: You don't have to -- you can do it

all in one motion or you could do it separate. I

mean, if there are concerns about whether or not you

are going to renew them or non-renew them, then you

might want to handle that separately and then you can

go into how you want to deal with their Priority.

But you don't have to; you can do it in one motion.

CHAIRPERSON COFFMAN: Okay. Dr. Saunders, if you have questions about the waivers, go ahead and ask those.

DR. SAUNDERS: All right. Dr. Tatum -- give me just a second to get it up. All right. From my understanding, I'm looking at the new waiver requests, looking at a waiver from teacher planning

time, duty-free lunches. Is that correct?

MS. CLANCY: Yes, sir.

DR. SAUNDERS: What are you planning on doing different that you would need those waivers?

MS. CLANCY: Those are not new waiver requests. We've had those since inception and those are in place just in case we need them, if we're getting more flexible with our teacher prep time.

MR. WALTER: Madam Chairman, may I address the Panel?

CHAIRPERSON COFFMAN: Absolutely.

MR. WALTER: All right. Thank you. Dr.

Saunders, to address your questions, I think the two things that those waivers have in common is they're not a diminution in the time that's the statutorily required time that Covenant Keepers has to provide in those areas; it's just asking for flexibility as to how they're provided. For example, with the planning period it's certainly the intent to provide the full 200 minutes. It's just that the statute, as you know, requires they provide it within the instructional day. Because Covenant Keepers has extended hours and extended day, then they're just asking that that be moved to a later time in the day that's non-instructional.

	211
1	DR. SAUNDERS: So it would be after the school
2	day?
3	MR. WALTER: Yes, but still within the teachers'
4	employment
5	DR. SAUNDERS: Okay.
6	MR. WALTER: per their agreements but not
7	within the actual instructional day.
8	DR. SAUNDERS: But this is a new waiver, is that
9	correct?
10	MR. WALTER: I think it's a new an
11	explanation of
12	MS. CLANCY: Right.
13	MR. WALTER: a utilization of a currently
14	held waiver.
15	DR. SAUNDERS: Okay. And the duty-free lunch?
16	MS. CLANCY: It's the same thing. We've had
17	that in place.
18	DR. TATUM: Since the inception.
19	MR. WALTER: So I think the intent here was as
20	part of their renewal process, when we had to go
21	through a waiver examination process, anyway is to
22	kind of not only bring up new waiver requests but
23	find a vehicle in which we could better explain the
24	ones that are in place now and how they're currently
25	going to be utilized.

1	DR. SAUNDERS: Okay. And then, seat time?
2	DR. TATUM: The seat time is pretty much the
3	it is the same, but we have implemented a plus-time
4	in order to give us that flex in our schedule. So we
5	want children and wait a minute. Okay, I'm trying
6	to find it here. Hold on. The seat time is because
7	of the digital coursework, project-based learning,
8	and the RTI. That's why we wanted to ask for that
9	particular waiver.
10	DR. SAUNDERS: Can you give me an example of
11	for example, a grade or subject and what that might
12	look like?
13	DR. TATUM: Well, we have Reading Plus, so it
14	would mean that or keyboarding, where the children
15	are actually still getting academic time during those
16	during the seat time.
17	DR. SAUNDERS: That's only for keyboarding. Is
18	that what you said?
19	DR. TATUM: No, sir. It's not only for
20	keyboarding.
21	DR. SAUNDERS: Okay.
22	DR. TATUM: And it's also we have a Reading
23	Plus and other digital courses that we provide to our
24	students. We use a computer lab where we have two
25	particular computer labs where children can get

1	digital coursework, as well as we have Ingenuity
2	where our students are getting that seat time and
3	taking that online course, which is our Algebra 1.
4	So when we talk about seat time that helps us to roll
5	out a full curriculum alignment with the frameworks
6	or standards, I guess I should say.
7	DR. SAUNDERS: Okay. What courses besides
8	Algebra 1 would this include, and Reading Plus? Are
9	those the only two?
10	DR. TATUM: We have and we have keyboarding,
11	as well.
12	DR. SAUNDERS: Keyboarding. And it would be
13	limited to those three?
14	DR. TATUM: Yes. Keyboarding, Reading Plus, and
15	Ingenuity, which is an online Algebra 1 class.
16	DR. SAUNDERS: Okay. The Ingenuity is Algebra
17	1. Right?
18	DR. TATUM: It is an Algebra 1 class.
19	DR. SAUNDERS: It is the one?
20	DR. TATUM: Uh-huh. It's a digital course.
21	Yes, sir.
22	DR. SAUNDERS: And what would be a typical time
23	for a student to need to complete that for credit?
24	DR. TATUM: For the Algebra 1 it would be a full
25	year. For keyboarding it would be at the semester.

	214
1	DR. SAUNDERS: But with the waiver of seat time
2	it would no longer be a full year and semester. So
3	what would be a typical
4	DR. TATUM: It would change at that semester
5	time and they may go into not the Ingenuity class,
6	but they may go into another digital course, which
7	could be the Reading Plus. So when it finishes at
8	the semester time it's not that they go home or
9	whatever; they do into another digital course.
10	DR. SAUNDERS: So okay.
11	DR. TATUM: That's required by standards.
12	DR. SAUNDERS: So it would be a full credit of
13	Algebra 1 for one semester. Am I understanding that?
14	DR. TATUM: Yes. And if they finish it
15	MS. CLANCY: And they can work at
16	DR. SAUNDERS: Okay.
17	MS. CLANCY: I'm sorry. They can work at their
18	own pace and so if they finish the course early, all
19	of their requirements of the course, they will finish
20	the course and we can have them in some kind of
21	some other enrichment.
22	DR. SAUNDERS: Well, do you have a plan on what
23	this specific course, what the average amount of
24	time a student spends to complete it?
25	DR. TATUM: When you the course for math,

it's an hour-and-a-half and so they do that time 1 there in the classroom --2 3 DR. SAUNDERS: Right. DR. TATUM: -- doing this digital course. 4 But 5 they can also utilize it when they're at home. So there are certain dates that the teacher in this 6 7 digital course -- let's just say Algebra 1 -- she 8 gives to the facilitator and the teacher. So the 9 seat time could last a whole year when we talk about that. But some children, they do finish early; 10 11 they're aggressive about finishing. You know, it 12 could be three weeks early or two weeks. It just 13 really depends on the child's pace and finishing the online course. 14 15 DR. SAUNDERS: Okay. And that's what I'm asking, and I'm not being difficult but I want to 16 understand. So if the child is in there for an hour-17 18 and-a-half a day, is it possible that that student 19 could complete the entire Algebra 1 course in a 20 month? 21 DR. TATUM: No, sir. 22 DR. SAUNDERS: Okay. What's the minimum amount 23 of time that child would need to be in there to 24 receive the credit? 25 DR. TATUM: I would say the child would need to

	216
1	be, probably seven or eight months.
2	DR. SAUNDERS: Okay.
3	DR. TATUM: Seven or eight months.
4	DR. SAUNDERS: At an hour-and-a-half a day?
5	DR. TATUM: That is correct.
6	DR. SAUNDERS: Okay. Thank you.
7	DR. TATUM: Uh-huh.
8	CHAIRPERSON COFFMAN: Just for clarification,
9	are these students in the Algebra 1 class, they're
10	proficient in 8th grade math?
11	MS. JONES: We have the students that are
12	proficient in math that are 8th graders, they are all
13	in that class. However, we do have some students
14	that are not quite at proficiency; I'd say maybe four
15	students that we're still working to build them up to
16	where they need to be.
17	CHAIRPERSON COFFMAN: But they're taking Algebra
18	1 for credit?
19	MS. JONES: They are taking Algebra 1 for
20	credit. Yes, ma'am. And we're talking about
21	according to okay, I was going to say we're
22	talking about we're talking about NWEA. Are you
23	talking about whether they were proficient in 7th
24	grade and ready to move on to Algebra 1?
25	CHAIRPERSON COFFMAN: I would've assumed that

they would've been proficient at 7th grade math if 1 you were to place them in an Algebra 1. So do you 2 have them in an 8th grade math class plus an Algebra 3 1 class --4 5 DR. TATUM: The Algebra --CHAIRPERSON COFFMAN: -- or in place --6 7 replacement of? DR. TATUM: We have a highly qualified teacher 8 9 that teaches math. And when the children didn't -or they haven't shown the -- or have the grade in the 10 11 past to move into the Algebra 1 class, then we have a full-time highly qualified teacher. Be mindful that 12 13 parents are -- they know about the Ingenuity course because there are signed permission slips. Parents 14 15 are onboard with us and really understand the whole 16 breakout of the Ingenuity class. So, as Ms. Jones said, the three to four students who are in there, 17 they are in there by parent request as well, so 18 they're fully aware of this digital course and the 19 progress that it's going to take for the child to 20 21 finish in a timely manner. 22 CHAIRPERSON COFFMAN: Any other questions? 23 DR. TATUM: I guess I'm trying to figure out 24 what the confusion is, I quess. 25 MS. BARNES: I got confused.

1	MS. JONES: I also want to include that,
2	remember, this is an hour-and-a-half class and half
3	of the class is used you know it's Algebra 1
4	and then the other half is used to build up that 8th
5	grade math, as well. Okay.
6	MS. BARNES: Okay. So, I'm sorry, but I got
7	tangled up in there a little bit and I just need a
8	little help. I'm trying to be sure that students who
9	are in the hour-and-a-half class who are taking
10	Algebra 1 were proficient in the 7th grade math, I
11	believe, before they moved into an Algebra 1 class?
12	Are there 8th graders who have not shown proficiency
13	but they're in the Algebra 1 for acceleration? I'm
14	help me. I got lost.
15	MS. JONES: Well
16	MS. BARNES: I just don't I don't want to
17	MS. JONES: Right.
18	MS. BARNES: feel that I heard what I thought
19	I heard.
20	MS. JONES: We didn't yet have PARCC scores
21	though whenever they were placed in the class.
22	CHAIRPERSON COFFMAN: But you had NWEA.
23	MS. JONES: Yes, we did. And that's what I was
24	speaking to, that, overall, the majority of those
25	students were on the correct level and there were

	219
1	three students that were not on that level.
2	CHAIRPERSON COFFMAN: But you felt that they
3	were close enough to be successful?
4	MS. JONES: Yes. Yes, ma'am.
5	CHAIRPERSON COFFMAN: Okay. That's what we were
6	trying to
7	MS. JONES: Okay. Yes, ma'am.
8	MS. SMITH: Are they getting high school credit
9	for completion of the Algebra 1 course?
10	MS. JONES: Yes, they are.
11	MS. SMITH: Okay. Okay. And you're basing
12	their enrollment in that course on their NWEA score,
13	which is an indicator that they'll be successful in
14	Algebra 1?
15	MS. JONES: Yes, ma'am. And there is a linking
16	study
17	MS. SMITH: Yes.
18	MS. JONES: that has been done that shows
19	that.
20	MS. SMITH: Yes.
21	DR. SAUNDERS: So just to clarify on that, the
22	student would receive credit for 8th grade math and
23	Algebra 1 for that hour-and-a-half course. Correct?
24	DR. TATUM: Yes.
25	DR. SAUNDERS: Okay.

1	MR. WALTER: Ms. Coffman, may I just interject
2	one thing, a point of clarification?
3	CHAIRPERSON COFFMAN: You might not want to. I
4	think we're all straight now.
5	MR. WALTER: Okay. Well, this is on something
6	else. I'm not going to try and mess that up.
7	CHAIRPERSON COFFMAN: Okay. Thanks, Tripp.
8	MR. WALTER: I just wanted to go back to Dr.
9	Saunders' questions on the planning period and duty-
10	free lunch and take another look at it. I think
11	those may have been waivers that were formally held
12	but they're not held now. So they are indeed new
13	waiver requests.
14	DR. SAUNDERS: Okay. So they are new?
15	MR. WALTER: Yes, sir. That is correct.
16	CHAIRPERSON COFFMAN: Does anyone else have
17	questions?
18	Dr. Tatum, I always save mine for the end. I've
19	been to visit your school twice and I always feel
20	very welcome there. I'm sure that's why the students
21	feel so comfortable there, because it is a very
22	welcoming and nurturing environment. I really see
23	your school as a niche school. I think it really
24	fits a nice because it fits the needs of a certain
25	group of kids that need just what it is you're

	221
1	providing. And I've always felt really good about
2	the school but I have to say today I as I read
3	through here I didn't have questions, but as we've
4	gone on I now have a list. So I'll try to do them
5	quickly.
6	Two things that came up: one is one of your
7	staff said you're doing everything for the kids and
8	so that's a flag for me.
9	DR. TATUM: Me personally?
10	CHAIRPERSON COFFMAN: No, the school. The
11	school is doing everything they can for the school
12	for the students. So just very quickly I want to ask
13	a few questions. What's the number of days you go
14	total per year?
15	DR. TATUM: 192.
16	CHAIRPERSON COFFMAN: Student contact days?
17	DR. TATUM: A hundred well, that's admin.
18	So, 188.
19	CHAIRPERSON COFFMAN: And the length of your
20	day?
21	DR. TATUM: From 7:15 until about 5:15, teachers
22	are released.
23	CHAIRPERSON COFFMAN: But I'm talking the
24	students.
25	DR. TATUM: Students, 7:35 until 4:00.

	222
1	CHAIRPERSON COFFMAN: Do you have a positive
2	behavioral support system in place?
3	DR. TATUM: Yes, we do.
4	CHAIRPERSON COFFMAN: Do you offer
5	transportation?
6	DR. TATUM: Yes, ma'am.
7	CHAIRPERSON COFFMAN: And do you have a word
8	study program in place for derivational constancy,
9	roots, affixes?
10	MS. WHIPPS: Yes, ma'am. It's built into Engage
11	New York. Whenever we're going over a new unit each
12	lesson deals with vocabulary, it deals with how to
13	introduce the vocabulary, we study word roots. We do
14	it across the board, even our science and social
15	studies teachers do it.
16	CHAIRPERSON COFFMAN: Okay. And my final
17	question is, there was a request for additional time
18	that was made over and over, and I think Ms. Barnes
19	kind of alluded to that. How much time is the time
20	needed? Are we talking one year, two years, three
21	years?
22	DR. TATUM: For our charter?
23	CHAIRPERSON COFFMAN: Uh-huh.
24	DR. TATUM: We need a chance to once the test
25	stabilizes, we need to do five years.

CHAIRPERSON COFFMAN: So in five years we could expect that that growth has begun to show itself in proficiency? Is that what you would say? Even though we realize you're coming in with a new group of kids, you know, they're coming in every three years or in more rapid -- when would we see that consistency from the school?

DR. TATUM: As ACT Aspire -- if that's it -- and you give us a chance to show that growth, that stability, we need solidly five years because, as Ms. Jones and Ms. -- Dr. McKenzie -- they've shown our 8th grade. Our 7th graders, our 8th graders, when they're there with us and they get that seat time there's no question they're growing. We now just need --

MS. JONES: We want an extended -- we want an extended runway with our students. We want to be able to build on and have them come in at earlier grades so we're able to have more of an impact on the population of students that we're serving in southwest Little Rock. By being able to build lower grades, we're being able to spend more time with them and have a greater impact on those students.

CHAIRPERSON COFFMAN: But that's not a request today?

1 MS. JONES: Right. That's not a request today. That's a projection. 2 MS. CLANCY: 3 DR. TATUM: So that's where we were saying at least five years with the test stabilizing and being 4 5 able to use those wraparound services, because Ms. Barnes alluded to our African American population. 6 7 So there's just time that we need to have in order to really stabilize us. We also have a principal that's 8 9 there and he's using SOAR, so there's so many great things in place that's making a difference. 10 11 CHAIRPERSON COFFMAN: I have one final question. Do you do any kind of data tracking on your students 12 13 once they go into high school? DR. TATUM: We don't do the data tracking. 14 15 were just successfully able to really have 16 conversations with people within some of the high schools. So we look forward to moving forward to 17 18 really be able to have those conversations and be able to really get some data back. We really have a 19 great relationship with one of the Little Rock School 20 21 District ELL directors and really moving some of our 22 kids to Hall so they could be a part of that ELL 23 program this fall. 24 CHAIRPERSON COFFMAN: All right. Thank you. 25 Any other questions? Are you ready for a

	225
1	motion? I'm ready. Oh, wait. Wait a minute. Let
2	me check with Ms. Davis. Ms. Davis, are there any
3	remaining issues?
4	MS. DAVIS: No.
5	CHAIRPERSON COFFMAN: Okay. Now I'm ready for a
6	motion.
7	MS. BARNES: Okay. Oh, the principal, are you
8	planning to stay?
9	MR. BLOCKER: Yes, ma'am.
10	MS. BARNES: Okay. All right. Given that the
11	current requirements this school is a Priority
12	school and we cannot exit any Priority schools prior
13	to the results of our 16-17 assessment data. So I
14	would like to make a move [sic] to approve the
15	renewal for two years with academic review of growth
16	and performance on the 15-16, 16-17 administration of
17	the ACT Aspire.
18	DR. GOTCHER: Say that again.
19	CHAIRPERSON COFFMAN: Yeah, repeat that, just
20	that end part. What were the dates?
21	MS. BARNES: 15-16, which is this current year,
22	and 16-17, which is next year, administration of ACT
23	Aspire. That's two consecutive years of the same
24	assessment to demonstrate whether or not the
25	strategies put in place are showing growth that would

	220
1	lend itself to improved achievement. It also would
2	identify whether or not the school is in a position
3	to be moved from Priority status. And so with their
4	continued work with the School Improvement Unit,
5	that's why.
6	DR. SAUNDERS: I'll second that.
7	CHAIRPERSON COFFMAN: And a second from Dr.
8	Saunders.
9	MS. PFEFFER: Is it okay if I get some
10	clarification?
11	CHAIRPERSON COFFMAN: Sure.
12	MS. PFEFFER: When you say the review of data,
13	reviewing it in light of the goals in the charter
14	that they've set as their goals or and also state
15	performance goals?
16	MS. BARNES: I think reviewing it with respect
17	to not only their goals but state performance goals,
18	growth goals. Because growth is a great part of this
19	charter and the abilities that they have shown with
20	respect to, as Ms. Coffman talked about, a niche for
21	a specific subpopulation, similar to a previous
22	charter that we just reviewed. So that's why I was
23	saying two consecutive years of data.
24	CHAIRPERSON COFFMAN: Dr. Gotcher.
25	DR. GOTCHER: So two consecutive years but with

the latter part of your language, was that a -- just specific -- it wasn't necessarily a probationary type request; it was --

MS. BARNES: Well, the thing is they're asking for more time but we need to see evidence of what they're doing because that way we can see whether it's working. And so I'm saying because the state assessment is the ACT Aspire and this is the first year for it, and then next year would be the second year -- that's two consecutive years to demonstrate whether growth is occurring over a period of time. And that's also when we would be looking at our accountability system kicking in with the 17-18 school year.

DR. GOTCHER: Okay.

CHAIRPERSON COFFMAN: Just as a point of clarification, from -- if we give two years is that going to give us enough time to have the data back to actually review?

MS. BARNES: As I understand it, we should be getting our data back fairly early. So we should be able to. I don't know all of the timelines, so someone may -- Ms. Boyd or Ms. Davis may have to assist us. I'm saying we need to look at it, review it, and that may be an internal review, and at that

1	time it would be up to us to make a recommendation as
2	to whether we want to call them in to move forward or
3	whatever. I'm not calling it probation; I'm just
4	simply saying renew it for two years with so that
5	they have an opportunity to have consecutive years of
6	the same assessment to demonstrate whether or not
7	growth is actually occurring.
8	MS. SMITH: Is this our discussion time
9	CHAIRPERSON COFFMAN: Sure.
10	MS. SMITH: so we can discuss?
11	CHAIRPERSON COFFMAN: It is.
12	DR. GOTCHER: We've had a motion and a second.
13	Correct?
14	CHAIRPERSON COFFMAN: Right.
15	DR. GOTCHER: Okay.
16	CHAIRPERSON COFFMAN: We're in
17	MS. SMITH: So this is discussion time. Okay.
18	So we're talking about renewal and then we're also
19	talking about their academic distress status. Right?
20	So if we said they could renew their application for
21	five years, that keeps them from having to come back
22	and do the whole application process. But then the
23	Priority status, since they're working with our
24	improvement specialists, they can be continually

called in anyway. Right? I mean, don't they have to

25

	229
1	show
2	MS. BARNES: For academic distress, they would
3	also be looked at by the subcommittee for Priority;
4	they would be a part of the quarterly reports. So, I
5	mean, there is going to be reviews going on but I
6	don't want to I personally didn't want to extend
7	my
8	MS. SMITH: Okay.
9	MS. BARNES: renewal beyond two years for
10	this initial renewal based on this.
11	MS. SMITH: All right.
12	CHAIRPERSON COFFMAN: Ms. Davis.
13	MS. DAVIS: I just wanted to I'm not exactly
14	sure when the 2016-17 data will come out, but if you
15	extend it for two years, if you renew them, that
16	would extend their charter until June 30, 2018. So
17	by then you should have the 2016-17 data back and the
18	two years would still be sufficient.
19	MS. BARNES: We'd definitely have it back by
20	then.
21	DR. TATUM: And, Ms. Coffman, could Mr. Scott
22	he wants to say some words. Can he speak?
23	CHAIRPERSON COFFMAN: Sure. We're open to
24	everyone.
25	MR. SMITH: Madam Chair, Members of the Panel,

Scott Smith with APSRC on behalf of the applicant. 1 Just something for your consideration, obviously you 2 can bring a charter in at any point in time and see 3 whether they've made sufficient progress on their 4 5 goals and what they're doing. From their perspective, I think a couple of things that you may 6 7 wish to consider. The length of term of their charter does matter as far as their viewed strength 8 9 to the clientele they're trying to serve. This is a three-year grade-span school, so if you're saying 10 11 they're only going to get two years then the next year's 6th grade class isn't certain whether this 12 13 school -- the message it may send to whether or not that school may be there by the 8th grade. 14 Obviously, if they're not making their goals that's 15 16 an issue you're going to look at anyway. So I think from their perspective they may -- they would like to 17 18 request that you consider their request for a fiveyear term and set maybe a two-year review window 19 20 internally, if you would like to do it that way. 21 that helps them from a strength perspective as far as the message of whether this school is stable and who 22 23 it's trying to serve, and it seems to work well with 24 the goals that they've submitted. There's somewhat 25 of a little bit of a cross-conversation about review

	231
1	in two years and the goals that they've set in their
2	charter. So I'd just bring that to your attention as
3	well.
4	MS. BARNES: We need to vote on this one and
5	then let it die, and then somebody else can make a
6	motion.
7	CHAIRPERSON COFFMAN: Okay. So the motion
8	stands as-is, Ms. Barnes? Yes?
9	MS. BARNES: Right now. And I think don't we
10	have to go ahead and
11	CHAIRPERSON COFFMAN: You can always amend your
12	motion.
13	DR. SAUNDERS: Can I ask Mr. Smith a question on
14	that?
15	CHAIRPERSON COFFMAN: Sure.
16	DR. SAUNDERS: Mr. Smith, could I ask you a
17	question on that? I understand what you're saying
18	about the two-five/five-year, as far as student
19	enrollment or perception or however you want to
20	address that. But don't they already face that
21	currently any time that a charter school is coming up
22	for renewal, there is a sunset date on every school
23	prior to renewal?
24	MR. SMITH: You know, but if you're looking to
25	enroll and this is currently, right now, a three-year

school program. If you're a 6th grader going in, you know, you think you'd come out of this program in the 8th grade. And then they say, "But I see you only have two years; your term is only two years," then that certainly communicates a message to families of whether or not they would be willing to consider that school anymore. And that -- I think that's not the intent; I think the intent of what you're talking about is let's look and see if they're making the progress that we want to see them making. And we're merely suggesting that there's a way you can do both in a healthy fashion.

CHAIRPERSON COFFMAN: Ms. Barnes, what is your will?

MS. BARNES: I know you didn't just say "Ms.

Barnes, what is my will." I wish that worked

everywhere. I have a spotlight on me. Let me look

at me. I'm thinking through it because I know, again

-- and I have certainly stated that I recognize

children, their futures, students and personnel.

There's a lot at stake here. I am willing to make an

amendment through a three-year window. I don't -- I

still don't want to go full-fledged even though -
even at the end of one year I recognize that the

charter can be called in. But I also don't want to

1	give any indication that it's okay, because right now
2	it's you know I have some angst. But I also am
3	encouraged to give you the opportunity to demonstrate
4	what you're talking about. I don't want to
5	necessarily go the whole five years. It may be that
6	when you come back you can; I don't know. I do know
7	that I'm willing today to based on what I have
8	heard, what has been demonstrated, the discussions
9	that have occurred, I am willing to make an amendment
10	that we do a flat three-year with a review of your
11	academic performance on growth and performance within
12	that three-year period. So how do I do that?
13	CHAIRPERSON COFFMAN: You just did. Dr.
14	Saunders, do you second that amendment?
15	DR. SAUNDERS: I just want I want to ask. I
16	need clarification. So what you if I'm
17	understanding you correctly, a three-year renew but
18	with review in two years or review in three years?
19	MS. BARNES: Well, the renewal is for three
20	years. We will be looking at the data continuously
21	but certainly at the end of two years there would be
22	assessment I mean, there would be evidence of
23	growth.
24	DR. SAUNDERS: So could we
25	MS. BARNES: So we so I'm just asking for the

	234	
1	renewal for three years. Within that three years we	
2	have our two-year window that I was initially asking	
3	for. I'm not asking for them to come back in two	
4	years, unless they are called back at our request or	
5	State Board's request or another request. I'm just	
6	saying three years.	
7	DR. SAUNDERS: I'll second that.	
8	CHAIRPERSON COFFMAN: All right. We've had a	
9	motion, amended motion for renewal of three years	
10	with a by Ms. Barnes and a second by Dr. Saunders.	
11	Any additional discussion?	
12	Let's go we'll go in order. Ms. Liwo.	
13	MS. LIWO: Yes, to the amended motion.	
14	CHAIRPERSON COFFMAN: Mr. Lester.	
15	MR. LESTER: Yes.	
16	CHAIRPERSON COFFMAN: Mr. Rogers.	
17	MR. ROGERS: No.	
18	CHAIRPERSON COFFMAN: Dr. Saunders.	
19	DR. SAUNDERS: Yes.	
20	CHAIRPERSON COFFMAN: Ms. Barnes.	
21	MS. BARNES: Yes.	
22	CHAIRPERSON COFFMAN: Ms. Pfeffer.	
23	MS. PFEFFER: Yes.	
24	CHAIRPERSON COFFMAN: Ms. Smith.	
25	MS. SMITH: Yes.	

	235	
1	CHAIRPERSON COFFMAN: Dr. Gotcher.	
2	DR. GOTCHER: No.	
3	CHAIRPERSON COFFMAN: All right. We have six-	
4	to-two. The motion has passed.	
5	If you'll give us a few moments, we'll write our	
6	responses and give those to you.	
7	DR. TATUM: Could I ask a question afterwards?	
8	CHAIRPERSON COFFMAN: Sure.	
9	DR. TATUM: Okay.	
10	(A FEW MINUTES OF SILENCE)	
11	CHAIRPERSON COFFMAN: Ms. Barnes.	
12	MS. BARNES: I made the motion to renew for	
13	three years based on the fact that while this charter	
14	has come before us multiple times some successes with	
15	a population that other area schools have not shown	
16	is evident. A local high school has supports	
17	available for exiting students and transition time	
18	must be taken into consideration for stabilization.	
19	CHAIRPERSON COFFMAN: Dr. Gotcher.	
20	DR. GOTCHER: I feel growth has been	
21	demonstrated through formative assessment data and	
22	leadership stability. Covenant Keepers are meeting	
23	the needs of the Latino community and feel they may	
24	need more support in that area as changes continue to	
25	occur geographically. However, I felt support in	

support of extending their renewal more than three years; therefore, I voted against the motion.

CHAIRPERSON COFFMAN: Mr. Lester.

MR. LESTER: I voted for. I want to give the charter three years to implement plans for their growth and data will be available for consideration by the Panel.

CHAIRPERSON COFFMAN: Ms. Liwo.

MS. LIWO: Okay. I voted for, obviously. This was a little -- I was on the fence with this one.

Honestly, I'm not quite sure that you guys are going to make it; I'm not. But come with plans in place to hopefully make progress in the future. I really -- I guess for me what the deciding factor was was Mr.

Hernandez, what he had to say about what you guys have done for him. And if there is even a little bit of a possibility that you can do what you've done for Mr. Hernandez right now in your current situation to students down the line, and show that increase in performance, I think it's worth giving you a three-year renewal just to see if that can happen. And that's why I voted for. Sorry, long-winded.

CHAIRPERSON COFFMAN: Ms. Pfeffer.

MS. PFEFFER: I too think that the wraparound services is definitely something positive that you

2

3

4

18

19

20

21

22

23

24

25

provide for your students. I believe that the threeyear renewal is going to provide you with an opportunity to demonstrate that your new administration and your current efforts can align to help insure higher achievement and growth. know -- I battled this, as well. I have concerns regarding your current status and the designations. But I do believe that in the future we'll have a more stable environment and stable data to use to align with your NWEA data. And that's a lens that I would continue to look at that, in terms of is your data, your local ongoing interim data, is it aligning with the outcomes that you see at the end of the year. And you'll be able to start getting some of that information as soon as this year. So I did vote in favor of the motion.

DR. TATUM: Thank you.

CHAIRPERSON COFFMAN: Mr. Rogers.

MR. ROGERS: I voted against the motion because I thought it should've been longer. Although they do need to be monitored for academic progress, I think that, with the testimony of Mr. Hernandez, they are doing good things in their community and they are serving people that do need that. And I feel like with the longer time, with stability in the

	250
1	community, that it would give them that chance to
2	keep growing.
3	DR. TATUM: Thank you.
4	CHAIRPERSON COFFMAN: Dr. Saunders.
5	DR. SAUNDERS: Yes. I voted in favor. I had a
6	concern over the current performance. I believe that
7	the consistent standards and assessment will provide
8	us with an opportunity to demonstrate that
9	performance or growth. And I just want to encourage
10	you to look more so towards look towards the
11	statewide assessments at the end of the years, the
12	determiners of success, as opposed to internal
13	formative assessments. They can be used as a tool
14	and a guide to get to the statewide test, so just
15	encourage you with that.
16	DR. TATUM: Yes, sir. Thank you.
17	DR. SAUNDERS: Yes, ma'am.
18	CHAIRPERSON COFFMAN: Ms. Smith.
19	MS. SMITH: I voted for. I noted that the
20	application presentation shows significant
21	improvement in school culture, academic growth, and
22	professional learning over the past two years.
23	Continued focus pertaining to academic status needs
24	to be closely monitored. I was impressed by the
25	community relationships with many in the area in an

1	effort to meet the needs of the students. And I want	
2	to recognize that you guys are 91% free and reduced	
3	lunch. You are testing all of your students 6th	
4	through 8th grade. And, boy, as a principal, if I	
5	knew every one of my students was testing at that	
6	middle grade level, that's a challenge. And so	
7	continue your efforts to lead and be strong.	
8	Leadership is by example and continue to do that.	
9	CHAIRPERSON COFFMAN: Dr. Gotcher, correct me if	
10	I'm wrong but your no-vote was to you voted no	
11	because you wanted to give them more time. Is that	
12	correct?	
13	DR. GOTCHER: That's correct.	
14	CHAIRPERSON COFFMAN: So, Dr. Tatum, I think I	
15	would take this as a super success. Six voted for	
16	the three years and two voted to give you more time.	
17	DR. TATUM: Yes.	
18	CHAIRPERSON COFFMAN: So it's not really six-to-	
19	two as in two no's; it's two for no for the three	
20	years and wanting longer.	
21	DR. TATUM: Thank you.	
22	CHAIRPERSON COFFMAN: So we expect great things	
23	from you and we look forward to future reports to	
24	show that that trust was put in the right place.	
25	DR. TATUM: Thank you.	

	240	
1	CHAIRPERSON COFFMAN: This committee will take a	
2	10-minute break and then we will hear action item 4.	
3	Thank you.	
4	DR. TATUM: Thank you.	
5	(BREAK: 2:44-2:57 P.M.)	
6	A-4: REQUEST FOR OPEN-ENROLLMENT PUBLIC CHARTER SCHOOL RENEWAL	
7	AND PRIORITY STATUS HEARING: PINE BLUFF LIGHTHOUSE CHARTER	
8	SCHOOL	
9	CHAIRPERSON COFFMAN: Ms. Boyd, we're ready for	
10	action item 4. You're recognized.	
11	MS. BOYD: Thank you, Madam Chair. The State	
12	oh, sorry. Request for Open-Enrollment Public	
13	Charter School Renewal and Priority Status Hearing	
14	for Pine Bluff Lighthouse Charter School. The State	
15	Board of Education approved the application for Pine	
16	Bluff Lighthouse Charter School on November 8, 2010.	
17	The charter is approved to serve students in grades	
18	K-12 with a maximum enrollment of 650.	
19	Representatives of the Pine Bluff Lighthouse Charter	
20	School are appearing before the Charter Authorizing	
21	Panel to request a 5-year renewal for the charter.	
22	Also, the Charter Authorizing Panel has required	
23	representatives of Pine Bluff Lighthouse to appear	
24	for a hearing pursuant to Arkansas code annotated 6-	
25	23-105 to discuss academic performance.	

Representatives of the charter agreed to combine these two hearings and approved combining the hearing procedures to be followed. Possible actions to be taken by the Charter Authorizing Panel include renewal of the charter based on this renewal application. But due to its Priority status, possible actions include modification, probation, revocation, and/or nonrenewal of the charter.

Do you all need to be reminded of the hearing procedures? They're the same as the ones for the item immediately before this.

Okay. Would you like --

CHAIRPERSON COFFMAN: Okay. We're good.

MS. BOYD: You're good. Okay. So I'm going to go straight into the 20 minutes for the State.

Pine Bluff Lighthouse Academy, part of the greater Lighthouse Academies network, was first authorized by the State Board of Education to operate in November of 2010 to serve grades K-12. Recently, the school has been classified a Priority school.

The contract is scheduled to expire in June of 2016.

In my visits to the campus and conversations with the school leadership, it has come to my attention that the school has had four school leaders since it opened its doors in August 2011. However,

1	the school seems to have gained a dependable and	
2	capable leader in Mr. Bryant excuse me Mr.	
3	Brent Mitchell, who began working at the campus in	
4	late fall 2014. Under the direction of Mr. Mitchell,	
5	the school has increased teacher retention and the	
6	impact of having a more consistent staff from last	
7	year to this year is apparent within the school	
8	culture.	
9	I'll defer the rest of my time to Dr. Wilde.	
10	CHAIRPERSON COFFMAN: Dr. Wilde. Yes, ma'am?	
11	COURT REPORTER: They need to be sworn.	
12	MS. BOYD: Oh.	
13	CHAIRPERSON COFFMAN: Thank you. Before you	
14	start, let's if all the representatives I	
15	hadn't turned my page yet all the representatives	
16	from Pine Bluff Lighthouse Charter School and anyone	
17	speaking in opposition please stand and raise your	
18	right hand. Do you swear or affirm that the	
19	testimony you're about to give shall be the truth,	
20	the whole truth and nothing but the truth?	
21	(ALL SPEAKERS ANSWERED AFFIRMATIVELY)	
22	CHAIRPERSON COFFMAN: Thank you. Dr. Wilde,	
23	you're now recognized.	
24	DR. WILDE: Thank you. Richard Wilde, School	
25	Improvement Unit. Pine Bluff Lighthouse this year

22

23

24

25

was classified in Priority status. As such, we're just beginning or just initiating through fall interaction from the School Improvement Unit with the The other component of school improvement is also the ACSIP and the general ACSIP and the general ACSIP submission. So there's two roles here: one is looking at their general school improvement process and then their application for categorical and federal funds. The part where we would be somewhat critical would be in their submission of their general ACSIP, and that is said lightly in the sense that we are in transition from one model to a new model, so we have a number of districts and a number of schools this year that we're having difficulty with submission of ACSIP. So I want to at least give that caveat that they're not unique in that sense of struggling with that part.

We'd like to highlight that on the second page of the report that we submitted that it has also been typical, it's been our experience, when a charter school has been identified in Priority status that there is naïveté' about the process. So when School Improvement shows up and says, "We're here to help," there is some resistance, and that resistance is in the form of, "Well, we're doing everything

2

3

appropriately and everything we could possibly do right now." Again, given their history of change in leadership, and with Mr. Mitchell coming in at the beginning of this year, he did not have and did not possess that long-term history of the school itself, so he couldn't give us a lot of background knowledge on why they had not done certain things. That said, however, we'd like to also indicate that Mr. Mitchell is an experienced principal, so that was a plus we gave them, and he was familiar with the school improvement process. One of the pieces that is not yet in place, but he has assured us that they are working on it, is the hiring of a school improvement specialist. And the position has been offered; it just hasn't been accepted yet. So from our standpoint looking at it, they are about where we would be with any first year Priority school in terms of the school improvement process and we're working through still those initial stages.

Any questions for me on that?

CHAIRPERSON COFFMAN: Would you clarify on the school improvement specialist that has not been accepted: the person that's been offered the job has not accepted the job. Is that what you're saying?

DR. WILDE: Correct.

1	CHAIRPERSON COF	FMAN: Okay.
---	-----------------	-------------

DR. GOTCHER: Can we ask questions --

CHAIRPERSON COFFMAN: Yes.

DR. GOTCHER: -- later?

CHAIRPERSON COFFMAN: Yeah. We'll have questions later. Thank you, Dr. Wilde.

Ms. Boyd, if you'll introduce the school.

MS. BOYD: First to address the Panel from the school we have a number of parents. And we're going to remind them and ask them to speak directly into the mic and state their names before they address you all.

MR. WINSTON: Madam Chair, to the rest of the Panel, good afternoon. My name is Michael Winston, Senior, and I am a parent of one of the Lighthouse scholars. And I can truly say that like a concerned parent my son, he's only in 1st grade. Last year, I was concerned about his behavior and his grades in school. Well, like any kind of parent, I took a look at it and I started showing up at school. And when I'd get him on the weekends -- because I don't have him every day -- when I'd get him on the weekends I started paying attention to his behavior. Come to find out, my son is lazy, not only at home but at school. Because I was about to blame it on the

Well, when I saw how the teachers was 1 teachers. teaching and how concerned they was about not only 2 just one but all, it hit me, okay, I have a lazy 3 child. You know, instead of paying attention he 4 5 wants to play, he wants to do this. So instead of going fishing when I'd get off work, I would go to 6 7 school and I would sit with him and I would see his 8 behavior and see his performance. Well, there's no 9 way you can learn if you're not paying attention. 10 by me showing up, helping out in class and helping 11 out more at home he's improved tremendously from only getting D's and C's, he's making A's and B's. 12 13 this is only his second year. And with that being said, I really appreciate that because when I'm able 14 15 to go to the classroom and not look at a teacher just sitting at her desk, you know, she's literally 16 walking around, spending time with each and every 17 18 individual. You know -- and when you have a classroom as a whole can raise their hand to numerous 19 20 questions, that lets me know that they're paying 21 attention and they're catching on. So by this year I 22 really appreciate what has been done in my son's 23 classroom. And come to find out, I didn't know that 24 Lighthouse teachers Chinese. I was shocked to get 25 that information. And that's in the 6th grade, if

I'm correct -- 5th grade, yeah. He's only in 1st grade, you know. Me, personally, I would rather see a little bit more foreign languages. No offense but, you know, I would. And, you know, I'm looking forward to see more. And with that, thank you.

CHAIRPERSON COFFMAN: Thank you, Mr. Winston.

MS. SEEPERSAD: Hello. My name is Sandra Seepersad. I have a child at Lighthouse that's in the 5th grade. He's been there ever since he's been in 1st grade. He'd been having speech problems when he first got there. Lighthouse has great programs; they have speech therapists, special education. was slow in his reading. He has learned a lot from Lighthouse. The teachers inform me if he's having a bad day. They have no problem picking up the phone, calling me. Sometimes I can just talk to him on the phone and he's okay. And it's like Lighthouse makes you feel like we're family; they include me in everything. And like you said, Chinese -- my son is in the 5th grade, so he came and wrote something and I'm like, "What is that?" But, you know, he's helping me learn things that I didn't know. And as far as the special education program, it's like -you know, I'm a little older and I have a 5th grader and when I didn't understand his school homework all

I had to do was just pick up the phone and call the teachers, and they give you their personal telephone number. They have no problem. I can call if it's 5:00 in the evening and they'll explain it to me because I'm, you know, trying to help him with his homework. And I just want to say that I appreciate Lighthouse being there and I don't really know what I would do without them, because I didn't want my child to go to a public school. So I'm just, you know, here to speak on their behalf and letting them know that I appreciate them being there for him.

CHAIRPERSON COFFMAN: Ms. Sandra, what was your last name?

MS. SEEPERSAD: Seepersad.

CHAIRPERSON COFFMAN: Thank you.

MS. BROADWAY: Good afternoon. I'm Lenisha
Broadway, the regional vice president for Pine Bluff
Lighthouse Charter School. I'm not going to take a
lot of time because I know that we already have had
some parents speak, but just to talk about who we
are. And I'm sure the presentation is coming up
shortly.

We are a national nonprofit charter network that is dedicated to insuring a college education for a population of students who would otherwise face a

future with limited opportunity. Lighthouse Academy sets out to distinguish itself by forming a family of schools that use an arts-infused K-12 college prep program to generate excellent results while using only the state and federal funding provided.

Pine Bluff Lighthouse Charter School opened in 2011 with 165 scholars in grades K-4. Each year the school added a grade level. In the 2015-16 school year Pine Bluff Lighthouse Charter School has 343 scholars in grades K-8. Throughout the years the school has always enjoyed the support of parents and the community, as you can see.

Today, we are fortunate to have a few of our board of directors present: Ms. Reshona Walker, who's the board president -- she's in the back; Ms. Joy Blankenship -- I'm not sure if she made it; Reverend Doctor Walter Van Zandt Windsor is here -- and we use his --

REV. WINDSOR: The obvious one.

MS. BROADWAY: Yeah, he's right there. Mr. Tommy Palmer, who's not here; Ms. Wanda Bateman is here; Dr. Joseph E. Brown -- he's not here; and my self, Lenisha Broadway. Also, we have our CEO and president of Lighthouse Academies, Mr. Khori Whittaker who's with us today, and a host of our

local leaders in Arkansas, and parents. So we thank them for coming today.

To get a better idea of who we serve, I would like to share a few facts about Pine Bluff and the industrial and big businesses within the city -- and they're posted to your right on the slide. Pine Bluff's population is 45,332. The median household income is \$28,050. Eighteen percent of residents have a bachelor's degree or higher. Pine Bluff was ranked 15th in the most dangerous metro areas across the U.S. in 2015. And all the schools in the Pine Bluff School District currently have an academic Needs Improvement or Priority status.

Who we serve -- again, we have 343 scholars.

Within the 343, we serve 88 families which consists of two to seven children in a family. We are a Title 1 school-wide K-6 and this year we are a Targeted Assistance in grades 7-12 because our LEA changed.

Our meal status -- one unique thing is that we offer Universal Feeding to our scholars because of our high free and reduced lunch rate of 98%. And our demographics is listed below with 96.5% African American, 1.45% Hispanic, 1.16% Caucasian, and .87% two or more races.

Now our educational model -- arts infusion,

incorporating the arts in daily instruction is what we do. We have arts specialists who co-teach with content area teachers daily. Arts infusion PB is offered during the summer institute as well as throughout the year. Our school also provides public theater performances each year at local community venues. And the school partners closely with UAPB art department and Southeast Arts and Science Center Arkansas. We also daily expose our scholars to master artists and works of art.

Another part of our model is our standards driven planning and instructional resources.

Recently, this year, in 2015-16, we incorporated new curriculum at our campus. We now use Eureka Math, K-8, Expeditionary Learning for our literacy, grades 3-8, and Core Knowledge literacy for grades K-2. We believe in educating the Whole Child, so social development is a big aspect of what we do. Our habits of a scholar, which really emphasizes ACES, which stands for Active Community Membership,

Critical Thinking, Effective Communication, and Self-Discipline and Self-Management. In our lower grades our teachers really focus on our SHINE curriculum, where SHINE stands for Self-Discipline, Humility,

Intelligence, Nobility, and Excellence.

20

21

22

23

24

25

Next, just to look at our data -- in 2012-13, Pine Bluff Lighthouse Charter School scored higher in both the combined population and targeted achievement gap group as it pertains to the Pine Bluff School In 2013-14, as you can see, we took a There were many challenges that affected decline. the school's performance that year. One, we hired 10 new teachers. We had to staff the school with those positions as well as we lost four teachers during the year. As you know, Pine Bluff is a critical area for finding top talent. Our partnership with TFA has been strong but, unfortunately, maintaining those teachers after their two-year commitment has been a struggle. Our special education population grew in 2013-14; 19% of the tested population that year was identified as special education. Only 15% of the scholars had been with Pine Bluff Lighthouse Charter School for three or more years within the tested population. And most of our scholars in their first year were coming from surrounding D and F schools.

Mathematics between 2012 and 2014 -- in 2012,
Pine Bluff Lighthouse scored approximately the same
as the Pine Bluff School District in mathematics in
the targeted achievement gap group. In 2013, the
Pine Bluff Lighthouse Charter School scores were

approximately 12% higher in the combined population, as well as the targeted achievement gap group. But as you can see in the 2013-14 school year, we took a decline. And, again, those same challenges that appear for literacy are the same as in our math.

The data for our recent PARCC scores -- our upper academy African American scholars met the AMO in literacy and Pine Bluff Lighthouse Charter School scholars that attended Pine Bluff for three or more years were the ones that met the standards in literacy. For math our lower academy African American scholars met the AMO in math. Pine Bluff Lighthouse Charter School scholars that attended Pine Bluff Lighthouse Charter School for three or more years again are the ones that are meeting the standards.

So some of the variables responsible for our challenges -- as we talked about before, teacher and leader retention. Our four-year retention rate is 51.8%. This year 82% of the teachers remained. So great teachers and leaders are needed and great teachers and leaders are being developed.

Our scholar retention -- as you can see, and as you probably all know, Pine Bluff is a highly mobile city. Scholars are in and out. People are moving in

and out at all times. We know that Pine Bluff has closed two of their schools due to a decline.

So some of the reasons that we lose teachers or leaders: personal illnesses, the TFA commitments expire, the lack of rapport from some of our previous leaders with staff and scholars, promotions that have been received by some staff members that moved on, and the demands of a charter school principal. Some of those principals just could not meet the demands of a charter school principal, and then trying to find a principal that's willing to commute because most do not want to live in the city of Pine Bluff.

Other variables for our challenges was our curriculum. I believe most -- there are some on the Panel that have seen Lighthouse before and know that we once used Saxon and we once used Imagine It. This year, because of the data we saw a need that we needed to make a change and make it quick. So we did change our curriculum to Eureka Math and Expeditionary Learning and Core Knowledge. We saw that our curriculum was not vertically or consistency -- or there was no consistency from class to class; a lack of student engagement, which we know is huge with students and their academic performance; and just a lack of rigor.

Other variables responsible for our challenges
-- one, discipline and classroom management. Out-ofschool suspensions in 14-15 were 36. Several of our
first-year teachers were on staff and were challenged
to manage behavior and academics due to teacher
retention. A lot of our hires are late hires due to
the pool of candidates, so some may miss that initial
classroom management training. Because we do do a
week-long of responsive classroom for our new
teachers, but due to the late hires sometimes that
prevents them from receiving that initial training.
And then several of our teachers are just
nontraditional teachers that are on staff. So, of
course, we do have challenges there.

But now I want to talk about some of the things that are really working in our school. We are one of the only charters I know in the city of Pine Bluff -- we offer transportation to and from school. We've even reached out to areas as far as Wabbaseka for scholars. So there's no limitation of us making sure scholars get to school. We also this year incorporated -- due to our lack of commitment from scholars and parents in our afterschool program for remediation, we provide transportation for those scholars to attend our afterschool program. So we

2

3

4

5

6

7

8

9

10

11

12

13

14

15

16

17

18

19

20

21

22

23

24

25

are proud of that. We've recently instituted a Saturday arts academy where scholars are also receiving remediation. We do home visits each year, and our parents look forward to that, because we want our teachers to know where our scholars are coming Our SWAG program -- and I'm sure you read -it was in the renewal in 2012-13. That was one of the programs that we had in place that worked, where we saw a lot of achievement, where we met AMOs. have reinstituted that this school year because we have a committed staff and leadership team that's willing to push that program; our Universal Feeding Program that we offer for all of our students because of our free and reduced population; and in our social and emotion development program, which really focuses on college readiness; it focuses on character and it builds those student relationships and teacher relationships that are needed; our 160 hours of professional development; also we're part of a charter management organization where we have a network of schools across the United States; and just strong community partnerships within the city.

So now that I've talked about the challenges and what's working, I want to talk about our Revamp

Restart Plan. Upon a successful renewal, the

22

23

24

25

leadership will launch a restart plan to dramatically increase student achievement. One: significant teacher leadership investment, staffing the school. We want to make sure that we have the right people in front of our scholars providing the best instruction So as we look at school turnaround models possible. we look at how schools are re-staffed sometimes, how schools have to reapply for their jobs. I had to do that when I worked in North Little Rock School District, when we opened a charter school. assistant principal and had to reapply. The right people, if they're doing what they're supposed to be doing and they are committed to being at the school, which means they're going to do what it takes, they'll be there. We did a revamp compensation policy based on school performance, teacher leadership performance, their retention bonuses to try to maintain our high performing staff.

Another part of our Revamp Restart Plan:
Lighthouse Academy's corporate is launching a teacher
hiring and selection training which kicks off
February 25th. We also have an April 2nd LHA teacher
fair that's going to be hosted here in Arkansas,
where Lighthouse Academy is vetting candidates for
our school. Attendance at local and college teacher

fairs are happening now, hiring bonuses we have in place for the critical shortage areas, and sign-in bonuses for high performing teachers on state assessment.

Another part of our Revamp Restart Plan is an increased student retention initiative. Of course, because we lose most of our scholars when it gets to the 7th and 8th grade because of the extracurricular programs that the district schools offer that's becoming an issue. So kids transfer out to go play football, to go play basketball. We did have a girls' basketball team last year, but we did not have enough guys in those grades in order to have a male basketball team. So we may lose scholars to that, and we know that. So this year we did have a boys and girls basketball team. Of course, you know, Pine Bluff is big on band, so we have a drum line; a mentor program with the University fraternities and sororities; choir, dance team, track, drama, and an ambassador program; again, additional tutoring programs with UAPB and our afterschool programs and Saturday arts academy. We did begin GT this year, even though we had a waiver for it. We wanted to make sure we were serving those scholars that met those qualifications, so we do have that in place.

Annual college trips for motivation; the kids are taking a trip next week, a local one to UAPB. And mentoring programs for all of our at-risk scholars.

Revamp Restart Plan, I've already spoken about what we're doing with our new curriculum. But just a little bit more about it:

K-2, Core Knowledge -- it really focuses on additional phonics work as a core component.

For 3-8, Expeditionary Learning -- it's heavily aligned with Common Core State Standards; emphasis on reading non-fictional texts, which we knew our scholars did not do a lot of; closed reading incorporating writing through different units of study; and we are implementing the repeated reading strategy.

3-8 -- and actually it's K-8, Eureka Math -real world issues vertically and horizontally
aligned. And then with the Priority status we are
instituting the pre- and post-test in all literacy
and math classes. So biweekly assessments are
happening and they're used to determine intervention
levels for -- in our classroom instructional support.
And just another thing about Eureka Math, it
incorporates daily exit slips, so we're assessing our
kids daily. And also it has net module assessments

to make sure that we're checking how our scholars are doing and performing.

Another part of our Revamp Restart Plan is our new interim assessment system. We did move from TLI to Link It and it's Common Core aligned. It gives us a variety of test items where we did not see the rigor at a lot of the TLI questions. So we did move to Link It. And it also helps us analyze third-party data, as well as like NWEA and all of those items.

The new curriculum provides us with lots of support, pacing guides, curriculum maps, lesson plan templates, and we also make sure that our teachers have grade level meetings that's focused on student achievement data and one-on-one coaching using the Danielson framework. We have ramped up our RTI process advancements where we're focusing on Tier 1 instruction first, and then identifying Tier 2 and Tier 3 scholars by name and tag them to skill deficits.

The last part of our Revamp Restart Plan is managing student behaviors with restorative practice. So we started the transition this year. In 16-17, we will be moving to full implementation. Year One results, we reduced our out-of-school suspensions to allow students to receive instruction at school.

Currently, right now, we have five out-of-school suspensions this entire school year versus the 36 in 14-15. Our goal going forward is the reduction of out-of-school suspensions from implementation of restorative practice by 95%. Reflection forms are used to help students understand their actions and options; daily classroom morning meetings are happening to build a community; student-led conferences three times per year to place students at the center of their own learning; and ongoing professional development to add remediation, peace circles, and restorative conferences.

The Pine Bluff Lighthouse Charter School board of directors and leadership of LHA will seek to amend the charter agreement upon successful renewal of the charter. We're requesting to restructure the school to a K-8 campus only to commit to excellence before adding a high school.

Our CEO, Mr. Whittaker, would like to take a few minutes, if possible.

CHAIRPERSON COFFMAN: Okay. Yeah, your time is up. Is there anyone here to speak in opposition?

(BRIEF MOMENT OF SILENCE)

(BRIEF MOMENT OF SILENCE)

CHAIRPERSON COFFMAN: Then, you have five minutes.

MR. WHITTAKER: Thank you, Panel, for the time. And so if you think about some of the communities in this country with the most educational needs chances are you'll find a Lighthouse Academy school in that community doing the work. We do what we do because we deeply care about the communities that we serve. We care about the -- about our scholars. So I believe that charter schools, charter management organizations are entities that work in partnership with state and local education organizations in serving scholars and we are in this work together.

So I took on this role about a year-and-a-half ago, and for the first several months I was observing, listening, looking into the data, and finding out exactly what's happening in the network as a whole and in Pine Bluff Lighthouse, in particular. I sought to first understand the data before we began to take action. And so Ms. Broadway has outlined a whole slew of initiatives that we've implemented to directly attack our -- and improve our academic excellence.

So I want to highlight a few of the changes that we are making. So in adapting to the realities of more rigorous assessments and accountability, and the realities of what our scholars will face now and in

the future, we've implemented a more rigorous Common Core aligned curriculum, and Ms. Broadway has talked about that: Core Knowledge, Eureka Math, and Expeditionary Learning. Before, our teachers were working very hard putting together resources and now we provide them with resources that they can learn and implement and spend less time making up things themselves. That also provides them the opportunity to add some creativity in arts infusion into the curriculum that's already laid out for them.

Because we are committed to a data-driven approach, we've implemented a stronger Common Core aligned interim assessment with the Link It platform and a data management system to accompany that, and we're providing training for our educators and our teacher leaders on that platform.

Now an initiative that is near and dear to my heart is our restorative practice. When I was an educator 16 years ago in the classroom one of the things that I was bound and determined to do was to make sure that I kept all my kids in my class and not suspend them and not expel them, and that took some serious work, took some serious creativity. But I knew that the best place for my students was with me. And we want that same energy throughout our network

and that same commitment to keeping scholars in classrooms in Lighthouse schools.

The Lighthouse network also employs a targeted tiered support structure because our schools are different; they have different needs. And so we have other educators and leaders in the network visiting schools and providing another eye to support our local leaders.

So, all of these network-wide initiatives create opportunities for network-wide collaboration. So our school leaders and our educators have the ability to collaborate with and work with Lighthouse teachers, not only here in Arkansas but throughout our network nationwide.

The other challenge that we are addressing is the human capital realities of working in Pine Bluff and thinking about how we source, recruit, hire, onboard train and develop our educators. Now this is a major challenge for us now and it's going to be an ongoing challenge for us going forward, but we are determined to make progress and to make improvements. So we now have a human capital expert that we've hired on my senior staff at the national network who is leading our efforts. We're using our budget more intelligently to target retention initiatives for

high-performing teachers. And we've also seen there's a strong correlation between when you hire an educator and the impact on growth that they have in the subsequent year. And the difference from the teachers you hire in April and May versus those you hire in July and August is substantial. And so we are making sure that we are determined to hire most of our teachers early in the hiring season to prevent that from happening in the future.

So Lighthouse Academies, we are -- everyone should know we are not satisfied with our academic performance by any means, and we are committed to doing better. But recent data indicates that some of the changes that we've implemented this year under Mr. Mitchell's leadership is starting to show improvements. A question was asked earlier, in an earlier session, about the fall-to-winter NWEA data. And so what we've seen from our fall-to-winter is that 53% of our scholars are meeting or exceeding their growth targets so far in English Language Arts and 51% of our scholars are meeting or exceeding their growth targets in math. So that's a positive indicator that we're going to continue to push.

We model a K-12 approach in Lighthouse in general and we prepare our scholars for college and

career through a rigorous arts-infused program. Now, and our CPAs, or college preparatory academies, over the last three years we've seen outstanding graduation and college access outcomes. So over the last three years we have 88-plus percent graduation rates from our CPAs in places like Gary, Indiana, Indianapolis, and the south Bronx. And we have 90-plus percent college acceptance rates in those places as well, and so we look forward to serving the full K-12 continuum in Pine Bluff.

But as Ms. Broadway just said, what we want to do, and one of the changes that we're making with regard to Pine Bluff, is making sure that in kindergarten through 8th grade we have an excellent program before we launch into high school there. So we're committed to making that change.

Lighthouse Academies is 100% committed to the Pine Bluff community and we are 100% committed to supporting this school to achieve the level of excellence that is expected of us from our parents and that our scholars deserve.

We thank you so much for your thoughtful consideration.

CHAIRPERSON COFFMAN: Thank you. I'm sorry, your time is up.

	267
1	MR. MITCHELL: No, I'm here to answer any
2	questions for you.
3	CHAIRPERSON COFFMAN: Okay. Was that Mr.
4	Whittaker?
5	MR. MITCHELL: Yes, ma'am.
6	CHAIRPERSON COFFMAN: Okay. Khori Whittaker.
7	All right, Panel; time for questions. Ms. Smith is
8	ready.
9	MS. SMITH: Yeah, I have a question. And this
10	may involve Mr. Whittaker also. I'm just curious to
11	discussing the curriculum okay within the
12	presentation you talked about two new curriculum
13	programs that you guys have used, Eureka Math and
14	Expeditionary Learning, and that you guys have just
15	kind of implemented those within the last this
16	year?
17	MR. MITCHELL: This current school year.
18	MS. SMITH: Okay. So what did you do
19	previously?
20	MR. MITCHELL: Well, that was Saxon
21	MS. SMITH: Saxon?
22	MR. MITCHELL: Saxon Math was there
23	MS. BROADWAY: And Imagine It.
24	MR. MITCHELL: Imagine It.
25	MS. SMITH: Okay. And so I'm just from your

network, the national Lighthouse network, do you guys 1 advise as far as curriculums that districts use or 2 schools use or do you leave that up to the individual 3 schools? 4 5 MR. WHITTAKER: Yeah. So in the past at Lighthouse it was a sort of flexible model where most 6 7 of the states and the boards were doing their own 8 thing. But recently, in looking into the -- you know 9 -- the new environment with charters and the more rigorous assessments and standards, I've decided that 10 11 we need to be more prescriptive in terms of the curriculum in each of the states. 12 13 MS. SMITH: So how do you guys come in and support the school then? 14 15 MR. WHITTAKER: Yeah. So, Ms. Broadway can 16 speak to that. So one thing that LHA corporate 17 MS. BROADWAY: 18 does is we do have institutes throughout the year. 19 We have a summer, a fall, winter, and we have spring 20 institutes that focuses on the curriculum. 21 the initiative locally to bring in Eureka Math to do PD with our teachers this summer, as well as we did 22 23 the same with Expeditionary Learning and Core 24 Knowledge. 25 MS. SMITH: Thank you.

1	CHAIRPERSON COFFMAN: Dr. Gotcher.
2	DR. GOTCHER: Good afternoon.
3	MR. WHITTAKER: Good afternoon.
4	DR. GOTCHER: In reviewing your reading scores,
5	I just have a couple of questions. First of all,
6	talk a little bit about your reading curriculum,
7	guided reading, what kind of really specifically
8	for your 1st grade through 5th grade students. And
9	then my concern is that those scores have remained
10	pretty flat. And so I'm just curious if someone
11	could address, number one, what reading curriculum is
12	being supported and maybe address the scores.
13	MR. MITCHELL: Okay. I'm sorry I didn't
14	introduce myself. I'm Brent Mitchell; I'm the
15	current principal
16	DR. GOTCHER: Hi, Mr. Mitchell.
17	MR. MITCHELL: at Pine Bluff Lighthouse.
18	This is my second year. I think there may have been
19	some confusion in the submitting, but this is my
20	second year. I came aboard late October last year.
21	Okay. To answer your question, there's two
22	curriculums that are used by the elementary school.
23	So we have a K-2 curriculum and then we have a 3-8
24	curriculum. But the K-2 curriculum is scaffolding
25	into the 3-8 curriculum, and so it kind of goes hand-

1 in-hand and so it allows us to get the results we desire. 2 As far as the flat scores, when we're looking at 3 using that curriculum as of this particular school 4 5 year, NWEA indicates growth in very grade level so we know that it's working. And so we're satisfied but 6 we know there's more work to do. Like we said, 7 there's a 50% success rate for math and 51% for 8 9 literacy, so the model is currently working that we 10 have in place. We also think that doing the pre- and post-tests helps with that, as well. And so we're 11 12 excited about the growth we're showing. 13 DR. GOTCHER: Very good. So what I'm seeing here in Table 6 is not reflective of the NWEA scores. 14 15 Table 6 is on your page 15, I believe, Mr. Mitchell. 16 MR. MITCHELL: Okay. And that's previous data. 17 The NWEA scores I just spoke about were just 18 released. We just took our winter NWEA. DR. GOTCHER: So for the 15-16 school year? 19 20 MR. MITCHELL: Yes, sir. 21 DR. GOTCHER: I was -- okay. I kind of get 22 connected to three-year trend data. That's why I was 23 kind of wanting to get an explanation of that. 24 MR. MITCHELL: Absolutely. 25 DR. GOTCHER: So, that table represents what

	271
1	curriculum?
2	MR. MITCHELL: The previous curriculum. So that
3	represents the Imagine It, the Saxon, et cetera.
4	DR. GOTCHER: Okay. So Saxon has a reading, as
5	well?
6	MR. MITCHELL: No. I'm saying that's not
7	that's on page 15, the literacy data
8	DR. GOTCHER: Yes, sir.
9	MR. MITCHELL: is just particularly for
10	Imagine It, whatnot.
11	DR. GOTCHER: Okay. Very good.
12	MR. MITCHELL: That's old curriculum, you know,
13	that we used.
14	DR. GOTCHER: And you're saying that beginning
15	15-16 that was handed to me, Alex, earlier?
16	MS. BOYD: Uh-huh.
17	DR. GOTCHER: Well, I don't want to waste your
18	time, so
19	MR. MITCHELL: Right.
20	DR. GOTCHER: There it is.
21	MR. MITCHELL: That is our current growth that
22	we've shown this current school year using the new
23	curriculum.
24	DR. GOTCHER: All right. I'll look at that and
25	not waste any

MR. MITCHELL: Okay.

DR. GOTCHER: -- of my colleagues' time.

MR. MITCHELL: Yes, sir.

DR. GOTCHER: Thank you, Mr. Mitchell.

MR. MITCHELL: No problem.

CHAIRPERSON COFFMAN: If someone might -- you or Ms. Broadway, someone mind kind of talking us through the document that you handed us?

Hi. My name is Amanda Crowder; MS. CROWDER: I'm the curriculum coordinator and state testing coordinator for Lighthouse Academies in Arkansas. What we did is you'll look at each grade level. As you can see, their average RIT score for fall in the first column; second column is their average RIT, and our overall observed RIT score for RTI -- for the RIT score, I'm sorry. And the last column, that is the number of students' percentage of all of our students that either met their growth or exceeded their So at the top you have, under percent of growth. students by growth classification, you have a red that says No, an orange that says No-plus, Yes-minus, and a Yes. Our Link It assessment system, we've stated they were a third-party data analysis; they help us analyze our data and send us back this information. We're able to go through and pull from

1	their systems our RTI groups. We talked about our
2	Tier 2 and Tier 3 instruction. So our teachers have
3	this information readily and in front of them with
4	our Link It system. So you're showing that 22% of
5	our students in literacy met their growth goal for
6	the year, from fall to winter; 31% exceeded their
7	growth goal. So that's an overall of 53% that either
8	met or exceeded their growth goal on the winter NWEA.
9	And the same is for math.
10	CHAIRPERSON COFFMAN: So they've met their
11	growth goal for the entire year?
12	MS. CROWDER: For the entire year.
13	CHAIRPERSON COFFMAN: by the first by the
14	end of the first semester?
15	MS. CROWDER: Yes.
16	CHAIRPERSON COFFMAN: So then you would
17	accelerate those kids and go on while you're working
18	with the 47% that have not met?
19	MS. CROWDER: Yes, ma'am.
20	CHAIRPERSON COFFMAN: And is there any
21	commonality in the 47% of the literacy, the 47%
22	literacy and the 48% math? Are those the same kids
23	by any chance?
24	MR. MITCHELL: Yes and no. It's a little mix of
25	everything. Some kids tend to do better in math;

	2/4
1	some kids do better in literacy. Of course, you do
2	have some kids that represent both populations, but
3	for the most part it's kind of different.
4	CHAIRPERSON COFFMAN: Have you ever applied for
5	a 21st century?
6	MR. MITCHELL: We did. We applied last summer
7	and we felt that our application was very strong;
8	however, we did not receive the grant.
9	CHAIRPERSON COFFMAN: But you'll apply again?
10	MR. MITCHELL: We're going to apply every time
11	they offer a chance to us to apply.
12	CHAIRPERSON COFFMAN: That is the right answer.
13	Mr. Lester.
14	MR. LESTER: I see here that and I know you
15	have to go target-assisted your first year of looking
16	into moving towards school-wide. Have you already
17	started looking at a plan for your school-wide?
18	Because you're 86% free and reduced.
19	MR. MITCHELL: We have. We work hand-in-hand
20	with Complete Consulting who kind of does all out
21	financials and that's already been determined would
22	be a good route for us to go.
23	MR. LESTER: Okay.
24	CHAIRPERSON COFFMAN: I will just say, and while
25	they're getting their questions together, I did visit

	275
1	the Pine Bluff Lighthouse Charter School.
2	MR. MITCHELL: Yes, ma'am.
3	CHAIRPERSON COFFMAN: I did a drop-in visit, Ms.
4	Boyd and I. We were we had a great visit. I
5	appreciate the hospitality. Mr. Mitchell showed us
6	around to all the classrooms and I did see good
7	instruction going on in every room. Mr. Mitchell and
8	I had a great conversation about the next steps
9	MR. MITCHELL: We did.
10	CHAIRPERSON COFFMAN: to move the rigor up,
11	but a good solid foundation in classrooms. I saw a
12	great phonemic awareness lesson, a great phonics
13	lesson; we saw good student writing on the walls. So
14	all those things that a literacy teacher looks for
15	when they go into a school I saw evidence of, so I
16	applaud that.
17	MR. MITCHELL: Thank you.
18	CHAIRPERSON COFFMAN: I can tell you're doing
19	good work and as a result of that, everyone else is
20	as well.
21	MR. MITCHELL: Oh, thank you.
22	CHAIRPERSON COFFMAN: Dr. Saunders.
23	DR. SAUNDERS: Yeah. I had some questions
24	concerning the new waivers: duty-free lunch and
25	planning time. Can you talk to me about that?

1	MS. BROADWAY: So, yes. The duty-free lunch, we
2	just want to have the flexibility there to be able to
3	utilize that waiver as needed, if needed. One thing
4	that we're really looking at, the planning time and
5	for the teachers, we really want to have more
6	impactful instruction going on all day and be able to
7	work with teachers before or after school. We just
8	feel like keeping them in the classroom, making sure
9	time is being utilized to impact instruction during
10	the day is something that is detrimental to our
11	scholars moving forward.
12	DR. SAUNDERS: Okay. So now the planning time
13	would occur outside of the school day?
14	MS. BROADWAY: Yeah.
15	DR. SAUNDERS: And the duty-free lunch, a waiver
16	of that would mean teachers would be assigned duty
17	during lunch on some days?
18	MS. BROADWAY: On some days.
19	DR. SAUNDERS: Okay. And the waivers to be
20	rescinded, you had you wanted to rescind the
21	publication of school district goals. Correct?
22	MS. BROADWAY: Yes. Our first year, you know,
23	we didn't have any data, so that can be removed now.
24	DR. SAUNDERS: And there's a need clarification
25	on the gifted and talented.

1	MS. BROADWAY: Right. We do want to rescind
2	that because we do have that program in place now, so
3	that's the clarification. This year we did get
4	approval to begin the GT program and so it is already
5	up and running. So, we do want to rescind that one.
6	DR. SAUNDERS: And I just need clarification
7	from Legal on did ask about the sections 1801 and
8	1802 on the Standards of Accreditation with that tied
9	together. What do we need to do? Did we clarify
10	that?
11	MS. DAVIS: Yeah. She said that they're going
12	to rescind them. The only thing I would add is they
13	also have the waiver of the ADE gifted and talented
14	program approval standards rules that they probably
15	need to confirm they need those rescinded, as well.
16	MS. BROADWAY: Yes.
17	DR. SAUNDERS: Are you in agreement? Okay.
18	MS. BROADWAY: Yes.
19	DR. SAUNDERS: Okay. And down to the
20	performance, I know that looking at your performance
21	on literacy ELA was 8.1% this last year, in English
22	Language Arts, and 10.8% in mathematics. Correct?
23	MR. MITCHELL: Correct.
24	DR. SAUDNERS: Do you want to just expand on
25	that for me?

	276
1	MR. MITCHELL: Well, we
2	DR. SAUNDERS: Talk to me?
3	MR. MITCHELL: I can expand on what we've done
4	to kind of combat that after receiving that data.
5	DR. SAUNDERS: How did it get to that point
6	though?
7	MR. MITCHELL: How did it get to that point?
8	DR. SAUNDERS: Yeah.
9	MR. MITCHELL: I think we just the curriculum
10	was not rigorous enough, which we obviously
11	understood after seeing the data. Teacher retention
12	has always been an issue for us until last year and
13	so we had cycles of people coming in to teach our
14	kids. One class of kids maybe had four math teachers
15	in the course of one year, and so retention has
16	always been an issue. We're doing much better with
17	that now. And I think some of the things we're doing
18	to combat that are going to help with this year's
19	scores, such as our interventions, our pull-outs, our
20	push-ins, our Saturday school program, our ELL, et
21	cetera.
22	DR. SAUNDERS: Can you tell me more of what are
23	you doing specifically on that teacher retention,
24	some of your efforts towards that?
25	MR. MITCHELL: Well, research says it has a lot

2

to do with leadership. This is my second year and so we only had to replace three people this last school year. We even had a TFA teacher commit for another year to our campus. We also are doing a better job, as Mr. Whittaker stated, in going out and recruiting high-quality people early versus trying to hire people in April, rather than trying to hire people in June and August. I think our retention has a lot to do with the fact that we have a great working environment. We have great families -- as you can see, our parents are here to support us today; a great school board; great partnerships. We're very unique. Coming from the district, I did 14 years in public schools before joining charter schools and there's so much difference and so much levels of commitment that public schools don't offer, and I think that environment is healthy for anyone who wants to be an educator.

DR. SAUNDERS: Okay. Thank you.

CHAIRPERSON COFFMAN: Ms. Pfeffer.

MS. PFEFFER: Mr. Mitchell --

MR. MITCHELL: Yes, ma'am.

MS. PFEFFER: -- I just wanted to make a couple of observations. And when I look through here and with the presentation I am very interested in your

1	plan for the recruitment and retention, and if the
2	results continue to be what you want and, as you move
3	forward, if there are new things that you try,
4	because that is it is a serious issue. But I
5	found it very refreshing to see a very specific
6	MR. MITCHELL: Yes, ma'am.
7	MS. PFEFFER: concerted defined plan for
8	that. And I also feel like you all are very focused
9	in on, you know, realizing that when you can when
10	you get students and when you can keep them
11	MR. MITCHELL: Absolutely.
12	MS. PFEFFER: you can make an impact.
13	MR. MITCHELL: Absolutely.
14	MS. PFEFFER: And that certainly helps with data
15	in really being able to know your success, so I do
16	appreciate that. And I also appreciate how clear you
17	were, all of you were in the application in terms of
18	goals. You went through, did you meet goal, yes; did
19	you meet goal, no, and you had a very thorough
20	rationale in the plan going forward. So I just
21	wanted to make those positive comments
22	MR. MITCHELL: Okay.
23	MS. PFEFFER: about the overall application.
24	MR. MITCHELL: Thank you.
25	MS. PFEFER: So it's very helpful for us.

	201
1	CHAIRPERSON COFFMAN: Any additional questions
2	or comments? Dr. Gotcher.
3	DR. GOTCHER: A couple of pieces. I think I'll
4	stick with just the one as it relates to behavior
5	plans and then parental support. If you can tie
6	those two together, Mr. Mitchell, I'll try to do this
7	in one question. I'm concerned about the
8	effectiveness of the behavior plans and how involved
9	are the parents in the process. And talk about a
10	little bit seg-way into your
11	MR. MITCHELL: Okay.
12	DR. GOTCHER: Since you don't have an active
13	PTA, according to your report, how are
14	MR. MITCHELL: It's not called a PTA; it's
15	called the Light Keepers Association.
16	DR. GOTCHER: That's why you don't have a PTA
17	MR. MITCHELL: Right. Yes, sir.
18	DR. GOTCHER: because it's called yeah.
19	MR. MITCHELL: And then yes, sir.
20	DR. GOTCHER: That's my point.
21	MR. MITCHELL: Yes, sir. They're very active.
22	DR. GOTCHER: So explain more about that please
23	
24	MR. MITCHELL: Okay.
25	DR. GOTCHER: because I'm turning a little

red right now.

MR. MITCHELL: That's okay. One thing that's unique about Lighthouse is that we have what's called an SBMT meeting monthly, which is School-Based Management Team, which involves a parent. And so that parent is allowed to give input as far as field trips, as far as extracurricular activities, as far as things that we should do as far as our parent nights we offer monthly. And so that all in turn allows the parental support to be great. When you look at that same committee review with the handbook -- when I came on last year the handbook was already in place and so the suspensions were, but they were due to -- you have to follow your due process as far as your handbook.

DR. GOTCHER: Agreed.

MR. MITCHELL: And so when we went to restorative practices we did more of committing to keeping kids in class versus sending kids home. And then when you have the type of parents we have, all of our parents are a phone call away versus in some schools you may not even have a working number. I can text every parent that's sitting out here before you right now and they'll be at the school within 15 minutes to support their child, and then my goal is

	203
1	to get the child back in class immediately. I'm not
2	really into I've done alternative schools; I've
3	seen what happens to kids in those systems. That's
4	not why I committed to Pine Bluff. My commitment was
5	to get these kids to where they need to be by 12th
6	grade.
7	DR. GOTCHER: All right. Thank you very much.
8	MR. MITCHELL: Yes, sir.
9	CHAIRPERSON COFFMAN: Dr. Saunders.
10	DR. SAUNDERS: Yeah. What's the feeding program
11	that you mentioned, Universal?
12	MR. MITCHELL: We have Universal Feeding Program
13	which provides free lunch and breakfast for every kid
14	on our campus. We also provide snacks for every K-2
15	scholar, as well. And through a partnership with Mr.
16	Cedric Jackson we're able to feed every child in our
17	afterschool program and provide them with snacks on
18	the way out the door.
19	DR. SAUNDERS: Is Universal Feeding Program, is
20	that the name of it or does it
21	MR. MITCHELL: That's the I think that's how
22	it's worded when you apply for the paperwork and so
23	
24	DR. SAUNDERS: Is it CEP?
25	MR. MITCHELL: Right.

DR. SAUNDERS: Okay. Thank you.

MR. MITCHELL: All right.

CHAIRPERSON COFFMAN: You want to translate for Sharon, community eligibility provision?

DR. SAUNDERS: Yes. Community eligibility provision.

MS. SMITH: This is simply just a comment, but I wish you could see the head-nodding going on in this section over here. I mean, I almost feel like there's going to be an Amen in a second. But you -- I mean, the head-nodding is just going on.

MR. MITCHELL: Well, it's unique. I attended UAPB with some of my parents. Some of my parents were my teachers at UAPB. My family is from Pine Bluff, so the commitment for me was easy. Once I got onboard we kind of just rolled up our sleeves from -- I think my first day there we had a parent meeting at the church and I got like 10 initiatives that very first night from my parents on what they wanted. And then, as you can see, our enrollment grew from 275 to 343 that very next year. So I think it's just about commitment; I think it's about doing what's best for kids and allowing parents of our 88 families to have a choice in their child's education. That's why we're here.

	265
1	MS. SMITH: Well, it's obvious you have
2	leadership skills and your heart is in the right
3	place.
4	CHAIRPERSON COFFMAN: I was checking on red in
5	the money file just to make sure that wasn't a
6	concern. Ms. Barnes.
7	MS. BARNES: Good afternoon. Thank you for the
8	presentation, and to each of you. Your support is
9	evident for the school. I only have, well, I guess a
10	question
11	MR. MITCHELL: Okay.
12	MS. BARNES: with respect to the Priority at
13	your lower
14	MR. MITCHELL: Three-four.
15	MS. BARNES: building. And then the middle
16	school, middle grades, you seem to be doing you
17	know you're close.
18	MR. MITCHELL: Yes, ma'am.
19	MS. BARNES: But I guess I think I just want to
20	kind of hear what you really feel created this
21	scenario that put the lower grades in the Priority
22	status and what you're doing or how you see that
23	rolling up to the middle grades.
24	MR. MITCHELL: I think the biggest issue we have
25	was teacher retention.

MS. BARNES: Okay.

MR. MITCHELL: That group of kids has never just had a consistent teacher to follow them, for various reasons. I know we've had teachers who have left to go to graduate school at Harding -- I mean, at Harvard; we've had teachers leave to come to State Department, et cetera. It's a hard commitment. I think the difference is now that some of the best practices we use as far as pre- and post-tests and as far as intervention will help those scores to increase. Also, I just think we have a good cluster of 3-4 teachers now.

MS. BARNES: Okay.

MR. MITCHELL: There's a good mix. There's two returning and two new. We have a teacher who's certified from Arizona who's probably the strongest teacher in our building her first year. And so she's able to work -- when we do peer-to-peer, when we do grade level meetings she's able to offer some of the strategies she used in her classes school-wide so that everyone has the opportunity to have the same success she has. And I just think that we're a group of people who are committed. And so when we work sunup to sundown it's just -- it's a commitment. Usually, in a public school when the bell rings the

parking lot is empty. For us, that's when we get started. We look at data. Some teachers volunteer their time to help kids after school for various groups. We have probably 10 pockets of kids throughout the building till 5:30 every day.

MS. BARNES: Thank you.

MR. MITCHELL: Yes, ma'am.

CHAIRPERSON COFFMAN: Addressing those students that did have those multiple teachers that find themselves behind, is there a plan to get them caught up?

MR. MITCHELL: Yes, ma'am. We do strong intervention throughout the day. So any teacher that has flexibility in their schedule pushes into a classroom, especially in math and in literacy. Once the instruction has been given, that person either flips/swaps with the teacher so the teacher can pull out kids for small group or that teacher will take kids out for small group and kind of reinforce the instruction that's already been made. That model is also followed by my assistant principal, my school (inaudible) and my self. And so we all have 15 to 20 kids a day that we intervene with and then we go back and reassess those kids to make sure they got the concept that was taught that day. And so if the exit ticket -- prime example, I have a little girl in my group who we worked for an hour-and-a-half on a day, had the skill mastered, and she did not pass the exit ticket. So that very next day, "Mitchell, Mitchell, your baby didn't pass the exit ticket," and so I was able to get her again during lunch time, work on it again, because we just want to make sure our kids have it. We want to be able to take this ACT Aspire test with confidence, for our kids to be able to manipulate through the screens and have confidence in what they'll be able to compute.

CHAIRPERSON COFFMAN: I have a couple more questions. Talk to us a little bit about ACSIP and school improvement specialists.

MR. MITCHELL: Well, our school improvement -let me kind of backtrack. We posted the job
immediately after meeting with Dr. Wilde in his
office, maybe in October. Variety of applicants but
no one had a public school background whatsoever. We
had applicants from the Tyson plant; we had
applicants from the local newspaper; no one with
educational credentials whatsoever. The one person
that we did find with those credentials, we brought
her in. She has been retired maybe three to four
years, and so she would have been a great

	203
1	interventionist but not necessarily a school
2	improvement specialist. The person we've offered
3	that job to, it would be added on to her current role
4	and so once we figured out compensation and whatnot
5	we're confident she'll accept that position.
6	CHAIRPERSON COFFMAN: Okay. Talk to us about
7	ACSIP.
8	MR. MITCHELL: The ACSIP is submitted. We did
9	that we're still working on some revisions but it
10	has been submitted, I know, for the indicators. Yes.
11	CHAIRPERSON COFFMAN: So, you know, school
12	improvement can be a real it can be an asset to
13	you. It was a game-changer for me as a teacher when
14	I really understood how that process can help
15	MR. MITCHELL: Right.
16	CHAIRPERSON COFFMAN: improve a school. So I
17	really encourage you to let it be your best asset.
18	MR. MITCHELL: Absolutely.
19	CHAIRPERSON COFFMAN: Talk to us a little bit
20	about technology. It's something you and I addressed
21	
22	MR. MITCHELL: Yes, ma'am.
23	CHAIRPERSON COFFMAN: at the end of our
24	conversation.
25	MR. MITCHELL: And I'm excited to tell you I've

got a meeting Friday on how I'm going to spend my
money, and so I'm excited. I've already got a quote
for 45 laptops, two carts; excited about that. We
did get -- did we talk about the mini grant?

CHAIRPERSON COFFMAN: Yes.

MR. MITCHELL: Got the mini grant, so we do have
a few little tablets on campus already. And then I
think the good thing is we do work with whatever we
have, and so our 26 computers in our lab we do use
them throughout the day. We involve them on

afterschool programs and on Saturdays. Even when a

kid is sent to us for restorative practices, we have

that kid log in to a remediation program while

they're sitting in my office, sometimes on my

instructional time.

CHAIRPERSON COFFMAN: That's exciting. I'll just tell you my pet peeve is to come by for a quick drop-in visit and find carts locked up.

personal laptop, just because I don't want to waste

MR. MITCHELL: Oh, no, ma'am. Oh, no, ma'am.

CHAIRPERSON COFFMAN: They need to have

fingerprints on them.

MR. MITCHELL: We're going to use them, I promise you that. We cannot wait till Friday for this meeting. Depending on what you tell me today,

	231
1	we might meet tomorrow.
2	CHAIRPERSON COFFMAN: Any other questions or
3	comments? They are requesting a 5-year renewal.
4	DR. SAUNDERS: I have a comment.
5	CHAIRPERSON COFFMAN: Oh, you have a comment.
6	All right. Go right ahead.
7	DR. SAUNDERS: Yes. I'll tell you, I'm
8	encouraged from what I hear
9	MR. MITCHELL: Yes, sir.
10	DR. SAUNDERS: today. I still have concern.
11	I have concerns simply because I think and I was
12	looking at your application, in particular one
13	section that referenced the give me just a moment
14	here the interim assessment data from 11-12
15	through 14-15, the two tables side-by-side, one being
16	math on the left and reading on the right. Actually,
17	one table but that was what it was. And it was I
18	think the purpose for what it was pointing out in
19	that was the decline in performance over time.
20	MR. MITCHELL: Uh-huh.
21	DR. SAUNDERS: And it almost seems to me, if I
22	could verbalize it, that it hit really low and now
23	you are taking steps and there's been change, changes
24	needed for it to go in the upward direction.
25	MR. MITCHELL: Correct.

	292
1	DR. SAUNDERS: And I'm very encouraged by what I
2	hear, but at the same time I'm very cautious that
3	I hope it does well. From what I hear I think it
4	will do well. But I can't just turn around and just
5	assume it's going to
6	MR. MITCHELL: Absolutely.
7	DR. SAUNDERS: for the kids' sake.
8	MR. MITCHELL: Absolutely.
9	DR. SAUNDERS: I think it still needs to be
10	monitored with that. And so with all that being
11	said, I think that my motion
12	CHAIRPERSON COFFMAN: Hold on. Ms. Davis
13	DR. SAUNDERS: Never-mind.
14	CHAIRPERSON COFFMAN: are there any remaining
15	issues?
16	MS. DAVIS: No, there's no issues with the
17	waivers but I just want to clarify one thing. I know
18	several people had spoke about their K-12 program,
19	but they requested it to be amended to K-8. So I
20	just want to make sure that that was understood and
21	clear. Okay.
22	CHAIRPERSON COFFMAN: That makes good sense.
23	Now, one more time.
24	DR. SAUNDERS: One more time. So my motion
25	would be reflective I think while every case is

	253
1	different, I think this is real similar to feelings I
2	had on the case before for a 3-year renewal and with
3	internal review of the academic performance.
4	DR. GOTCHER: I would second that, as well.
5	CHAIRPERSON COFFMAN: Okay. I've had a motion
6	by Dr. Saunders and a second by Dr. Gotcher for a 3-
7	year renewal with internal review. Any discussion?
8	MS. SMITH: Just going off of what Dr. Wilde
9	said earlier, that this was the beginning of the
10	process and you were kind of in that place. But to
11	fully please open yourself up to that process
12	because they're truly there to help and lead and give
13	support, so to really open yourself up to that.
14	CHAIRPERSON COFFMAN: No discussion? All right.
15	All those in favor?
16	(UNANIMOUS CHORUS OF AYES)
17	CHAIRPERSON COFFMAN: Any no's? He asked me to
18	do them all together so he could see what everybody
19	votes at the same time.
20	All those in favor? I didn't hear everyone.
21	(UNANIMOUS CHORUS OF AYES)
22	CHAIRPERSON COFFMAN: Any opposed?
23	All right. If you will write your responses,
24	we'll go around with those.
25	(A FEW MINUTES OF SILENCE)

	294
1	CHAIRPERSON COFFMAN: Ms. Barnes.
2	MS. BARNES: I voted in favor of the motion. I
3	believe that a 3-year renewal allows for
4	stabilization of the systems currently in place. It
5	provides time to determine whether the charter is
6	able to utilize the collaborative relationship, to
7	move forward with school improvement planning, and
8	improve student achievement.
9	CHAIRPERSON COFFMAN: Dr. Gotcher.
10	DR. GOTCHER: I voted for the motion to renew.
11	I was impressed with the presentation and impressed
12	with the shift in a stronger leadership model. I
13	also feel that I hope to see a culture of
14	sustainable leadership. I think it's very important
15	for this academy. Academic performance is improving.
16	I encourage you to continue to work closely with the
17	School Improvement Unit of the Department of
18	Education.
19	CHAIRPERSON COFFMAN: Mr. Lester.
20	MR. LESTER: I voted for. With new leadership
21	and stability I feel that the charter will continue
22	to improve. I'm impressed with the community
23	involvement and the push for teacher retention.
24	CHAIRPERSON COFFMAN: Ms. Liwo.
25	MS. LIWO: I voted for. I think the three years

will give the charter enough time to demonstrate 1 increased academic performance. I was also very 2 impressed with the Revamp Restart Plan. 3 CHAIRPERSON COFFMAN: Ms. Pfeffer. 4 5 MS. PFEFFER: The new leadership and community support seems to be moving the school in the right 6 7 direction and the application is strong. cautious about moving forward based on the 2015 8 9 Priority designation but feel this motion provides 10 the necessary support for the charter to move forward 11 and be successful. As teacher and student stability occurs, the data should align and tell the story of 12 13 success. 14 CHAIRPERSON COFFMAN: Mr. Rogers. 15 MR. ROGERS: I voted for. The stability and 16 leadership seems to be having a positive effect. probably would have allowed for a longer renewal, but 17 18 I'm comfortable with what -- with the 3-year while Lighthouse works with ADE on their Priority status. 19 20 CHAIRPERSON COFFMAN: Dr. Saunders. 21 DR. SAUNDERS: Yes. I'm encouraged by the 22 change in plan of action. I do feel that close 23 monitoring is still needed. 24 CHAIRPERSON COFFMAN: Ms. Smith. MS. SMITH: I voted in favor. 25 I noted that

	296
1	curriculum changes were made in reflection to the
2	poor student data, that support is given to
3	administration and teachers by the Lighthouse Academy
4	national. NWEA growth data shows positive progress.
5	This is the first year to work with the ADE School
6	Improvement and want to encourage continued
7	collaboration.
8	CHAIRPERSON COFFMAN: Congratulations, Mr.
9	Mitchell. I hope that Friday meeting turns out well
10	
11	MR. MITCHELL: Yes, ma'am.
12	CHAIRPERSON COFFMAN: and we get some new
13	technology. And good luck to all of you.
14	[AUDIENCE APPLAUSE]
15	CHAIRPERSON COFFMAN: Are there any additional
16	items before the Panel today?
17	MS. BOYD: No.
18	CHAIRPERSON COFFMAN: We'll have the same kind
19	of fun tomorrow at 8:30. And I'll accept a motion to
20	adjourn.
21	DR. GOTCHER: Motion to adjourn.
22	DR. SAUNDERS: Second.
23	CHAIRPERSON COFFMAN: Dr. Gotcher, seconded by
24	Dr. Saunders. Thank you everyone.
25	(The meeting was adjourned at 4:10 p.m.)

## CERTIFICATE

STATE OF ARKANSAS	)		
	)	ss.	
COUNTY OF SALINE	)		

I, SHARON K. HILL, CCR, a Certified Stenomask Reporter and Notary Public before whom the foregoing proceedings was taken, do hereby certify that the same is a true and correct transcription before the Arkansas State Department of Education, Charter Authorizing Panel, in Little Rock, Arkansas, on February 17, 2016, that the said proceedings was reduced to typewritten form by me or under my direction and supervision; and that the foregoing pages constitute a true and correct transcription of all proceedings had in said matter.

I FURTHER CERTIFY that I am neither counsel for, related to, nor employed by any of the parties to this action.

I FURTHER CERTIFY that I have no contract with any parties within this action that affects or has a substantial tendency to affect impartiality, that requires me to relinquish control of an original transcript or copies of the transcript before it is certified and delivered to the custodial agency, or that requires me to provide any service not made available to all parties to the action.

WITNESS, MY HAND AND SEAL, THIS DATE: March 1, 2016.

SHARON K. HILL, CCR Certified Court Reporter Certificate No. 670
